Our Thanks to You

Thank you for purchasing a CobraMarine® VHF radio. Properly used, this Cobra® product will give you many years of reliable service.

How Your CobraMarine VHF Radio Works

This radio is a battery-powered portable transceiver for use afloat. It gives you two-way vessel-to-vessel and vessel-to-shore station communications, primarily for safety and secondarily for navigation and operational purposes. With it, you can call for help, get information from other boaters, talk to lock or bridge tenders, and make radiotelephone calls to anywhere in the world through a marine operator.

Besides two-way communications, the radio can provide quick access to receive all the NOAA (National Oceanographic and Atmospheric Administration) weather channels and alert you to weather emergencies with a tone on a weather channel you can select for your area.

Customer Assistance

Should you encounter any problems with this product, or not understand its many features, please refer to this owner’s manual. If you require further assistance after reading this manual, Cobra Electronics offers the following customer assistance services:

For Assistance in the U.S.A.

Automated Help Desk English only.
24 hours a day, 7 days a week 773-889-3087 (phone).

Customer Assistance Operators English and Spanish.
8:00 a.m. to 5:30 p.m. Central Time Mon. through Fri. (except holidays)
773-889-3087 (phone).

Questions English and Spanish.
Faxes can be received at 773-622-2269 (fax).

Introduction

VHF MARINE RADIO

MR HH475 FLOAT BT

Nothing Comes Close to a Cobra®
Backlit LCD Screen

- Backlit LCD (Liquid Crystal Display) Screen
- UIC Active Channel Map Icons
- Roger Beep Icon
- Battery Power Icon
- Memory Channel and Other Memory Channel Icon
- Call Tone Icon
- Weather Alert Icon
- Low/Medium/High Power Icons
- Signal Level Icons
- Weather Icon
- Call Tone Icon
- Memory Channel Icon
- Memory Channel and Other Simplex Operation Icons
- Battery Power Icon
- Frequency Band Icon
- Active Channel Numbers
- Tri-Watch Icon
- Button Lock Icon
- Key Tone Icon
- UIC Active Channel Map Icons

Product Features

- Power Settings
  Selectable power settings produce 1, 3 or 6 watts of output power for near or distant calling.

- USA/International/Canada Channels
  Allows operation on any of the three (3) different channel maps established for these areas.

- All NOAA Weather Channels
  Instant access to all National Weather Channels, 24 hours a day.

- Submersible to JIS7 Standards
  Waterproof to 3.3 ft (1 m) of water for 30 minutes.

- Cobra Exclusive Rewind-Say-Again™
  A dedicated button allows user to replay up to the last 20 seconds of audio. Press the dedicated rewind button and this Cobra VHF will replay the last 20 seconds of the audio from your VHF.

- Button/Key Lock
  Prevents accidental setting changes when button lock is set.

- Channel Scan/Memory Scan
  Scan through unlimited channels or memory locations to find conversations in progress.

- AA Battery Compatible
  Can work at full power with six (6) AA alkaline batteries. Good for emergency backup. Use AA battery tray included (P/N CM 110-011).

- Unlimited Memory Channels
  Allows programming of unlimited VHF memory channels.

- Emergency Weather Alert
  Receive NOAA alerts when threatening weather is nearby.

- Speaker/Mic Jack
  Allows connecting optional Cobra Lapel Speaker/Mic and other Cobra accessories.

- Instant Channel 16/9
  Provides instant access to priority Channel 16 and calling Channel 9.

- Tri-Watch
  Use to monitor three (3) channels at once — Channel 16 and two (2) programmable channels.

- Floating
  This radio will float if dropped overboard. It has an orange stripe so it’s easy to retrieve. Must use included battery to float.

Product Features (continued)

- Signal Strength Meter
  Shows the strength of incoming or outgoing signals.

- Easy Redial Operation
  Redial of last phone number dialed.

- Voice Dialing
  Supports standard mobile phone voice dialing when paired to a compatible mobile phone.

- Noise Canceling Microphone
  Reduces effect of environmental noise when speaking.

- Illuminated Buttons
  Allows high visibility of all function buttons.

- Roger Beep Tone (Selectible)
  Confirmation tone indicates the completion of the user’s transmission and signals to others it is clear to talk. On or Off selectable.

- BURP
  The Cobra BURP feature expels water from the speaker grill if the unit is dropped in the water or is subjected to extreme rain and weather.
Important Safety Information
Before installing and using your CobraMarine VHF radio, please read these general precautions and warnings.

Warning and Notice Statements
To make the most of this radio, it must be installed and used properly. Please read the installation and operating instructions carefully before installing and using the radio. Special attention must be paid to the WARNING and NOTICE statements in this manual.

**WARNING**
Statements identify conditions that could result in personal injury or loss of life.

**NOTICE**
Statements identify conditions that could cause damage to the radio or other equipment.

Safety Training Information
This CobraMarine® radio is designed for, and classified as, “Occupational Use Only.” The radio must only be used in the course of employment by individuals aware of both the hazards and the ways to minimize those hazards. This radio is NOT intended for use in an uncontrolled environment by the “General Population.” This radio has been tested and complies with the FCC RF exposure limits for “Occupational Use Only.” This CobraMarine VHF radio also complies with the following guidelines and standards regarding RF energy and electromagnetic energy levels as well as evaluation of those levels for human exposure:

General Precautions
The following WARNINGS and NOTICE information will make you aware of RF exposure hazards and how to assure you operate the radio within the FCC RF exposure limits established for the radio.

**WARNINGS**
Your radio generates electromagnetic RF (radio frequency) energy when it is transmitting. To ensure that you and those around you are not exposed to excessive amounts of that energy, DO NOT touch the antenna when transmitting. KEEP the radio at least two (2) inches (5 cm) away from yourself and others when transmitting.

DO NOT operate with more than a duty cycle of 5% transmit, 5% receive and 90% standby. The radio is transmitting when the Talk button is pressed and the transmit information shows on the LCD screen.

ALWAYS use only Cobra authorized accessories.

DO NOT operate the radio in an explosive atmosphere, near blasting sites, or in any area where signs are posted prohibiting radio transmissions.

NEVER place the transceiver or microphone/speaker where they might interfere with operation of your vessel or cause injury.

DO NOT allow children or anyone unfamiliar with proper procedures to operate the radio without supervision.

Failure to observe any of these warnings may cause you to exceed FCC RF exposure limits or create other dangerous conditions.
Introduction

NOTICE

Your radio is waterproof only when the batteries are properly installed.

AVOID using or storing the radio at temperatures below -4°F (-20°C) or above 140°F (60°C).

KEEP your radio at least 3 ft (0.9 m) away from your vessel's magnetic navigation compass.

DO NOT attempt to service any internal parts yourself. Have any necessary service performed by a qualified technician.

This radio is supplied with a lithium-ion (LiON) rechargeable battery pack.

- Use only the Cobra charger to recharge lithium-ion (LiON) batteries in the radio.
- Do not short circuit the battery pack.
- When replacing the batteries, dispose of the old batteries properly. Batteries may explode if disposed of in a fire.

Changes or modifications to your radio MAY VOID its compliance with FCC (Federal Communications Commission) rules and make it illegal to use.

Recommendations for Marine Communication

The frequencies your radio uses are set aside to enhance safety afloat and for vessel navigation and operational messages over a range suitable for nearshore voyages. If the 6 watt maximum output of your radio is not sufficient for the distances you travel from the coast, consider a higher powered handheld or installing a Cobra Marine fixed mount radio with up to 25 watts of output power. (Visit www.cobra.com or your local dealer for model availability.)

If traveling far offshore, you should consider adding even more powerful radio equipment such as HF single side band or satellite radio for your vessel. The U.S. Coast Guard does not endorse cellular telephones as substitutes for marine radios. They generally cannot communicate with rescue vessels and, if you make a distress call on a cellular telephone, only the party you call will be able to hear you. Additionally, cellular telephones may have limited coverage over water and can be hard to locate. If you do not know where you are, the Coast Guard will have difficulty finding you if you are using a cellular telephone. However, cellular telephones can have a place on board where cellular coverage is available — to allow social conversations and keep the marine frequencies uncluttered and available for their intended uses.
FCC Licensing Information

CobraMarine VHF radios comply with the FCC (Federal Communications Commission) requirements that regulate the Maritime Radio Service. The radio operates on all currently allocated marine channels and is switchable for use according to U.S.A., International or Canadian regulations. It features instant access to emergency Channel 16 and calling Channel 9 as well as NOAA (National Oceanic and Atmospheric Administration) All Hazards Radio with Alert that can be accessed by pressing one (1) button.

Station License
An FCC ship station license is no longer required for any vessel traveling in U.S.A. waters which uses a VHF marine radio, RADAR, or EPIRB (Emergency Position Indicating Radio Beacon), and which is not required to carry radio equipment. However, any vessel required to carry a marine radio on an international voyage, carrying an HF single side band radiotelephone, or carrying a marine satellite terminal must obtain a station license.

FCC license forms and applications for ship and land stations can be downloaded through the Internet at www.fcc.gov. Forms can also be obtained by calling the FCC at 888-225-5322.

International Station License
If your vessel will be entering the sovereign waters of a country other than the U.S.A. or Canada, you should contact that country’s communications regulatory authority for licensing information.

Radio Call Sign
Currently, the FCC does not require recreational boaters to have a license. The United States Coast Guard recommends that the boat’s registration number and state of registry (e.g., IL 1234 AB) be used as a call sign and be clearly visible on the vessel.

Canadian Ship Station License
You need a Radio Operator’s Certificate if your vessel is operated in Canadian waters. Radio Operator training and certification is available from the Canadian Power Squadron. Visit their website (http://www.cps-ecp.ca/english/newradiocard.html), contact the nearest field office or write: Industry of Canada, Radio Regulatory Branch, Attn: DOSP, 300 Slater Street, Ottawa, Ontario, Canada K1A 0C8.

User Responsibility and Operating Locations
All users are responsible for observing domestic and foreign government regulations and are subject to severe penalties for violations. The VHF frequencies on your radio are reserved for marine use and require a special license to operate from land, including when your boat is on its trailer.

NOTE
This device complies with part 15 of the FCC Rules. Operation is subject to the following two (2) conditions:
1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

FCC Warnings: Replacement or substitution of transistors, regular diodes or other parts of a unique nature, with parts other than those recommended by Cobra may cause a violation of the technical regulations of part 80 of the FCC Rules, or violation of type acceptance requirements of part 2 of the rules.
Included in this Package

You should find all of the following items in the package with your CobraMarine VHF radio:

- Radio
- Wrist Strap
- Drop-In Battery Charger
- Battery Charger Power Cord
- LiON Battery Pack
- Alkaline Battery Tray
- Operating Instruction Manual
- Spring-Loaded Belt Clip
- LiON Battery Pack
- Alkaline Battery Tray
- Operating Instruction Manual
- Spring-Loaded Belt Clip
- Drop-In Battery Charger
- Battery Charger Power Cord
- LiON Battery Pack
- Alkaline Battery Tray
- Operating Instruction Manual
- Spring-Loaded Belt Clip
- Drop-In Battery Charger
- Battery Charger Power Cord
- LiON Battery Pack
- Alkaline Battery Tray
- Operating Instruction Manual
- Spring-Loaded Belt Clip
- Drop-In Battery Charger
- Battery Charger Power Cord
- LiON Battery Pack
- Alkaline Battery Tray
- Operating Instruction Manual
- Spring-Loaded Belt Clip

Wrist Strap and Belt Clip

Wrist Strap

The radio comes with the wrist strap already attached. It can be easily removed if you choose not to use it.

Belt Clip

Use the spring-loaded belt clip to carry the radio on your person.

1. Press open the belt clip, slide it over the belt and release the clip.
2. Insert the round guide on the back of the radio into the guide channel on the back of the belt clip. The radio must be upside-down, as shown, to remove it from the belt clip.
3. Once the knob is inserted all the way into the belt clip channel, the radio swings free but remains secure.
Batteries and Charger

The radio is shipped with a sealed lithium-ion (LiON) battery pack (P/N CM 110-021) that is rechargeable.

**WARNING**
The charger provided for this radio is only to be used to charge the battery pack provided. Do not charge any other type of batteries in the charger as fire, explosion or battery damage will occur. Avoiding extreme room temperatures will also help prolong the life of the battery pack for the radio.

When your rechargeable batteries begin to discharge too quickly, it is time to install a new battery pack. Your radio will also operate with six (6) high-quality AA alkaline batteries, using the included alkaline battery tray.

### Installing the Battery Pack

1. Position the battery pack to line up the two (2) external alignment tabs to the alignment slots in the radio.
2. Engage the battery pack into the radio until battery pack is fully seated against the radio housing.
3. Pivot the locking tab up until it snaps into place on the back of the battery pack.

---

**WARNING**

Only the rechargeable LiON battery pack can be recharged. You MUST use one of the charging devices provided with this radio. Do not substitute any other type of charging adapter or charger base for this radio. Battery damage, fire or explosion may result. It is equally important to prevent the lithium-ion (LiON) battery pack from freezing to obtain best performance from the battery pack.

### Power Sources

Initial Charge

The Cobra-provided LiON battery pack may be charged at home, in a car or in a boat using the appropriate 12V or 120V power cord with the charger.

1. Insert one (1) of the power cords into the back of the drop-in charger.
2. Insert the other end of the power cord into the appropriate 12V or 120V power source.
3. Remove the spacer from the charger and insert the entire radio/battery into the charger. The metal charge contacts on the battery will contact the mating prongs in the charger to transfer the charging current.
4. Observe that the red light on the front of the charger glows to indicate that the battery pack is properly seated and the charger is operating.
5. Allow the batteries to charge for five (5) to six (6) hours before use. The light will change back to green when the battery is fully charged.

**NOTE**

If the drop-in charger is used on a boat, Cobra recommends you attach it to a horizontal shelf or vertical bulkhead (using the screw holes provided) to prevent possible damage due to the boat rolling or pitching. The charging base has been designed to hold the battery pack in place during rough sea conditions.
To Remove Battery Pack from Radio

1. Pivot the locking tab off of the back of the battery pack to unlock.
2. Lift the bottom of the battery pack slightly to remove it from the radio housing.
3. Pull battery pack out of the radio housing.

**NOTE**
The LiON battery pack can also be charged in the battery charger without being installed in the radio. Insert the spacer into the battery charger to support the battery pack during this charging process. Follow the same procedures in “Initial Charge” to charge the battery pack.

**NOTICE**
Lithium-ion (LiON) batteries are toxic. Please dispose of properly. Some marine suppliers accept old battery packs for recycling and some municipal waste disposal agencies have special provisions for battery disposal.

Alkaline Batteries

There is an alkaline battery tray (P/N CM 110-011) provided with this radio. The alkaline battery tray is provided as a backup or “Emergency” power source should the battery pack run low on power and needs to be recharged. The radio will transmit at full power when using six (6) new AA Alkaline batteries.

**WARNING**
Never attempt to recharge alkaline batteries. They are not made to be recharged, and should be disposed of in a proper manner.

Maintaining the Battery Charge

As you use your radio, the battery power icon will show the battery power remaining. When the icon begins to flash, it is time to recharge or change the batteries.

**NOTICE**
Use only the drop-in charger provided by Cobra. Do not use the charger with alkaline batteries; only the LiON battery pack is rechargeable. Spent alkaline batteries must be discarded and replaced.

It is a good idea to keep a set of fresh, high-quality AA alkaline batteries with your radio. Should the rechargeable battery pack become discharged and no electrical power source is available, you can insert the included alkaline battery tray with fresh alkaline batteries and continue to use your radio.

**NOTE**
Some radios with LiON batteries have AA or AAA battery packs which only allow low-power transmit. The AA battery tray included with the HH475 and a fresh set of alkaline batteries will allow for full-power emergency transmissions.
Getting Started

Refer to the foldout at the front of this manual to identify the various controls and indicators on your radio. Throughout this manual you will be instructed to “Press” or to “Press and Hold” various buttons (except “Push to Talk”) on the radio. “Press” means a momentary press of approximately one (1) second. “Press and Hold” means to hold the button down for approximately two (2) seconds.

Whenever you press any button except the Talk button on your radio, a brief tone (beep) will sound to confirm the button press. With all button presses, the appropriate icon will appear on the LCD and the backlight will turn On. The backlight will stay On for 10 seconds after the button is released.

At times, you will hear two (2) other sounds. Two (2) beeps will sound to confirm your setting changes and three (3) beeps will sound to notify you of an error.

Common Radio Functions

The following procedures define common operating functions of the radio when in either Marine Standby or Weather (WX) Standby modes.

Power/Volume Control

Power On/Off Control

The On/Off/Volume control is located at the upper right side of the radio. Turning the On/Off/Volume control past the detent position will turn the radio On or Off.

Volume Control

Volume is controlled by turning the On/Off/Volume control.

- To increase the volume, turn the On/Off/Volume control clockwise.
- To decrease the volume, turn the On/Off/Volume control counterclockwise.

Radio Speaker and Microphone

The internal Radio Speaker and Microphone are located on the bottom front face of the radio below the lower control buttons. An optional Speaker/Microphone port is located at the top of the radio between the antenna and the Power/Volume control. Unthread the Speaker/Microphone port cover to access and install an optional speaker or microphone into this port.

Talk Button

Press and hold the Talk button to transmit messages. Release the Talk button to stop transmitting.
Getting Started

Backlight/Key Lock Button
The LCD will be illuminated by the backlight as long as any button is pressed and will remain On for 10 seconds after the button is released.

To Display the Backlight Momentarily:
Press the Backlight/Key Lock button. The backlight will remain On for 10 seconds. If the backlight is already On, another press of the Backlight/Key Lock button will turn it Off.

Key Lock
To prevent accidental changes to your settings, you can lock all of the following buttons:
- Channel Up Button
- Channel Down Button
- SCAN Button
- MEM/ESC Button
- WX/H-M-L Button
- 16/9 Button
- TRI-WATCH Button
- Call/Enter/Setup Button

To Lock or Unlock the Buttons:
Press and hold the Backlight/Key Lock button for two (2) seconds. The Key Lock icon will appear or disappear in the LCD. When Key Lock is On, pressing any of the listed buttons on the front of the radio will result in a three (3) beep error message.

Both the Backlight/Key Lock button and the Talk button are active — you can Receive (Rx) or Transmit (Tx) a message with Key Lock On, but you cannot change the channel.

Channel Up/Down Buttons
Your radio will Receive (Rx) and Transmit (Tx) VHF signals on the channel indicated on the LCD display. You can change the channel at any time using the Channel Up/Down buttons.

To Change Channels:
Press the Channel Up/Down button.
If you are on Channel 88, pressing the Channel Up button will advance to Channel 01. If you are on Channel 01, pressing the Channel Down button will advance to Channel 88.
You can press and hold the Channel Up/Down button for fast advance. The beep sound will occur only at the first press of the button and not during fast advance.
If the new channel selected is restricted to low power, the radio will automatically switch to Low Power mode and the Low Power icon will appear on the LCD.
If the radio is in the Key Lock mode, the channel will not change and the three (3) beep error signal will sound.

SCAN Button
Press and release the SCAN button to scan all channels. The SCAN icon will display on the LCD display. Scanning begins at lower channels, and scans to higher channels. Press the Channel Up/Down button to change the scan direction.
When a signal is received in SCAN mode, the radio will pause 10 seconds before resuming SCAN operation. The scan will stop when the Talk button is pressed.
In Memory mode, press and release the SCAN button to scan all memory channels. Because the unit is already in the Memory Channel mode, only the channels in the memory bank will be displayed.

NOTE
Memory channels need to be saved to effectively enter the Memory Channel mode and scan all memory channels.
Getting Started

High/Medium/Low (H-M-L) Power Button
Your radio can transmit selectively at 1, 3 or 6 watts of power. Cobra suggests you maintain the low power setting for short-range communications. You will conserve battery life and avoid overpowering nearby stations with a low power setting signal. Use the high power setting for long-range communications or when you do not receive a response to a signal sent at 1 watt.

To Toggle Between H-M-L Power Modes:
Press the H-M-L Power button. The LCD will show which mode is in effect. Some channels are restricted for a maximum use of 1 watt. Your radio will automatically set the power to Low Power mode when you select those channels.

NOTE
Some channels, frequency bands and countries of use might not be able to operate in High Power mode.

Call /Enter/Setup Button
The Call/Enter/Setup button has multiple functions. It is generally used in the following ways:
- Press and release to transmit your unique Call Tone signal to another radio.
- Press and hold to enter any Setup menu.
- Functions as an Enter button when making a selection in any Setup menu.

Setup Mode Programming
The following series of procedures is designed to allow you to set the programmable features of your radio. Correctly following these steps results in a minimal amount of radio setup programming time.

NOTE
When in the Setup mode, if you stop programming for longer than 15 seconds, your entry will be saved and the radio will go back to the Marine Standby mode. When you return to Setup mode and continue programming you will see the last “value” displayed. While in the Setup mode, you will not receive any signal reception.

Marine (VHF) Mode Programming
Programming these features will allow you to customize certain features of this radio to enhance your “On-Water” audio needs.

Start from Marine Standby mode to begin Marine (VHF) Setup programming. Press and hold the Call/Enter/Setup button for two (2) seconds to enter the programming mode.

The mode programming follows this sequence:
- Squelch Level Set
- UIC Channel Map
- Tone Alert On/Off
- Call Tone Select
- Roger Beep On/Off
- Key Tone On/Off
Squelch Control

Squelch Control filters weak signals and radio frequency (RF) noise so that you will clearly hear the signals you want. The Squelch Control on this radio is set through the following keypad operation.

**To Set Squelch Control:**
1. With the power On, press and hold Call/Enter/Setup button to access the Setup menu.
2. Squelch control will be the first menu item to appear. Press the Channel Up and Channel Down buttons to set level. The signal level bar graph shows squelch level while you are in Setup mode on the squelch adjust function.
3. To tune your squelch, press the Channel Down button until you hear a hissing sound, then press and release the Channel Up button until the hissing stops. This will establish a “Baseline” squelch.
4. By pressing the Channel Up button further, you will filter weak and medium strength signals. By pressing Channel Down button, you will receive weaker signals.
5. Press the Call/Enter/Setup button to save this entry and move to the next Setup mode programming.

**NOTE**
If the Squelch is set so that you can hear a continuous hissing sound, the Memory Scan and Tri-Watch functions will be blocked.

**Setup Mode Programming**

**USA/International/Canada Channel Maps**

Three (3) sets of VHF Channel Maps have been established for marine use in the USA, Canada, and the rest of the world (International). Most of the channels are the same for all three (3) maps, but there are definite differences (see table in the Appendix on page 64). Your radio has all three (3) maps built into it and will operate correctly in whichever area you choose.

**To Set Channel Map Operating Area:**
1. The Channel Map mode is the second mode on the Marine (VHF) Setup programming.
2. U, I and C will display, with the current setting (the U icon is the default) flashing.
3. Press Channel Up/Down button to select the U, I or C icon.
4. Press Call/Enter/Setup button to save this entry and move to the next Setup mode programming.

**NOTE**
One or two of the channel maps might have been disabled for sales of this radio in some countries.

**Call Tone Alert**

If Call Tone Alert is set to On, the radio will alert you to a call from a compatible Cobra radio with a Call Alert.

**To Set Call Tone On or Off:**
1. Display will show Call Tone icon and ON or OFF flashing.
2. Press Channel UP/Down button to select ON or OFF.
3. Press the Call/Enter/Setup button to save this entry and move to the next Setup mode programming.

The Call Tone icon will show in the Standby mode when set to ON.
Setup Mode Programming

Call Tone Select
This setting will also allow you to transmit a unique Call Tone alert to identify your radio when you transmit messages. You can select from one of 10 different Call Tone signals.

To Set Call Tone:
1. From the previous press of the Call/Enter/Setup button, the LCD will display the letter “C” and the current Call Tone number (01 through 10).
2. Press the Channel Up/Down button to select a different Call Tone. An example of each call tone will sound for 1.5 seconds.
3. Press Call/Enter/Setup button to save this entry and move to the next Setup mode programming.

NOTE
Call Tones are not usually used for Marine VHF communications. We allow you to turn it On for your unique communication needs.

Roger Beep Mode
In Roger Beep mode, your listener will hear an audible tone when you release the Talk button. This alerts your listener that you are finished talking and it is OK for them to speak.

To Set Roger Beep On or Off:
1. Display will show ROG icon and ON or OFF flashing.
2. Press Channel Up/Down button to select ON or OFF. ROG will be displayed when On.
3. Press Call/Enter/Setup button to save entry and move to the next Setup mode programming.

Key Tone Mode
In Key Tone mode, an audible tone will sound each time a button is pressed or you change a setting.

To Set Key Tone On or Off:
1. Display will show Key Tone icon and ON or OFF flashing.
2. Press Channel Up/Down button to select ON or OFF. Key Tone will be displayed when On.
3. Press Call/Enter/Setup button to save entry.

You have now ended Marine (VHF) Setup mode programming and will enter Marine Standby mode.

Bluetooth® Mode Pairing and Programming

Bluetooth® wireless technology is a standard which has been developed for use in mobile (cell) phones and other devices. This radio can be wirelessly linked to your mobile phone if your mobile phone also has Bluetooth. This process of linking your mobile phone and this radio is called “Pairing.” Once paired, this radio can act as the speaker and microphone of your mobile phone while your phone is stowed in a safe and dry location.

This programming section shows you how to complete the pairing process. It also shows you how to change some settings related to the Bluetooth functionality of your radio.

Pairing Your Mobile Phone:
1. Press and release the Bluetooth button to enter Bluetooth Standby. The LCD will change from VHF Standby mode display to Bluetooth Standby mode display. The word “bLUE” will be shown on the display and the blue keypad backlight will come On.
2. Press and hold the Bluetooth button on the HH475BT for four (4) seconds [until the radio beeps four (4) times] from the Bluetooth Standby mode. The blue backlight will flash for some time. Your radio is now in a “Pairing Mode” and can be “found” by your phone.

   While in pairing mode, the LCD will display the sequence as shown in the illustration below.

   3. Follow the cell phone’s instructions to search for available pairing with another Bluetooth device. This can often be found in the Tools or Settings menu of your mobile phone.

   Enter the “P.I.N.” (Personal Identification Number 0000), on your mobile phone when prompted. Wait for the pairing process to complete.

Key Tone Mode Sequence
Bluetooth® Mode Pairing and Programming

Operating Your Radio

Bluetooth Pairing

Bluetooth Standby Mode

4. You will then see a confirmation of successful pairing or a notice to try again if pairing did not occur. The LCD will briefly display the word “PairEd.”

NOTE
This process only needs to be completed for first time operation. From then on, as long as your mobile phone is within 30 feet (10 meters) of the radio, the two units will “Pair” automatically. A “P” will now be displayed if you press the Bluetooth button and enter the Bluetooth Standby mode.

Bluetooth Mode Programming

The default settings for how your radio answers and conducts Bluetooth mobile phone calls can be adjusted.

VOX On or Off
The VOX function converts the radio microphone’s pickup of your voice from being controlled by the PTT button to being activated by your voice. When VOX is On, the PTT button does not need to be pressed to transmit your voice, and you can just speak into the microphone.

When VOX is Off, you need to press the PTT button while speaking.

To Change Between VOX On and Off:
1. From the Bluetooth Standby mode, press and hold Call/Enter/Setup button to access the Setup menu. VOX On/Off will be the first menu item to appear.
2. Press the Channel Up and Channel Down buttons. The display will show the selection of either ON or OFF.
3. Press the Call/Enter/Setup button to confirm your selection and move to the next Setup mode programming.

Call Tone Alert
If Call Tone Alert is set to On, the radio will “ring” with one of your Cobra selected tones when you receive a call on your mobile phone. If Call Tone Alert is set to Off, the radio will ring with the default ring tone.

To Set Call Tone On or Off:
1. Display will show Call Tone icon and ON or OFF flashing. VOX On/Off will be the first menu item to appear.
2. Press Channel UP/Down button to select ON or OFF.
3. Press the Call/Enter/Setup button to save this entry and move to the next Setup mode programming. The Call Tone icon will show in the Standby mode when set to ON.

Call Tone Select (Ring Tones)
This setting controls what ring tones is used to alert for incoming calls on your mobile phone. Ten different ring tones are available from which to choose.

To Set Call Tone:
1. From the previous press of the Call/Enter/Setup button, the LCD will display the letter “C” and the current Call Tone number (01 through 10).
2. Press the Channel Up/Down button to select a different Call Tone. An example of each call tone will sound for 1.5 seconds.
3. Press Call/Enter/Setup button to save this entry and move to the next Setup mode programming.
Bluetooth® Mode Pairing and Programming

Bluetooth Radio On/Off
This setting allows you to turn On and Off the small Bluetooth radio inside this VHF radio. The default setting is ON. Turning it Off can save some power. It can easily be switched On at any time.

To Set Bluetooth On and Off:
1. Display will show the word blue and ON or OFF flashing.
2. Press Channel UP/Down button to select ON or OFF.
3. Press the Call/Enter/Setup button to save this entry.

You have now ended Bluetooth Setup mode programming and will enter Standby/Receive and Transmit programming.

Bluetooth Radio Off

Weather (WX) Mode Programming
Programming these features will allow your radio to listen to all NOAA Hazard Alert radio channels.
Start from WX Alert Standby mode to begin WX Alert Setup programming. Press and hold the Call/Enter/Setup button for two (2) seconds to enter the programming mode.

To Set WX Alert On or Off:
1. WX Alert mode is the first mode that begins WX Alert Setup programming.
2. Display will show WX Alert icon and ON or OFF flashing.
3. Press Channel Up/Down button to select ON or OFF.
4. Press the Call/Enter/Setup button to save this entry and move to the next setup programming mode.

To Set WX Auto Search (SCAN) On or Off:
1. Display will show Weather icon and SCAN icons, ON or OFF is flashing.
2. Press Channel Up/Down button to select ON or OFF.
3. Press the Call/Enter/Setup button to save entry.

You have now ended the WX Setup programming mode and will enter the WX Alert Standby mode.

NOTE
When WX Auto Search (SCAN) is set to On, weather channel scanning will start automatically and scan all available weather channels until the strongest channel is found. This will happen under the following conditions:

- WX Alert is engaged.
- Radio is in VHF Standby.
- WX received signal level falls below a preset level.
Standby/Receive and Transmit

Marine Standby and Receive (Rx) Mode

Marine Standby mode is the default mode for the radio whenever it is turned on. From this mode, you can change current settings by becoming familiar with the different key functions in Marine Standby mode. While in Marine Standby mode, the user will be able to transmit by pressing the Push to Talk (Talk) button. Signals in Receive (Rx) mode will be received on the selected channel(s), and alerts broadcast by NOAA will activate the corresponding NOAA weather alert channels in your radio.

NOTE

Coast Guard alerts are broadcast on Channel 16. You must have the WX Alert turned On to receive NOAA weather alerts. While in Marine Standby mode, you will receive any messages sent on the channel to which you are tuned.

Transmit (Tx) Mode

Transmit (Tx) mode gives you the ability to interact with safety services, other vessels and shore stations. When you use this capability, be sure to follow the procedures and to observe the courtesies that govern its use so everyone benefits. See Appendix to help you select the proper channels.

To Transmit a Message:

1. Check to see that your radio is set to a proper channel for the type of message you plan to send.
2. Toggle to the Low Power setting.
3. With the microphone about 2 in. [51 mm] from your mouth, press and hold the Talk button and speak into the microphone. The Transmit icon will appear on the LCD.
4. Release the Talk button when you are finished speaking.

Your radio can only operate in either Transmit (Tx) or Receive (Rx) mode at any given time. You will not hear the response to your message unless the Talk button is released. If the Battery Power icon begins blinking on the LCD when the Talk button is pressed, the radio will NOT transmit.

NOAA Weather Channels and Alert

Monitoring the weather will probably be a frequent use of your radio. NOAA provides continuous, around-the-clock broadcasts of the latest weather information. Taped weather messages run every four (4) to six (6) minutes and are revised every two (2) or three (3) hours, or as needed. The Coast Guard also announces weather and other safety warnings on Channel 16. Smart boaters keep an eye on safety and an ear to the radio — and never let the weather catch them unaware.

NOAA Emergency Weather Alert

In the event of a major storm or other weather condition requiring vessels at sea or on other bodies of water to be notified, NOAA broadcasts a 1050 Hz tone that receivers such as your Cobra® Marine VHF radio can detect and warn you of a weather alert condition. When the Weather Alert mode on your radio is On, this signal will produce a loud tone from the speaker in the radio and will automatically switch to the alerting weather channel so the alert broadcast can be heard.

NOAA Test Alert System

To test this system, NOAA broadcasts the 1050 Hz signal every Wednesday sometime between 11 a.m. and 1 p.m. in each local time zone. Any receiver that can detect the weather alert tone may use this service to verify that this system is functioning properly.
Weather (WX) Standby Mode
To enter the WX Standby mode, press and hold the WX/H-M-L button.

Receiving a Weather Alert
NOAA broadcasts weather information as described in the NOAA weather channels section on page 75 of this manual.
When NOAA broadcasts a weather alert signal and your radio is in WX Alert Standby mode, the following items will be displayed on the LCD display:
- The WX icon (cloud/sun) icon will be displayed.
- The last used weather channel will be displayed.
- The bar graph will display received signal strength level.
- The WX Alert icon (safety triangle) will be displayed.

**NOTE**
Only one (1) or two (2) of the weather channels will be operating in any given location [only in Receive (Rx) mode]. You will need to select the channel with the strongest signal in your location.

**NOTE**
When in the WX Alert mode, and NOAA sends the 1050 Hz alert tone, the radio will sound a series of loud beeps regardless of the volume control setting.

Channel 16/9 Mode
Channel 16/9 mode gives you quick access to calling on Channel 16 and Channel 9 from any operational mode.

To Switch to Channel 16 or Channel 9:
1. Press the Channel 16/9 button to change to Channel 16.
2. Press the Channel 16/9 button again to change to Channel 9.
3. Press the Channel 16/9 button a third time and return to the last used Standby channel.
Advanced Operation

Tri-Watch Mode
Tri-Watch mode gives you one (1) button access to scan a total of three (3) channels of most importance to you. Channel 16 is preprogrammed and will always be one (1) of the scanned locations. Two (2) other channels of your choice can be stored in the radio. These channels can be edited and/or recalled during future engagements of Tri-Watch mode.

NOTE
The radio must be squelched for Tri-Watch mode to function. See page 20 for Squelch procedure.

Tri-Watch Setup
To Program or Edit the Tri-Watch Channels:
1. Press and hold the TRI-WATCH button for two (2) seconds to activate Tri-Watch Setup mode. The TRI and MEM icons on the display will turn On.

NOTE
The main channel number will flash to indicate channel position. If there is no input activity for 15 seconds, the radio will sound two (2) beeps and return to Marine Standby mode.

2. Press Channel Up/Down button to select the desired Tri-Watch channel.
3. Press and release TRI-WATCH button or Call/Enter/Setup button to confirm entry.
4. Repeat steps 2 and 3 to program the remaining additional Tri-Watch memory channel.
5. After programming both Tri-Watch memory channels the radio will immediately engage Tri-Watch mode.

Using Tri-Watch
Tri-Watch Scan Mode:
1. From Marine Standby mode, press the TRI-WATCH button. The TRI icon will appear on the LCD display and the radio will scan through the three (3) Tri-Watch memory channels.
2. A signal on any one (1) of the three (3) channels will stop the scan for 10 seconds to allow you to listen to the traffic on that location.

NOTE
After the Tri-Watch scan stops to monitor a channel, as long as you do not press any buttons within 10 seconds, your radio will automatically resume scanning the Tri-Watch channels.
3. Press the Channel Up/Down button to resume scanning the Tri-Watch channels or to change the scan direction.
4. To EXIT the Tri-Watch scan, press the TRI-WATCH button again. The TRI icon will disappear from the LCD and the radio will return to Marine Standby mode.
Advanced Operation

Memory Location Mode
Your radio has unlimited memory locations for storing your most frequently used channels. These memory locations can be selected individually or can be scanned. (See page 37 under Memory Location Scan.)
To enter Memory mode, press MEM/ESC button. The display will show the MEM icon and the Memory Channel bank will be activated and displayed.

To Program Memory Locations:
1. Press and hold the MEM/ESC button for two (2) seconds. The memory location number will start flashing and the MEM icon will be turned On.
2. Use the Channel Up/Down button to advance to the memory location (00-99) you want to program.
3. Press the MEM/ESC button to select the memory location. The memory channel number will stop flashing and the channel number will start flashing.
4. Use the Channel Up/Down button to change to the channel you want to store into the selected memory location.
5. Press the MEM/ESC button to program that channel. The memory location number will flash again.
Repeat steps 2 through 5 to program as many additional memories as you want.
6. Press and hold the MEM/ESC button for two (2) seconds. This will return the radio to Memory mode.
7. Press and release the MEM/ESC button again to return to Marine Standby mode.

To Recall a Stored Memory Location:
1. Press the MEM/ESC button. The MEM icon will be turned On.
2. Press the Channel Up/Down button to select the memory location. If a memory location has been programmed, its associated channel will display on the LCD. Your radio is now in Marine Standby mode on the selected memory location.

To Exit Memory Location Mode:
Press the MEM/ESC button to return the radio to Marine Standby mode. The last channel used in Marine Standby mode will now be displayed on the LCD and the MEM icon will disappear.

To Erase Stored Memory Locations:
1. Press and hold the MEM/ESC button for two (2) seconds. The memory location number will start flashing and the MEM icon will be turned On.
2. Use the Channel Up/Down button to advance to the memory location you want to erase.
3. Press the MEM/ESC button to select the memory location. The memory channel number will stop flashing and the channel number will start flashing.
4. Use the Channel Up/Down button to change to the channel to read “00” at the selected memory location.
5. Press the MEM/ESC button to erase that channel. The memory location number will flash again.
Repeat steps 2 through 5 to erase as many additional memories as you want.
6. Press and hold the MEM/ESC button for two (2) seconds. This will return the radio to Memory mode.
7. Press and release the MEM/ESC button again to return to Marine Standby mode.
Advanced Operation

Channel Scan Mode
During Channel Scan mode, the radio will rapidly switch from channel to channel through all the channels.

NOTE
The radio must be squelched for Channel Scan mode to function. See page 20 for Squelch procedure.

To Enter Channel Scan:
1. From Marine Standby mode, press the SCAN button. The radio will immediately begin to scan the entire channel map selected in the active channel map. The SCAN icon will show on the LCD.
2. A signal on any channel will stop the scan for 10 seconds to allow you to listen to the traffic on that location.
3. Press the Channel Up/Down button to resume scanning the Channel Scan channels or to change the scan direction.
4. To EXIT Channel Scan mode, press the SCAN button again. The SCAN icon will disappear from the LCD and the radio will return to Marine Standby mode.

Memory Location Scan Mode
During Memory Location Scan mode, the radio will rapidly scan through all pre-assigned memory channels.

NOTE
The radio must be squelched for Memory Location Scan mode to function. See page 20 for Squelch procedure.

NOTE
If there are fewer than two (2) memory locations programmed in the radio, the Memory Location Scan option will not be available. To program at least two (2) memory locations, see page 34.

To Enter Memory Location Scan:
1. From Marine Standby mode, press the MEM/ESC button.
2. Press the SCAN button. The radio will immediately begin to scan all pre-assigned memory channels. The SCAN and MEM icons will show on the LCD.
3. A signal on any channel will stop the scan for 10 seconds to allow you to listen to the traffic on that location.
4. Press the Channel Up/Down button to resume scanning the Memory Location Scan channels or to change the scan direction.
5. To EXIT Memory Location Scan mode, press the SCAN button again. The SCAN and MEM icons will disappear from the LCD and the radio will return to Marine Standby mode.
Rewind Operation

Rewind-Say-Again™ Feature

Use the Cobra exclusive Rewind-Say-Again™ feature to replay or record the last 20 seconds of an incoming audio transmission.

**Example 1:**
When engine noise, music or conversation creates too much noise to hear an inbound message clearly, press the REW button to hear the message a second time.

**Example 2:**
When listening to an urgent distress message of an excited caller with confusing background noise, press the REW button to hear the message a second time and get life saving information. Use this feature to record call details including position coordinates, call signs, registration numbers and store details that will help authorities locate the distressed vessel.

**NOTE**
Hold the Rewind button to turn the recording mode Off and save the currently recorded transmission.

**Using Rewind-Say-Again™:**
1. During audio transmission, press REW button to listen to 20 seconds of the last recorded audio transmission. The REW icon will flash during the playing back of the message and a 20-second countdown begins.
2. Press the TALK, REW or MEM/ESC button during playback to stop the playback transmission. The radio returns to Marine mode.

