Making Life Easier And Safer
Staying in touch with children is convenient and easy when using your microTALK radio.

Each pair of Cobra FS300 family safety radio set has been paired at the factory. They are ready to use without setup.
(If interference occurs, or if you need to re-pair a radio set, see the section on New Pairing)

Installing Batteries
To install or replace Batteries:
1. Remove belt clip by pressing on the release tab and sliding it up at the same time.
2. Remove the battery cover by sliding it downward.
3. Insert 3 AAA batteries into the battery cover according to polarity markings.
4. Do not attempt to charge alkaline batteries.
5. Do not mix old and new batteries.
6. Do not mix alkaline, standard (carbon-zinc), or rechargeable (NiCd, Ni-Fe, etc.) batteries.

Power Button
Press and hold Power button for 4 seconds to turn the radio on or off. Talk button flashes 3 times every 2 seconds while child unit is on.

Battery Low Indicator
During normal operation, the child unit will send a signal to the parent unit every 10 minutes when the battery reaches a low power level condition. A warning tone will sound on the parent unit.

Micro-USB Charge Jack
Plug the USB cable into USB-compatible power port, then, insert the Micro-USB connector directly into the charging port located right side of the child unit.
- During charging, Talk button flashes faster (around 3 times per second).

WAVES! Never leave your radio powered on when not in use. This can lead to possible damage to your radio.

New Pairing
1. With the child unit turned off, simultaneously press and hold the Talk button and the Power button for 5 seconds until audible beeps are heard. The audible beeps will last for about 3 seconds. When the audible beeps are heard, the child unit is ready to be paired with a new parent unit.
2. With the Parent Unit turned on, simultaneously press and hold the Talk button and the Power button and "PA" flashes on the display.
3. Talk button must be pressed, then press the Talk button on the child unit and after 2 to 3 seconds it will stop beeping, both the parent and the child units will emit an audible tone to indicate successful pairing.
4. Once successfully paired, the parent unit display will show "Out" and in to talk. The child unit will also emit an audible tone and will then complete the pairing process.

Customer Assistance
In your user's guide, you should find all the information you need to operate your microTALK radio. If you require further assistance after reading this guide, Cobra operates the following customer assistance center:
