Our Thanks to You and Customer Assistance

Thank you for purchasing a Cobra Marine® VHF radio. Properly used, this Cobra® product will give you many years of reliable service.

How Your Cobra Marine VHF Radio Works

This radio is a battery-powered portable transceiver for use on vessels. It gives you two-way vessel-to-vessel and vessel-to-shore station communications, primarily for safety and secondarily for navigation and operational purposes. With it, you can call for help, get information from other boaters, talk to lock or bridge tenders, and make radiotelephone calls to anywhere in the world through a marine operator.

Besides two-way communications, the radio can provide quick access to receive all the NOAA (National Oceanographic and Atmospheric Administration) weather channels and alert you to weather emergencies with a tone on a weather channel you can select for your area.

Customer Assistance

Should you encounter any problems with this product, or not understand its many features, please refer to this owner’s manual. If you require further assistance after reading this manual, Cobra Electronics offers the following customer assistance services:

For Assistance In The U.S.A.

Monday-Friday 9:00 AM - 5:00 PM EST

Call: 800-543-1608

SERVICE

Monday-Thursday 9:00AM-5:00PM EST

Call: 800-543-1608

Office:

6500 West Cortland Street,

Chicago, IL, 60707

Have questions? We can help. Contact us at 800-543-1608 M-F 9:00AM-5PM EST

For Assistance Outside the U.S.A.

**Product Features**

**Power Settings**
- Selectable power settings produce 1, 3 or 6 watts of output power for near or distant calling.

**USA/International/Canada Channels**
- Allows operation on any of the three (3) different channel maps established for these areas.

**All NOAA Weather Channels**
- Instant access to all National Weather Channels, 24 hours a day.

**Submersible to JIS7 Standards**
- Waterproof to 3.3 ft (1 m) of water for 30 minutes.

**Button/Key Lock**
- Prevents accidental setting changes when button lock is set.

**Channel Scan/Memory Scan**
- Use to scan through unlimited channels or memory locations to find conversations in progress.

**Matrix Display**
- The display at the bottom of the LCD screen displays text letting the user know the current radio mode, function or operation.

**AA Battery Compatible**
- Good for emergency backup. Includes AA battery tray (P/N CM 110-024).

**Instant Channel 16/9**
- Provides instant access to priority Channel 16 and calling Channel 9.

**Tri-Watch**
- Use to monitor three (3) channels at once — Channel 16 and two (2) programmable channels.

**Floating**
- The radio will float if dropped overboard. It has an orange stripe so it’s easy to retrieve. Must use included battery to float.

**120V/12V Charger Included**
- Use to charge battery pack, at home, in a car or in a boat.

**Product Features (continued)**

**MicroBlue™**
- Bluetooth® Wireless Technology in a unique noise canceling design. Widely compatible for all mobile phones with Bluetooth® wireless technology.

**Rewind-Say-Again®**
- Replays missed VHF calls.

**Locking Desktop Charger**
- Holds the radio or battery in place while charging. Vertical or horizontal mounting.

**Call Tones (Selectable)**
- 10 selectable call tones.

**Emergency Weather Alert**
- Receive NOAA alerts when threatening weather is nearby.

**Speaker/Mic Jack**
- Allows connecting optional Cobra Lapel Speaker/Mic and other Cobra accessories.

**Unlimited Memory Channels**
- Allows programming of unlimited VHF memory channels.

**Signal Strength Meter**
- Shows the strength of incoming or outgoing signals.

**Easy Redial Operation**
- Redial of last phone number dialed.

**Voice Dialing**
- Supports standard mobile phone voice dialing when paired to a compatible mobile phone.

**Noise Canceling Microphone**
- Reduces effect of environmental noise when speaking.

**Illuminated Buttons**
- Allows high visibility of all function buttons.

**Roger Beep Tone (Selectable)**
- Confirmation tone indicates the completion of the user’s transmission and signals to others it is clear to talk. On or Off selectable.

**BURP**
- The Cobra exclusive BURP feature expels water from the speaker grill if the unit is dropped in the water or is subjected to extreme rain and weather.

Nothing Comes Close to a Cobra®
Important Safety Information

Before installing and using your Cobra Marine VHF radio, please read these general precautions and warnings.

Warning and Notice Statements

To make the most of this radio, it must be installed and used properly. Please read the installation and operating instructions carefully before installing and using the radio. Special attention must be paid to the WARNING and NOTICE statements in this manual.

WARNING

Statements identify conditions that could result in personal injury or loss of life.

NOTICE

Statements identify conditions that could cause damage to the radio or other equipment.

Safety Training Information

This Cobra Marine VHF radio complies with the following guidelines and standards regarding RF energy and electromagnetic energy levels as well as evaluation of those levels for human exposure:

Conformité d’exposition de la fréquence du Canada RSS-102-Radio d’industrie (rf) de l’appareillage de communication par radio (toutes les bandes de fréquence).

General Precautions

The following WARNINGS and NOTICE information will make you aware of RF exposure hazards and how to assure you operate the radio within the FCC RF exposure limits established for the radio.

WARNINGS

Your radio generates electromagnetic RF (radio frequency) energy when it is transmitting. To ensure that you and those around you are not exposed to excessive amounts of that energy, DO NOT touch the antenna when transmitting. KEEP the radio at least two (2) inches (5 cm) away from yourself and others when transmitting.

DO NOT operate with more than a duty cycle of 5% transmit, 5% receive and 90% standby. The radio is transmitting when the Talk button is pressed and the transmit information shows on the LCD screen.

ALWAYS use only Cobra authorized accessories.

DO NOT operate the radio in an explosive atmosphere, near blasting sites, or in any area where signs are posted prohibiting radio transmissions.

NEVER place the transceiver or microphone/speaker where they might interfere with operation of your vessel or cause injury.

DO NOT allow children or anyone unfamiliar with proper procedures to operate the radio without supervision.

Failure to observe any of these warnings may cause you to exceed FCC RF exposure limits or create other dangerous conditions.

Industry Canada Antenna Notice

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

Avis d’antenne du Canada d’industrie

En vertu de la réglementation de l’industrie du Canada, cet émetteur de radio ne peut fonctionner à l’aide d’une antenne d’un type et un maximum (ou moins) Gain approuvé pour l’émetteur par Industrie Canada. Pour réduire le risque d’interférence aux autres utilisateurs, le type d’antenne et son gain doivent être choisis afin que la puissance isotrope rayonnée équivalente (PIRE) ne dépasse pas ce qui est nécessaire pour une communication réussie.
**General Precautions**

**NOTICE**
Your radio is waterproof only when the batteries are properly installed.

**AVOID** using or storing the radio at temperatures below -4°F (-20°C) or above 140°F (60°C).

**KEEP** your radio at least 3 ft (0.9 m) away from your vessel’s magnetic navigation compass.

**DO NOT** attempt to service any internal parts yourself. Have any necessary service performed by a qualified technician.

This radio is supplied with a lithium-ion (LiION) rechargeable battery pack.
- Use only the Cobra charger to recharge lithium-ion (LiION) batteries in the radio.
- Do not short circuit the battery pack.
- When replacing the batteries, dispose of the old batteries properly. Batteries may explode if disposed of in a fire.

Changes or modifications to your radio MAY VOID its compliance with FCC (Federal Communications Commission) rules and make it illegal to use.

**Recommendations for Marine Communication**

The frequencies your radio uses are set aside to enhance safety afloat and for vessel navigation and operational messages over a range suitable for nearshore voyages. If the 6 watt maximum output of your radio is not sufficient for the distances you travel from the coast, consider a higher powered handheld or installing a Cobra Marine fixed mount radio with up to 25 watts of output power. (Visit www.cobra.com or your local dealer for model availability.)

If traveling far offshore, you should consider adding even more powerful radio equipment such as HF single side band or satellite radio for your vessel.

The U.S. Coast Guard does not endorse cellular telephones as substitutes for marine radios. They generally cannot communicate with rescue vessels and, if you make a distress call on a cellular telephone, only the party you call will be able to hear you. Additionally, cellular telephones may have limited coverage over water and can be hard to locate. If you do not know where you are, the Coast Guard will have difficulty finding you if you are using a cellular telephone.

However, cellular telephones can have a place on board where cellular coverage is available — to allow social conversations and keep the marine frequencies uncluttered and available for their intended uses.

**FCC Licensing Information**

Cobra Marine VHF radios comply with the FCC (Federal Communications Commission) requirements that regulate the Maritime Radio Service.

The radio operates on all currently allocated marine channels and is switchable for use according to U.S.A., International or Canadian regulations. It features instant access to emergency Channel 16 and calling Channel 9 as well as NOAA (National Oceanic and Atmospheric Administration) All Hazards Radio with Alert.

**Station License**

An FCC ship station license is no longer required for any vessel traveling in U.S.A. waters which uses a VHF marine radio, RADAR, or EPIRB (Emergency Position Indicating Radio Beacon), and which is not required to carry radio equipment. However, any vessel required to carry a marine radio on an international voyage, carrying an HF single side band radiotelephone, or carrying a marine satellite terminal must obtain a station license.

FCC license forms and applications for ship and land stations can be downloaded through the Internet at www.fcc.gov. Forms can also be obtained by calling the FCC at 888-225-5322.

**International Station License**

If your vessel will be entering the sovereign waters of a country other than the U.S.A. or Canada, you should contact that country’s communications regulatory authority for licensing information.

**Radio Call Sign**

Currently, the FCC does not require recreational boaters to have a license. The United States Coast Guard recommends that the boat’s registration number and state of registry (e.g., IL 1234 AB) be used as a call sign and be clearly visible on the vessel.
Canadian Ship Station License
You need a Radio Operator’s Certificate if your vessel is operated in Canadian waters. Radio Operator training and certification is available from the Canadian Power Squadron. Visit their website at http://www.cps-ecp.ca/.

User Responsibility and Operating Locations
All users are responsible for observing domestic and foreign government regulations and are subject to severe penalties for violations. The VHF frequencies on your radio are reserved for marine use and require a special license to operate from land, including when your boat is on its trailer.

NOTE
This device complies with part 15 of the FCC Rules, and Industry Canada license-exempt RSS standards. Operation is subject to the following two (2) conditions:
1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

FCC Warnings: Replacement or substitution of transistors, regular diodes or other parts of a unique nature, with parts other than those recommended by Cobra may cause a violation of the technical regulations of part 80 of the FCC Rules, or violation of type acceptance requirements of part 2 of the rules.
Install/Remove Antenna

1. To install the antenna turn the antenna into the radio clockwise to tighten. Do not overtighten.
2. To remove the antenna turn the antenna counterclockwise.

This radio transmitter IC: 906A-MRHH500 has been approved by Industry Canada to operate with the supplied antenna. Other antennas are strictly prohibited for use with this device.

Cet émetteur radio IC: 906A-MRHH350 a été approuvé par Industrie Canada pour fonctionner avec l’antenne fournie. D’autres antennes sont strictement interdits pour une utilisation avec cet appareil.

Batteries and Charger

The radio is shipped with a sealed lithium-ion (LiON) battery pack (P/N CM 110-026) that is rechargeable.

**WARNING**
The charger provided for this radio is only to be used to charge the battery pack provided. Do not charge any other type of batteries in the charger as fire, explosion or battery damage will occur. Avoiding extreme room temperatures will also help prolong the life of the battery pack for the radio.

When your rechargeable batteries begin to discharge too quickly, it is time to install a new battery pack. Your radio will also operate with five (5) high-quality AA alkaline batteries, using the included alkaline battery tray.

**Installing the Battery Pack**
1. Position the battery pack over the back of the radio.
2. Engage the battery pack into the radio by sliding to the top until battery pack is fully seated against radio housing.
3. Tighten the screw using the end of the belt clip to secure the battery pack to the radio. Do not overtighten. Only use the end of the belt clip to tighten the screw.

Wrist Strap and Belt Clip

**Belt Clip**
Use the spring-loaded belt clip to carry the radio on your person.
1. Slide the belt clip into the guide channel on the back of the radio until it is locked in place.
2. To attach the wrist strap, insert it through the hole at the top of the belt clip, feed it through the looped end and pull tight to secure to the belt clip.
3. Press open the belt clip, slide it over the belt and release the clip.
4. To remove the belt clip from the radio press the tab on the belt clip, which unlocks the clip, and slide it out.
**Batteries and Charger**

**Initial Charge**

The Cobra-provided LiON battery pack may be charged at home, in a car or in a boat using the appropriate 12V or 120V power cord with the charger.

1. Insert one (1) of the power cords into the back of the drop-in charger.
2. Insert the other end of the power cord into the appropriate 12V or 120V power source.
3. Remove battery pack spacer from the charger and insert the entire radio/battery into the charger. The metal charge contacts on the battery will contact the mating prongs in the charger to transfer the charging current.
4. Observe that the red light on the front of the charger glows to indicate that the battery pack is properly seated and the charger is operating.
5. Allow the batteries to charge for five (5) to six (6) hours before use. The light will change back to green when the battery is fully charged.

**WARNING**

Only the rechargeable LiON battery pack can be recharged. You MUST use one of the charging devices provided with this radio. Do not substitute any other type of charging adapter or charger base for this radio. Battery damage, fire or explosion may result. It is equally important to prevent the lithium-ion (LiON) battery pack from freezing to obtain best performance from the battery pack.

**NOTE**

If the drop-in charger is used on a boat, Cobra recommends you attach it to a horizontal shelf or vertical bulkhead (using the screw holes provided) to prevent possible damage due to the boat rolling or pitching. The charging base has been designed to hold the battery pack in place during rough sea conditions.

---

**To Remove Battery Pack from Radio**

1. Loosen the screw on the back of the battery pack.
2. Lift the bottom of the battery pack slightly to remove it from the radio housing.
3. Pull battery pack out of the radio housing.

**NOTE**

The LiON battery pack can also be charged in the battery charger without being installed in the radio. Insert the spacer into the battery charger to support the battery pack during this charging process. Follow the same procedures in “Initial Charge” to charge the battery pack.

**NOTICE**

Lithium-ion (LiON) batteries are toxic. Please dispose of properly. Some marine suppliers and electronics retailers accept old battery packs for recycling and some municipal waste disposal agencies have special provisions for battery disposal.

**Alkaline Batteries**

The alkaline battery tray acts as a backup or “Emergency” power source should the battery pack run low on power and need to be recharged. The radio will transmit at full power when using five (5) new AA alkaline batteries.

**WARNING**

Never attempt to recharge alkaline batteries. They are not made to be recharged, and should be disposed of in a proper manner.
Getting Started

Refer to the foldout at the front of this manual to identify the various controls and indicators on your radio. Throughout this manual you will be instructed to “Press” or to “Press and Hold” various buttons (except “Push to Talk”) on the radio. “Press” means a momentary press of approximately one (1) second. “Press and Hold” means to hold the button down for approximately two (2) seconds.

Whenever you press any button except the Talk button on your radio, a brief tone (beep) (if key tones are selected On) will sound to confirm the button press. With all button presses, the appropriate icon will appear on the LCD and the backlight will turn On. The backlight will stay On for 10 seconds after the button is released.

At times, you will hear two (2) other sounds. Two (2) beeps will sound to confirm your setting changes and three (3) beeps will sound to notify you of an error.

Common Radio Functions
The following procedures define common operating functions of the radio when in either Marine Standby or Weather (WX) Standby modes.

Power/Volume Control

Power On/Off Control
The On/Off/Volume control is located at the upper right side of the radio. Turning the On/Off/Volume control past the detent position will turn the radio On or Off.

Volume Control
Volume is controlled by turning the On/Off/Volume control.
- To increase the volume, turn the On/Off/Volume control clockwise.
- To decrease the volume, turn the On/Off/Volume control counterclockwise.

Batteries and Charger

Maintaining the Battery Charge
As you use your radio, the battery power icon will show the battery power remaining. When the icon begins to flash, it is time to recharge or change the batteries.

NOTE
Radio will continue to receive signals when blinking but cannot transmit.

NOTICE
Use only the drop-in charger provided by Cobra. Do not use the charger with alkaline batteries; only the LiON battery pack is rechargeable. Spent alkaline batteries must be discarded and replaced.

It is a good idea to keep a set of fresh, high-quality AA alkaline batteries with your radio. Should the rechargeable battery pack become discharged and no electrical power source is available, you can insert the included alkaline battery tray with fresh alkaline batteries and continue to use your radio.
Getting Started

Radio Speaker and Microphone
The internal Radio Speaker and Microphone are located on the bottom front face of the radio below the lower control buttons. An optional Speaker/Microphone port is located at the top of the radio between the antenna and the Power/Volume control. Unthread the Speaker/Microphone port cover to access and install an optional Cobra speaker or microphone into this port.

Talk Button
Press and hold the Talk button to transmit messages. Release the Talk button to stop transmitting.

Backlight/Key Lock Button
To Display the Backlight Momentarily:
Press the Backlight/Key Lock button. The backlight will remain On for 10 seconds. If the backlight is already On, another press of the Backlight/Key Lock button will turn it Off.

Key Lock
To prevent accidental changes to your settings, you can lock all of the following buttons:
- Channel Up Button
- Channel Down Button
- SCAN Button
- MEM/ESC Button
- WX/H-M-L Button
- 16/9 Button
- TRI-WATCH Button
- Call/Enter/Setup Button

To Lock or Unlock the Buttons:
Press and hold the Backlight/Key Lock button for two (2) seconds. The Key Lock icon will appear or disappear in the LCD. When Key Lock is On, pressing any of the listed buttons on the front of the radio will result in a three (3) beep error message.

Both the Backlight/Key Lock button and the Talk button are active — you can Receive (Rx) or Transmit (Tx) a message with Key Lock On, but you cannot change the channel.

Channel Up/Down Buttons
Your radio will Receive (Rx) and Transmit (Tx) VHF signals on the channel indicated on the LCD display. You can change the channel at any time using the Channel Up/Down buttons.

To Change Channels:
Press the Channel Up/Down button.
You can press and hold the Channel Up/Down button for fast advance. The beep sound will occur only at the first press of the button and not during fast advance.
If the new channel selected is restricted to low power, the radio will automatically switch to Low Power mode and the Low Power icon will appear on the LCD.
If the radio is in the Key Lock mode, the channel will not change and the three (3) beep error signal will sound.

SCAN Button
Press and release the SCAN button to scan all channels. The SCAN icon will display on the LCD display. Scanning begins at lower channels, and scans to higher channels. Press the Channel Up/Down button to change the scan direction.
When a signal is received in SCAN mode, the radio will pause 10 seconds before resuming SCAN operation. The scan will stop on the paused channel and remain there when the Talk button is pressed.
In Memory mode, press and release the SCAN button to scan all memory channels. Because the unit is already in the Memory Channel mode, only the channels in the memory bank will be displayed.

NOTE
Memory channels need to be saved to effectively enter the Memory Channel mode and scan all memory channels.
Setup Mode Programming

The following series of procedures is designed to allow you to set the programmable features of your radio. Correctly following these steps results in a minimal amount of radio setup programming time.

During setup programming, the matrix display will show text describing the programming action you are now performing.

**NOTE**
When in the Setup mode, if you stop programming for longer than 15 seconds, your entry will be saved and the radio will go back to the Marine Standby mode. When you return to Setup mode and continue programming you will see the last “value” displayed. While in the Setup mode, you will not receive any signal reception except when setting squelch.

Marine (VHF) Mode Programming

Programming these features will allow you to customize certain features of this radio to enhance your “On-Water” radio use.

Start from Marine Standby mode to begin Marine (VHF) Setup programming. SAFETY AND DISTRESS will be displayed on the matrix. Press and hold the Call/Enter/Setup button for two (2) seconds to enter the programming mode.

The mode programming follows this sequence:
- Squelch Level Set
- UIC Channel Map
- Tone Alert On/Off
- Call Tone Select
- Roger Beep On/Off
- Key Tone On/Off
- Rewind Enable/Disable
Setup Mode Programming

Squelch Control

Squelch Control filters weak signals and radio frequency (RF) noise so that you will clearly hear the signals you want. The Squelch Control on this radio is set through the following keypad operation.

**To Set Squelch Control:**
1. With the power On, push and hold Call/Enter/Setup button to access the Setup menu.
2. Squelch control will be the first menu item to appear. Press the Channel Up and Channel Down buttons to set level. The signal level bar graph shows squelch level while you are in Setup mode on the squelch adjust function.
3. To adjust your squelch, press the Channel Down button until you hear a hissing sound, then press and release the Channel Up button until the hissing stops. This will establish a “Baseline” squelch.
4. By pressing the Channel Up button further, you will filter weak and medium strength signals. By pressing Channel Down button, you will receive weaker signals.
5. Press the Call/Enter/Setup button to save this entry and move to the next Setup mode programming.

**NOTE**
If the Squelch is set so that you can hear a continuous hissing sound, the Memory Scan and Tri-Watch functions will be blocked.

Call Tone Alert

If Call Tone Alert is set to On, the radio will alert you to a call from a compatible Cobra radio with a Call Alert.

**To Set Call Tone On or Off:**
1. Display will show Call Tone icon flashing and the matrix will display CALL TONE ON or OFF.
2. Press Channel Up/Down button to select ON or OFF.
3. Press the Call/Enter/Setup button to save this entry and move to the next Setup mode programming. The Call Tone icon will show in the Standby mode when set to ON.

USA/International/Canada Channel Maps

Three (3) sets of VHF Channel Maps have been established for marine use in the USA, Canada, and the rest of the world (International). Most of the channels are the same for all three maps, but there are definite differences (see table in the Appendix on page 64). Your radio has all three maps built into it and will operate correctly in whichever area you choose.

**To Set Channel Map Operating Area:**
1. The Channel Map is the second mode on the Marine (VHF) Setup programming.
2. U, I and C will display, with the current setting (the U icon is the default) flashing.
3. Press Channel Up/Down button to select the U, I or C icon.
4. Press Call/Enter/Setup button to save this entry and move to the next Setup mode programming.

**NOTE**
One or two of the channel maps might have been disabled for sales of this radio in some countries.
Call Tone Select
This setting will also allow you to transmit a unique Call Tone alert to identify your radio when you transmit messages. You can select from one of 10 different Call Tone signals.

To Set Call Tone:
1. From the previous press of the Call/Enter/Setup button, the matrix will display CALL TONE SELECT and the display will flash the current Call Tone number (01 through 10).
2. Press the Channel Up/Down button to select a different Call Tone. An example of each call tone will sound for 1.5 seconds.
3. Press Call/Enter/Setup button to save this entry and move to the next Setup mode programming.

NOTE
Call Tones are not usually used for Marine VHF communications. We allow you to turn it On for your unique communication needs. It is only compatible with other Cobra VHF radios.

Roger Beep Mode
In Roger Beep mode, your listener will hear an audible tone when you release the Talk button. This alerts your listener that you are finished talking and it is OK for them to speak.

To Set Roger Beep On or Off:
1. Display will show ROG icon flashing and the matrix will display ROGER BEEP ON or OFF.
2. Press Channel Up/Down button to select ON or OFF. ROG will be displayed when On.
3. Press Call/Enter/Setup button to save entry and move to the next Setup mode programming.

Rewind Enable/Disable
If Rewind is enabled, the last 20 seconds of incoming audio is recorded and you can play back missed VHF calls by pressing the Rewind button.

1. Display will show the Rewind icon flashing and the matrix will display REWIND ENABLE or DISABLE.
2. Press Channel Up/Down button to select ENABLE or DISABLE.
3. Press Call/Enter/Setup button to save entry.
Bluetooth® Mode Pairing and Programming

Bluetooth® wireless technology is a standard which has been developed for use in mobile (cell) phones and other devices. This radio can be wirelessly linked to your mobile phone if your mobile phone also has Bluetooth. This process of linking your mobile phone and this radio requires a one-time “pairing” after which the two devices can be “connected” when they are within range. When connected, this radio can act as the speaker and microphone of your mobile phone while your phone is stowed in a safe and dry location.

This programming section shows you how to complete the pairing process. It also shows you how to change some settings related to the Bluetooth functionality of your radio.

Pairing Your Mobile Phone:
1. Press and release the Bluetooth button to enter Bluetooth Standby. The matrix will display BLUETOOTH STANDBY and the blue keypad backlight will come on.
2. Press and hold the Bluetooth button for four (4) seconds [until the radio beeps four (4) times] from the Bluetooth Standby mode. The blue backlight will light. Your radio is now in a “Pairing Mode” and can be “found” by your phone.

While in pairing mode, the LCD will display PAIRING as shown in the illustration below.
3. Follow the mobile phone’s instructions to search for available pairing with another Bluetooth device. This can often be found in the Tools or Settings menu of your mobile phone. Enter the “P.I.N.” (Personal Identification Number 0000), on your mobile phone if prompted. Wait for the pairing process to complete.

4. You will then see a confirmation of successful pairing or a notice to try again if pairing did not occur. The matrix will display BLUETOOTH CONNECTED once the process is completed.

NOTE
This process only needs to be completed for first time operation. From then on, as long as your mobile phone is within 30 feet (10 meters) of the radio, the two units will “Connect” automatically.

VOX On or Off
The VOX function converts the radio microphone’s pickup of your voice from being controlled by the PTT button to being activated by your voice. When VOX is On, the PTT button does not need to be pressed to transmit your voice, and you can just speak into the microphone.
When VOX is Off, you need to press the PTT button while speaking.

To Change Between VOX On and Off:
1. From the Bluetooth Standby mode, press and hold Call/Enter/Setup button to access the Setup menu. VOX On/Off will be the first menu item to appear. The display will show BT VOX, the Vox icon and ON or OFF flashing.
2. Press the Channel UP/Down button to select ON or OFF.
3. Press the Call/Enter/Setup button to confirm your selection and move to the next Setup mode programming.
**Call Tone Alert**

If **Call Tone Alert** is set to On, the radio will “ring” with one of your Cobra selected tones when you receive a call on your mobile phone. If **Call Tone Alert** is set to Off, the radio will ring with the mobile phone’s default ring tone.

**To Set Call Tone On or Off:**
1. The display will show **BT CALL TONE**, the Call Tone icon and ON or OFF flashing.
2. Press **Channel UP/Down** button to select ON or OFF.
3. Press the **Call/Enter/Setup** button to save this entry and move to the next **Setup** mode programming.

**Call Tone Select (Ring Tones)**

This setting controls what ring tones are used to alert for incoming calls on your mobile phone. Ten different ring tones are available from which to choose.

**To Set Call Tone:**
1. The display will show **BT CALL TONE SELECT** and the current Call Tone number (01 through 10) flashing.
2. Press the **Channel Up/Down** button to select a different Call Tone. An example of each call tone will sound for 1.5 seconds.
3. Press **Call/Enter/Setup** button to save this entry and move to the next **Setup** mode programming.
Weather Mode Programming

To Set WX Alert On or Off:
1. WX Alert mode is the first mode that begins WX Alert Setup programming. From the WX Standby mode, press and hold the Call/Enter/Setup button to enter the Weather mode programming.
2. Display will show WX Alert icon and flashing matrix will display WX ALERT ON or OFF.
3. Press Channel Up/Down button to select ON or OFF.
4. Press Call/Enter/Setup button to save this entry and move to the next setup programming mode.

To Set WX Auto Search (SCAN) On or Off:
WX auto search setup is only shown if WX Alert is set to ON.
1. Display will show Weather icon and the matrix will display WX SCAN with ON or OFF flashing.
2. Press Channel Up/Down button to select ON or OFF.
3. Press the Call/Enter/Setup button to save entry.
You have now ended the WX Setup programming mode and will enter the WX Alert Standby mode.

NOTE
When WX Auto Search (SCAN) is set to On, weather channel scanning will start automatically and scan all available weather channels. When the user-selected weather channel falls below the preset squelch level, the weather channel will change to a new weather channel under the following conditions:
- WX Alert is engaged.
- WX received signal level falls below a preset squelch or the user-selected weather channel and
  - radio is in WX Standby OR
  - radio is in VHF Standby and there is no channel activity.
- WX Alert is detected on another weather channel.

Standby/Receive and Transmit

Marine Standby and Receive (Rx) Mode
Marine Standby mode is the default mode for the radio whenever it is turned on. From this mode, you can change current settings by becoming familiar with the different key functions in Marine Standby mode. While in Marine Standby mode, the user will be able to transmit by pressing the Push to Talk (Talk) button. Signals in Receive (Rx) mode will be received on the selected channel(s), and alerts broadcast by NOAA will activate the corresponding NOAA weather alert channels in your radio.

NOTE
Coast Guard alerts are broadcast on Channel 16. You must have the WX Alert turned On to receive NOAA weather alerts. While in Marine Standby mode, you will receive any messages sent on the channel to which you are tuned.
Transmit (Tx) Mode

**Transmit (Tx)** mode gives you the ability to interact with safety services, other vessels and shore stations. When you use this capability, be sure to follow the procedures and to observe the courtesies that govern its use so everyone benefits. See Appendix to help you select the proper channels.

**To Transmit a Message:**

1. Check to see that your radio is set to a proper channel for the type of message you plan to send.
2. Toggle to the **Low Power** setting.
3. With the microphone about 2 in. [51 mm] from your mouth, press and hold the **Talk** button and speak into the microphone. The **Transmit** icon will appear on the LCD.
4. Release the **Talk** button when you are finished speaking. Your radio can only operate in either **Transmit (Tx)** or **Receive (Rx)** mode at any given time. You will not hear the response to your message unless the **Talk** button is released. **Battery Power** icon is held at the level it was at during receive.

**NOTE**

If the **Talk** button is held down for five (5) minutes, the radio will automatically sound a series of beeps and cease transmitting to prevent unwanted signal generation and battery drain. As soon as the **Talk** button is released, it can be pressed again to resume transmission.

---

**NOAA Weather Channels and Alert**

Monitoring the weather will probably be a frequent use of your radio. NOAA provides continuous, around-the-clock broadcasts of the latest weather information. Taped weather messages run every four (4) to six (6) minutes and are revised every two (2) or three (3) hours, or as needed. The Coast Guard also announces weather and other safety warnings on Channel 16. Smart boaters keep an eye on safety and an ear to the radio — and never let the weather catch them unaware.

**NOAA Emergency Weather Alert**

In the event of a major storm or other weather condition requiring vessels at sea or on other bodies of water to be notified, NOAA broadcasts a 1050 Hz tone that receivers such as your Cobra Marine VHF radio can detect and warn you of a weather alert condition. When the Weather Alert mode on your radio is On, this signal will produce a loud tone from the speaker in the radio and will automatically switch to the alerting weather channel so the alert broadcast can be heard.

**NOAA Test Alert System**

To test this system, NOAA broadcasts the 1050 Hz signal every Wednesday sometime between 11 a.m. and 1 p.m. in each local time zone. Any receiver that can detect the weather alert tone may use this service to verify that this system is functioning properly.
Weather (WX) Standby Mode
To enter and exit the WX Standby mode, press and hold the WX/H-M-L button.

Receiving a Weather Alert
NOAA broadcasts weather information as described in the NOAA weather channels section on page 75 of this manual.
When NOAA broadcasts a weather alert signal and your radio is in WX Alert Standby mode, the following items will be displayed on the LCD display:
- The WX icon (cloud/sun) icon will be displayed.
- The last used weather channel will be displayed.
- The bar graph will display received signal strength level.
- The WX Alert icon (safety triangle) will be displayed.
- The matrix will display WEATHER STANDBY.

NOTE
Only one (1) or two (2) of the weather channels will be operating in any given location [only in Receive (Rx) mode]. You will need to select the channel with the strongest signal in your location.

NOTE
When in the WX Alert mode, and NOAA sends the 1050 Hz alert tone, the radio will sound a series of loud beeps regardless of the volume control setting.

Channel 16/9 Mode
Channel 16/9 mode gives you quick access to calling on Channel 16 and Channel 9 from any operational mode.

To Switch to Channel 16 or Channel 9:
1. Press the Channel 16/9 button to change to Channel 16.
2. Press the Channel 16/9 button again to change to Channel 9.
3. Press the Channel 16/9 button a third time and return to the last used channel.
Advanced Operation

Tri-Watch Mode

Tri-Watch mode gives you one (1) button access to scan a total of three (3) channels of most importance to you. Channel 16 is preprogrammed and will always be one (1) of the scanned locations. Two (2) other channels of your choice can be stored in the radio. These channels can be edited and/or recalled during future engagements of Tri-Watch mode.

NOTE
The radio must be squelched for Tri-Watch mode to function. See page 18 for Squelch procedure.

Tri-Watch Setup

To Program or Edit the Tri-Watch Channels:
1. Press and hold the TRI-WATCH button from Marine Standby mode for two (2) seconds to activate Tri-Watch Setup mode. The MEM icon on the display will turn On and the matrix will display TW MEM ENTER 01.

NOTE
The main channel number will flash to indicate channel position. If there is no input activity for 15 seconds, the radio will sound three (3) beeps and return to Marine Standby mode.
2. Press Channel Up/Down button to select the desired Tri-Watch channel.
3. Press and release TRI-WATCH button or Call/Enter/Setup button to confirm entry.
4. Repeat steps 2 and 3 to program the remaining additional Tri-Watch memory channel.
5. After programming both Tri-Watch memory channels the radio will immediately engage Tri-Watch mode.

Using Tri-Watch

Tri-Watch Scan Mode:
1. From Marine Standby mode, press the TRI-WATCH button. The TW SCAN will display on the matrix along with the three marine channels stored in the Tri-Watch memory.
2. The radio will scan through the three (3) Tri-Watch memory channels.
3. A signal on any one (1) of the three (3) channels will stop the scan for 10 seconds to allow you to listen to the traffic on that location.

NOTE
After the Tri-Watch scan stops to monitor a channel, as long as you do not press any buttons within 10 seconds, your radio will automatically resume scanning the Tri-Watch channels.
4. Press the Channel Up/Down button to resume scanning the Tri-Watch channels or to change the scan direction.
5. To EXIT the Tri-Watch scan, press the TRI-WATCH button again, and the radio will return to Marine Standby mode.
Advanced Operation

Memory Location Mode

Your radio has unlimited memory locations for storing your most frequently used channels. These memory locations can be selected individually or can be scanned. (See page 37 under Memory Location Scan.)

To enter Memory mode, press MEM/ESC button. The display will show the MEM icon and the Memory Channel bank will be displayed on the matrix.

To Program Memory Locations:

1. Press and hold the MEM/ESC button for two (2) seconds. The memory location number will be displayed on the matrix and the MEM icon will be turned On.
2. Use the Channel Up/Down button to advance to the memory location (00-99) you want to program.
3. Press the MEM/ESC button to select the memory location.
4. Use the Channel Up/Down button to change to the channel you want to store into the selected memory location.
5. Press the MEM/ESC button to program that channel. The memory location will be displayed on the matrix again.

Repeat steps 2 through 5 to program as many additional memories as you want.

6. Press and hold the MEM/ESC button for two (2) seconds. This will return the radio to Memory mode.
7. Press and release the MEM/ESC button again to return to Marine Standby mode.

To Recall a Stored Memory Location:

1. Press the MEM/ESC button. The MEM icon will be turned On.
2. Press the Channel Up/Down button to select the memory location. If a memory location has been programmed, its associated channel will display on the LCD. Your radio is now in Marine Standby mode on the selected memory location.

To Exit Memory Location Mode:

Press the MEM/ESC button to return the radio to Marine Standby mode. The last channel used in Marine Standby mode will now be displayed on the LCD and the MEM icon will disappear.

To Erase Stored Memory Locations:

1. Press and hold the MEM/ESC button for two (2) seconds. The memory location number will be displayed on the matrix and the MEM icon will be turned On.
2. Use the Channel Up/Down button to advance to the memory location you want to erase.
3. Press the MEM/ESC button to select the memory location.
4. Use the Channel Up/Down button to change to the channel to read “00” at the selected memory location.
5. Press the MEM/ESC button to erase that channel.

Repeat steps 2 through 5 to erase as many additional memories as you want.

6. Press and hold the MEM/ESC button for two (2) seconds. This will return the radio to Memory mode.
7. Press and release the MEM/ESC button again to return to Marine Standby mode.
Advanced Operation

Channel Scan Mode
During Channel Scan mode, the radio will rapidly switch from channel to channel through all the channels.

NOTE
The radio must be squelched for Channel Scan mode to function. See page 18 for Squelch procedure.

To Enter Channel Scan:
1. From Marine Standby mode, press the SCAN button. The radio will immediately begin to scan the entire channel map selected in the active channel map. CHANNEL SCAN will display on the matrix.
2. A signal on any channel will stop the scan for 10 seconds to allow you to listen to the traffic on that location. After 10 seconds, the radio will resume scanning.
3. Press the Channel Up/Down button to resume scanning before the 10-second pause has completed or to change the scan direction.
4. To EXIT Channel Scan mode, press the SCAN button again. The SCAN icon will disappear from the LCD and the radio will return to Marine Standby mode.

Memory Location Scan Mode
During Memory Location Scan mode, the radio will rapidly scan through all pre-assigned memory channels.

NOTE
The radio must be squelched for Memory Location Scan mode to function. See page 18 for Squelch procedure.

NOTE
If there are fewer than two (2) memory locations programmed in the radio, the Memory Location Scan option will not be available. To program at least two (2) memory locations, see page 34.

To Enter Memory Location Scan:
1. From Marine Standby mode, press the MEM/ESC button.
2. Press the SCAN button. The radio will immediately begin to scan all pre-assigned memory channels. The MEM icon will show on the LCD, and MEM CHAN SCAN will display on the matrix along with the memory location.
3. A signal on any channel will stop the scan for 10 seconds to allow you to listen to the traffic on that location. After 10 seconds, the radio will resume scanning.
4. Press the Channel Up/Down button to resume scanning the Memory Location Scan channels before the 10-second pause has completed or to change the scan direction.
5. To EXIT Memory Location Scan mode, press the SCAN button again. The MEM icon will disappear from the LCD and the radio will return to Marine Standby mode.
Rewind Operation

Rewind-Say-Again® Feature

Use the Cobra exclusive Rewind-Say-Again® feature to replay or record the last 20 seconds of an incoming audio transmission.