**Using Rewind-Say-Again™ to Record Audio Transmission:**
1. Press and hold SCAN button for two (2) seconds to enter Record mode.
2. Press and hold TALK button to begin recording from radio microphone. If TALK button is released, recording stops. While recording, a 20-second countdown begins on display. When 20-second countdown time has ended, recording stops and two (2) beep tones will be heard.
3. Press and hold SCAN button again for two (2) seconds or press MEM/ESC button to cancel recording and return to last operation.

**NOTE**
When using radio in Record mode, the REW feature is turned Off to prevent “recording over” previous message.
Mobile Phone Operation with Bluetooth®

NOTES
Please refer to the Bluetooth Mode Pairing and Programming section on page 23 for instructions on how to pair your mobile phone with this device, change ring tones, etc. The following section covers how to complete a phone call and other basic operations.

Answering Incoming Phone Calls
This handheld radio, once properly paired to your Bluetooth® compatible mobile phone, can answer incoming calls received on your mobile phone. It can act as the speaker and microphone, while your mobile phone stays safe and dry. It will also improve audio quality on both ends of the conversation.

To Answer and End an Incoming Call:
1. The speaker on the HH475 will ring. The display will change and show the word “AnSEr” as shown.
2. Press and release the Bluetooth® button on the MR HH475BT front panel. After the call is answered, the LCD will switch to “Connct” as illustrated.
3. Begin conversation with the caller by pressing the PTT (Push to Talk) key and speaking into the small microphone above the LCD. This is very similar to a standard radio operation and it completely eliminates all background noise when you are not speaking.

NOTE
To enable hands free conversation or “VOX” mode (pressing in the PTT key not required), use the Channel Up and Channel Down keys anytime when in Bluetooth® mode. The “VOX” icon will turn on when VOX mode is enabled.

The Bluetooth® “VOX” setting does NOT reset to Off after a power cycle unlike the normal VOX associated with VHF mode.

4. To end a call, press and release the Bluetooth® button. The HH475 will then return to previous Standby mode and resume normal operation.

Initiate a Phone Call
There are several ways to initiate a call. These include; initiating (as normal) from the mobile phone, using voice dialing and last number redial.

To Initiate from the Mobile Phone
1. Simply dial a number on your mobile phone. (See manufacturer’s instructions for making a call.) When the phone’s Send key is pressed, the HH475 will respond by changing over to Bluetooth® mode and displaying “diaLng” as illustrated.
2. You will see “Connct” when the receiving party, or their voice mail, answers.
3. To end a call, press and release the Bluetooth® button. The HH475 will then return to previous Standby mode and resume normal operation.
Using Voice Dial
This feature allows you to use your voice to dial a contact from the contact list on your mobile phone.

**NOTE**
Voice dialing is an advanced function and may not be supported by all phones. Cobra suggests you set it up and become familiar with it on your mobile phone before you attempt using it in conjunction with the HH475 or another Bluetooth device.

This is an advanced function and not all mobile phone combinations will be successful. Some allow you to set pre-recorded contacts. Some advanced phones have active voice recognition and match your mobile phone’s contact list.

**To Initiate a Voice Dial Call:**
1. Press and release the Bluetooth button to get into the Bluetooth Standby mode.
2. Press and release the Bluetooth button twice (2x) from Bluetooth Standby mode. This will initiate the voice dial feature on the paired mobile phone.
3. You will hear a beep or audio command from the phone. Press and hold the PTT (Push to Talk) button and speak the name into the HH475.
4. The mobile phone will begin to dial the contact it “recognizes.” The call will be complete through the speaker and microphone of the HH475. You will see the “diaLng” and “Connct” screens as the call is completed.
5. Hang up by pressing the Bluetooth button when you complete your call.

Connecting a Voice Dial Call

Last Number Redial
This feature allows you to redial the last number stored in the mobile phone’s internal Call Log. This feature is supported by most mobile phones.

**To Initiate a Last Number Redial:**
1. Press and release the Bluetooth button to get into the Bluetooth Standby mode.
2. From Bluetooth Standby, press and hold the Bluetooth button for two (2) seconds [until the radio beeps two (2) times].
3. The paired mobile phone will redial the last number. The call will be complete through the speaker and microphone of the HH475.
4. Hang up by pressing the Bluetooth button when you complete your call.

**To End Pairing (At the End of the Day)**
You might not want to take your calls through this VHF radio once you are back at the dock or in a dry location. See the instructions in the Bluetooth Mode Programming section on page 23 for instructions on how to Turn OFF the Bluetooth function of the HH475. The “p” will disappear from the Bluetooth Standby screen.

**NOTE**
If switched to OFF setting, then the HH475 will not reconnect with mobile phone on power up. It must be turned back ON again from the Bluetooth Programming mode.
General Bluetooth Operation and Frequently Asked Questions

- **What is the Industry Standard Range for Bluetooth® Wireless Technology?**
  The industry standard range for Bluetooth wireless technology is 30 feet (10 meters). The HH475 will lose its pairing with the mobile phone if the mobile phone and the HH475 are separated further than this. The HH475 will automatically re-connect with cell phone when user comes back into range.

- **How many phones can the HH475 pair with?**
  The HH475 can only pair with one mobile phone at a time. This is the standard operation for any Bluetooth headset or in-car Bluetooth system.

- **Do I need to have my mobile phone with me?**
  Yes, the phone call is actually completed through your mobile phone and your mobile phone operator/carrier. The mobile phone must be within the 30 feet (10 meters) range of the HH475. The HH475 does not increase the offshore range of your mobile phone.

- **Can I use a standard Bluetooth® headset with this radio?**
  No, the HH475 is using the headset profile of the Bluetooth specification to pair with your mobile phone. It can not pair to another Bluetooth headset.

- **Can I use this unit as a speakerphone or hands-free device?**
  Turning on VOX allows you to use the radio without pressing the PTT (Push to Talk) button. The radio will still need to be operated in a face held position with the microphone close to the mouth. This radio uses a noise cancelling microphone, and it will not operate well from the belt clip or another hands-free position.

- **Please make sure to note your VOX setting.**
  If VOX is set to On, then the receiving caller might hear conversation and noise in your background. This setting is retained in memory. If switched On, then it will be On the next time the radio is switched On and paired.

- **Can I use my mobile phone for emergency use?**
  No, Cobra does not endorse cellular telephones as a substitute for marine radios. They generally cannot communicate with rescue vessels and, if you make a distress call on your cellular telephone, only the party you call will be able to hear you.
  Additionally, cellular telephones may have limited coverage over water. If you do not know where you are, the Coast Guard will have difficulty finding you if you are using your cellular telephone. However, cellular telephones can have a place onboard where cellular coverage is available – to allow social conversations and keep the marine frequencies uncluttered and available for their intended use.
Floating Feature

**BURP Feature**

Cobra’s BURP feature allows the operator to expel water from inside the speaker grill. This is especially useful if the radio is dropped overboard or during extreme foul weather conditions. In these conditions, water can become trapped in the speaker grill and muffle the audio.

**To Activate BURP:**

1. Press and release the 16 and SCAN keys at the same time.
2. The BURP tone(s) at maximum level will sound from the internal speaker for eight seconds.
3. During this time, the LCD will display the following “burp” as shown to the left.
4. Hold the radio with the speaker grill down to help the water drain out.
5. Press the ESC key at any time to cancel the BURP feature.

**Floating Radio**

This radio is designed to float if dropped overboard. The orange center makes it visible and easy to retrieve. This rugged radio is also designed to meet JIS7 (IPX7) specifications. This means it’s designed to operate properly after being submerged in one meter deep water for 30 minutes.

**NOTE**

Do not leave the radio floating in water permanently. This could cause premature corrosion of the battery contacts and other damage.

The radio is only designed to float with its included Lithium-ion battery. Using other approved batteries might cause the radio to sink. This also applies to the AA battery tray included, depending on the weight of the AA batteries used.

---

Maintenance and Troubleshooting

**Maintenance**

Very little maintenance is required to keep your CobraMarine VHF radio in good operating condition:

- Keep the radio and charger clean by wiping with a soft cloth and mild detergent. Do not use solvents or harsh or abrasive cleaners, which could damage the case or scratch the LCD screen.
- If the radio is exposed to salt water, wipe with a soft, moist cloth at least once a day to prevent buildup of salt deposits, which could interfere with button operation.
- If the radio will be stored for a long period, such as over the winter, remove the batteries from the battery tray and store them in a separate package. This is especially important if you are using alkaline batteries.

**Troubleshooting**

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause(s)</th>
<th>Solution(s)</th>

</table>
**VHF Marine Radio Procedures**

**Maintain Your Watch**
Whenever your boat is underway, the radio must be turned On and be tuned to Channel 16 except when being used for messages.

**Power**
Try 1 watt first, if the station being called is within a few miles. If there is no answer, switch to 3 watts and call again. You have the ability to go up to 6 watts of output power to increase your calling distance. Remember, the lower wattage outputs will conserve your battery and minimize interference to other users.

**Calling Coast Stations**
Call a coast station on its assigned channel. You may use Channel 16 when you do not know the assigned channel.

**Calling Other Vessels**
Call other vessels on Channel 16 or on Channel 9. (Channel 9 is preferred for recreational vessel use.) You may also call on ship-to-ship channels when you know that the vessel is listening on a ship-to-ship channel.

**Initial Calling on Channel 16 or 9**
The use of Channel 16 is permitted for making initial contact (hailing) another vessel. The limits on calling must be followed. Be reminded, Channel 16’s most important function is for Emergency Messages. If for some reason, Channel 16 is congested, the use of Channel 9, especially in U.S. waters, may be used as the initial contact (hailing) channel for non-emergency communication.

**Limits on Calling**
You must not call the same station for more than 30 seconds at a time. If you do not get a reply, wait at least two (2) minutes before calling again. After three (3) calling periods, wait at least 15 minutes before calling again.

**Change Channels**
After contacting another station on a calling channel, change immediately to a channel which is available for the type of message you want to send.

**Station Identification**
Identify, in English, your station by your FCC call sign, vessel name and the state registration number, at both the beginning and at the end of the message.

---

**Prohibited Communications**
You **MUST NOT** transmit:
- False distress or emergency messages.
- Messages containing obscene, indecent or profane language.
- General calls, signals or messages (messages not addressed to a particular station) on Channel 16, except in an emergency or if you are testing your radio.
- When you are on land.
Voice Calling

You are required to listen to Channel 16 while standing by. Channel 16 is the distress and safety channel used for establishing initial contact with another station and for emergency communication. The Coast Guard also monitors Channel 16 for safety purposes for everyone on the water.

NOTE

Channel 9 may be used by recreational vessels for general-purpose calling. This frequency should be used whenever possible to help relieve congestion on Channel 16. The Coast Guard generally does not make urgent marine information broadcasts or weather warnings on Channel 9. Boaters are still asked to “keep watch” on Channel 16 whenever the radio is turned on and not in use with another station.

To call another vessel or shore installation (e.g., lock or bridge tender):

- Make sure the radio is On.
- Make sure you are in standby listening mode on Channel 16. Make sure Channel 16 is not in use.
- When the channel is open (quiet), press the Talk button and call a vessel. Hold the radio or microphone several inches from your face and speak clearly and distinctly in a normal voice tone. Say “name or station being called,” “THIS IS [your vessel name or call sign].”
- Once contact is made, you must leave Channel 16 and go to another working channel. See channel listing on pages 60–74.

For Example

The vessel Corsair is calling the vessel Vagabond:

Corsair: “Vagabond, this is Corsair. Over.”

Vagabond: “Please switch and answer on Channel 68 (or any proper working channel). Over.”

Corsair: “Switching to Channel 68. Over.”

Voice Calling

- If the other does not respond, wait two (2) minutes and repeat. You are permitted to attempt contact three (3) times, two (2) minutes apart. If you still have not made contact, wait 15 minutes before trying again.
- After communications are completed, each vessel must sign off with its call sign or vessel name and the word “out” and return to Channel 16.

NOTE

For best sound quality at the station you are calling, hold the microphone on the front of the radio at least 2 in. (51 mm) from your mouth and slightly off to one (1) side. Speak in a normal tone of voice.

NOTE

“Over and Out”
The most commonly misused procedure words are “over and out” within the same transmission. “Over” means you expect a reply. “Out” means you are finished and do not expect a reply.
Radiotelephone Calls

Boaters may make and receive radiotelephone calls to and from any number on the telephone network by using the services of public coast stations. Calls can be made — for a fee — between your radio and telephones on land, sea and in the air. See the Appendix for the public correspondence (marine operator) channels.

If you plan to use these services, consider registering with the operator of the public coast station that you plan to work through. These services can provide you with detailed information and procedures to follow.

**NOTICE**

You may disclose privileged information during a radiotelephone call. Keep in mind that your transmission is **NOT** private, as it is on a regular telephone. Both sides of the conversation are being broadcast and can be heard by anyone who has a radio and tunes to the channel you are using.

Emergency Messages and Distress Procedure

The ability to summon assistance in an emergency is the primary reason to have a VHF marine radio. The marine environment can be unforgiving, and what may initially be a minor problem can rapidly develop into a situation beyond your control.

The Coast Guard monitors Channel 16, responds to all distress calls, and coordinates all search and rescue efforts. Depending on the availability of other capable vessels or commercial assistance operators in your vicinity, Coast Guard or Coast Guard Auxiliary craft may be dispatched.

In any event, communicate with the Coast Guard as soon as you experience difficulties and before your situation becomes an emergency. Use the emergency message procedures only after your situation has become grave or you are faced with a sudden danger threatening life or property and requiring immediate help. Use Channel 16 to communicate your emergency message. Make sure you transmit on high power. If you are merely out of gas, do not send an emergency message. Drop your anchor and call a friend or marina to bring the fuel you need or to give you a tow.
Emergency Messages and Distress Procedure

Marine Emergency Signals
The three (3) spoken international emergency signals are:

- **MAYDAY**: The distress signal MAYDAY is used to indicate that a station is threatened by grave and imminent danger and requests immediate assistance.

- **PAN**: The urgency signal PAN is used when the safety of the vessel or person is in jeopardy. (This signal is properly pronounced pahn.)

- **SECURITE**: The safety signal SECURITE is used for messages about the safety of navigation or important weather warnings. (This signal is properly pronounced see-cure-ee-tay.)

When using an international emergency signal, the appropriate signal is to be spoken three (3) times prior to the message.

If You Hear a Distress Call
You must give any message beginning with one (1) of these signals priority over any other messages. ALL stations MUST remain silent on Channel 16 for the duration of the emergency unless the message relates directly to the emergency.

If you hear a distress message from a vessel, stand by your radio. If it is not answered, YOU should answer. If the distressed vessel is not nearby, wait a short time for others who may be closer to acknowledge. Even if you cannot render direct assistance, you may be in a position to relay the message.

Marine Distress Procedure
Speak slowly — clearly — calmly.

1. Make sure your radio is On.
2. Select Channel 16.
3. Press Talk button and say:
   “MAYDAY — MAYDAY — MAYDAY.”
   (Or “PAN — PAN — PAN,”
   or “SECURITE — SECURITE — SECURITE.”)
4. Say:
   “THIS IS [your vessel name or call sign],” repeated three (3) times.
5. Say:
   “MAYDAY (or “PAN” or “SECURITE”) [your vessel name or call sign].
6. Tell where you are:
   (what navigational aids or landmarks are nearby).
7. State the nature of your distress.
8. State the kind of assistance needed.
9. Give number of persons aboard and conditions of any injured.
10. Estimate present seaworthiness of your vessel.
11. Briefly describe your vessel (length, type, color, hull).
12. Say:
   “I WILL BE LISTENING ON CHANNEL 16.”
13. End message by saying:
   “THIS IS [your vessel name or call sign]. OVER.”
14. Release Talk button and listen. Someone should answer.
   If not, repeat the call, beginning at step 3 above.

Keep the radio nearby. Even after your message has been received, the Coast Guard can find you more quickly if you can transmit a signal for a rescue boat to hone in on.
Emergency Messages and Distress Procedure

For Example

“Mayday — Mayday — Mayday”
“This is Corsair — Corsair — Corsair” [or “IL 1234 AB,” repeated three (3) times]
“Mayday Corsair (or IL 1234 AB)”
“Navy Pier bears 220 degrees magnetic — distance 5 miles”
“Struck submerged object and flooding — need pump and tow”
“Four (4) adults, three (3) children aboard — no one injured”
“Estimate we will remain afloat one-half hour”
“Corsair (or IL 1234 AB) is 26 ft sloop with blue hull and tan deck house”
“I will be listening on Channel 16”
“This is Corsair (or IL 1234 AB)”
“Over”

It is a good idea to write out a script of the message form and post it where you and others on your vessel can see it when an emergency message needs to be sent.

Limited 3-Year Warranty
For Products Purchased In The U.S.A.

Cobra Electronics Corporation warrants that its CobraMarine VHF radio, and the component parts thereof, will be free of defects in workmanship and materials for a period of three (3) years from the date of first consumer purchase. This warranty may be enforced by the first consumer purchaser, provided that the product is utilized within the U.S.A.

Cobra will, without charge, repair or replace, at its option, defective radios, products or component parts upon delivery to the Cobra Factory Service department, accompanied by proof of the date of first consumer purchase, such as a duplicated copy of a sales receipt.

You must pay any initial shipping charges required to ship the product for warranty service, but the return charges will be at Cobra's expense, if the product is repaired or replaced under warranty. This warranty gives you specific legal rights, and you may also have other rights which may vary from state to state.

Exclusions: This limited warranty does not apply:
1. To any product damaged by accident.
2. In the event of misuse or abuse of the product, or as a result of unauthorized alterations or repairs.
3. If the serial number has been altered, defaced, or removed.
4. If the owner of the product resides outside the U.S.A.

All implied warranties, including warranties of merchantability and fitness for a particular purpose are limited in duration to the length of this warranty. Cobra shall not be liable for any incidental, consequential or other damages; including, without limitation, damages resulting from loss of use or cost of installation. Some states do not allow limitations on how long an implied warranty lasts and/or do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations may not apply to you.

For Products Purchased Outside The U.S.A.

Please contact your local dealer for warranty information.

**VHF Marine Channel Assignments**

Three (3) sets of VHF channels have been established for marine use in the U.S.A., Canada and the rest of the world (International). Most of the channels are the same for all three (3) maps, but there are definite differences (see table on the following pages). Your radio has all three (3) maps built into it and will operate correctly in whichever area you choose.

The following is a brief outline of the channel assignments in the U.S.A. Channel Map.

<table>
<thead>
<tr>
<th>Channel Assignments (English)</th>

VHF Marine Channel Assignments

Channel Assignments (English)

Public Correspondence (Marine Operator)
Channels 24, 25, 26, 27, 28, 60, 61, 84, 84A, 85, 85A, 86, 86A, 87, 87A, 88*
For calls to marine operators at public coast stations. You can make and receive telephone calls through these stations.

Port Operations
Channels 1A*, 5A*, 12*, 14*, 18, 19, 20A, 21, 22, 63A*, 65A, 66A, 73, 74, 75, 76, 77*, 79, 80, 81, 82
Used for directing the movement of ships in or near ports, locks or waterways. Messages must be about operational handling, movement and safety of ships.

Navigational
Channels 13, 67
Channels are available to all vessels. Messages must be about navigation, including passing or meeting other vessels. These are also the main working channels for most locks and drawbridges. You must keep your messages short and power output at no more than 1 watt.

Maritime Control
Channel 17
For talking to vessels and coast stations operated by state or local governments. Messages must be about regulation and control, boating activities, or assistance.

Digital Selective Calling
Channel 70
This channel is set aside for distress, safety and general calling using only digital selective calling techniques. Voice communication is prohibited; your radio cannot transmit voice messages on this channel.

Weather
Channels Wx 1 Thru 10
Receive-only channels for NOAA and Canadian weather broadcasts. You cannot transmit on these channels.

NOTE * These channels are restricted to the listed uses in certain parts of the country or for certain types of users only. Consult FCC rules or a knowledgeable radio operator before using them.

Asignaciones de canales (Español)

Correspondencia pública (operador marítimo)
Canales 24, 25, 26, 27, 28, 60, 61, 84, 84A, 85, 85A, 86, 86A, 87, 87A, 88*
Para llamadas a operadores marítimos en estaciones costeras públicas. Usted puede realizar y recibir llamadas telefónicas a través de estas estaciones.

Operaciones portuarias
Canales 1A*, 5A*, 12*, 14*, 18, 19, 20A, 21, 22, 63A*, 65A, 66A, 73, 74, 75, 76, 77*, 79, 80, 81, 82
Usados para dirigir el movimiento de las embarcaciones dentro de áreas portuarias, esclusas o canales. Los mensajes deberán estar relacionados con maniobras operacionales, movimientos y seguridad de las embarcaciones.

Navegación
Canales 13, 67
Estos canales están disponibles para todas las embarcaciones. Los mensajes deberán estar relacionados con la navegación, incluidas las maniobras para pasar o alcanzar otras embarcaciones. Estos también son los principales canales activos para la mayoría de las esclusas y puentes levadizos. Usted deberá transmitir mensajes cortos y mantener la potencia de salida en un vatio como máximo.

Control marítimo
Canal 17
Para comunicarse con embarcaciones y estaciones costeras operadas por entidades gubernamentales locales o estatales. Los mensajes deberán estar relacionados con regulación y control, asistencia o actividades de navegación.

Llamadas selectivas digitales
Canal 70
Este canal está reservado para solicitudes de auxilio, seguridad y llamadas de carácter general que usen solamente técnicas de llamadas selectivas digitales. Las comunicaciones verbales están prohibidas; el radio no puede transmitir mensajes de voz por este canal.

Meteorología
Canales Wx 1 a 10
Canales de recepción únicamente para difusión de información meteorológica NOAA y canadiense. Usted no puede transmitir por estos canales.

NOTA * El uso de estos canales está dedicado a las aplicaciones que aparecen en la lista, en ciertas partes del país o para ciertos tipos de usuario solamente. Consulte las normas de la FCC o a un operador de radio con experiencia antes de usarlos.

- Correspondencia pública (entre embarcación y costa). En los EE.UU., solamente dentro de los casi 121 kilómetros (75 millas) de la frontera canadiense
- Comercial entre embarcaciones solamente

**Power Limits (Español)**

- Límites de potencia
NOTE
Many of the plain-numbered channels, such as 01, 02 and 03, transmit and receive on different frequencies. This is termed duplex operation. The rest of the plain-numbered channels and all of the A channels, such as 01A, 03A and 04A, transmit and receive on a single frequency, which is termed simplex operation. Your radio automatically adjusts to these conditions. When in simplex operation, the A icon will appear on the LCD (see illustration on page A3).

NOTE
All channels are preprogrammed at the factory according to international regulations and those of the FCC (U.S.A.) and Industry Canada (Canada). They cannot be altered by the user nor can modes of operation be changed between simplex and duplex.

Asignación de canales de VHF para radiocomunicación marítima (Español)

NOTA
Muchos de los canales de números simples, como 01, 02 y 03, transmiten y reciben en diferentes frecuencias. A esto se le llama operación dúplex. El resto de los canales de números simples y todos los canales A, como 01A, 03A y 04A, transmiten y reciben en una sola frecuencia, a la que se le llama operación simple (simplex). Su radio se ajusta automáticamente a estas condiciones. Cuando esté en operación simple, el icono A aparecerá en la pantalla de cristal líquido (vea la ilustración de la página A3).

NOTA
Todos los canales vienen programados previamente de fábrica conforme a los reglamentos internacionales y a los de la FCC (EE. UU) e Industry Canada (Canadá). No pueden ser alterados por el usuario, así como tampoco pueden cambiarse los modos de operación entre simple y dúplex.
Accessories

Your Cobra radio has several optional accessories available to enhance the use of the radio. Some are listed below:

Lapel Speaker/Microphone
A speaker/microphone, that attaches to your lapel, by ordering P/N CM 330-001. This unique accessory allows you to wear the radio on your belt while still being able to communicate with other vessels. A small Push to Talk (PTT) button on the lapel speaker/microphone allows you to answer any incoming call.

Long Life Battery
A long life replacement battery. P/N CM 110-010.
1900 mAh LiON replacement battery. Can be used with the charger included with this radio. The radio will NOT float with this battery attached.