Example 1:
When engine noise, music or conversation creates too much noise to hear an inbound message clearly, press the REW button to hear the message a second time.

Example 2:
When listening to an urgent distress message of an excited caller with confusing background noise, press the REW button to hear the message a second time and get life saving information. Use this feature to record details including position coordinates, call signs, registration numbers and store details that will help authorities locate the distressed vessel.

NOTE
Hold the Rewind button to lock the recording memory (the Rewind icon flashing) and save the currently recorded transmission.

Using Rewind-Say-Again®:
1. Press REW button to listen to 20 seconds of the last recorded audio transmission. The matrix will display REWIND PLAYBACK during the playing back of the message and a 20-second countdown begins in the lower right corner.
2. Press the TALK, REW or MEM/ESC button during playback to stop the playback transmission. The radio returns to Marine mode.

Using Rewind-Say-Again® to Record VOICE Audio Transmission:

NOTE
If the record memory is locked (rewind icon flashing), press and hold the REW button to unlock.
1. Press and hold SCAN button for two (2) seconds to enter Record mode. The matrix will display MIC RECORDER.
2. Press and hold PTT button to begin recording from radio microphone. The transmitter will turn off. The matrix will display MIC RECORDER ON and the seconds remaining will be shown in the lower right corner. If PTT button is released, recording stops. While recording, a 20-second countdown begins on display. When 20-second countdown time has ended, recording stops and two (2) beep tones will be heard.
3. Press and hold SCAN button again for two (2) seconds or press MEM/ESC button to cancel recording and return to last operation.
Mobile Phone Operation with Bluetooth®

NOTE
Please refer to the Bluetooth Mode Pairing and Programming section on page 22 for instructions on how to pair your mobile phone with this device, change ring tones, etc. The following section covers how to complete a phone call and other basic operations.

Answer Incoming Phone Calls
This handheld radio, once properly paired and connected to your Bluetooth® compatible mobile phone, can answer incoming calls received on your mobile phone. It can act as the speaker and microphone, while your mobile phone stays safe and dry. It will also improve audio quality on both ends of the conversation.

To Answer and End an Incoming Call:
1. The speaker will ring. The matrix will display ANSWER.
2. Press and release the Bluetooth button on the front panel. After the call is answered, the matrix will display IN CALL.
3. Begin conversation with the caller by pressing the PTT (Push to Talk) key and speaking into the small microphone above the LCD. This is very similar to a standard radio operation and it completely eliminates all background noise when you are not speaking.

NOTE
To enable hands-free conversation or “VOX” mode (pressing in the PTT key not required), use the Channel Up and Channel Down keys anytime when in Bluetooth mode. The “VOX” icon will turn on when VOX mode is enabled.

The Bluetooth “VOX” setting does NOT reset to Off after a power cycle unlike the normal VOX associated with VHF mode.

4. To end a call, press and release the Bluetooth button. The radio will then return to previous Standby mode and resume normal operation.

Initiate a Phone Call
There are several ways to initiate a call. These include initiating (as normal) from the mobile phone, using voice dialing and last number redial.

To Initiate from the Mobile Phone
1. Simply dial a number on your mobile phone. (See manufacturer’s instructions for making a call.) When the phone’s Send key is pressed, the radio will respond by changing over to Bluetooth mode and the matrix will display DIALING.
2. The matrix will display IN CALL when the receiving party, or their voice mail, answers.
3. To end a call, press and release the Bluetooth button. The radio will then return to previous Standby mode and resume normal operation.
Using Voice Dial
This feature allows you to use your voice to dial a contact from the contact list on your mobile phone.

**NOTE**
Voice dialing is an advanced function and may not be supported by all phones. Cobra suggests you set it up and become familiar with it on your mobile phone before you attempt using it in conjunction with the radio or another Bluetooth device.

**To Initiate a Voice Dial Call:**
1. Press and release the **Bluetooth** button to enter the **Bluetooth Standby** mode.
2. Press and release the **Bluetooth** button twice (2x) from **Bluetooth Standby** mode. This will initiate the voice dial feature on the connected mobile phone.
3. You will hear a beep or audio command from the phone. Press and hold the **PTT** (Push to Talk) button and speak the name into the radio.
4. The mobile phone will begin to dial the contact it “recognizes.” The call will be completed through the speaker and microphone of the radio. The matrix will display **DIALING** and **IN CALL** as the call is completed.
5. Hang up by pressing the **Bluetooth** button when you complete your call.

Last Number Redial
This feature allows you to redial the last number stored in the mobile phone’s internal Call Log. This feature is supported by most mobile phones.

**To Initiate a Last Number Redial:**
1. Press and release the **Bluetooth** button to enter the **Bluetooth Standby** mode.
2. From **Bluetooth Standby**, press and hold the **Bluetooth** button for two (2) seconds [until the radio beeps two (2) times].
3. The connected mobile phone will redial the last number. The call will be complete through the speaker and microphone of the radio.
4. Hang up by pressing the **Bluetooth** button when you complete your call.

**To Disconnect (At the End of the Day)**
You might not want to take your calls through this VHF radio once you are back at the dock or in a dry location. See the instructions in the **Bluetooth Mode Programming** section on page 23 for instructions on how to turn Off the **Bluetooth** function of the radio. The matrix will display **BLUETOOTH RADIO OFF**.

**NOTE**
If switched to Off setting, then the radio will not reconnect with mobile phone on power up. It must be turned back On again from the **Bluetooth Programming** mode.
General Bluetooth Operation and Frequently Asked Questions

- **What is the Industry Standard Range for Bluetooth® Wireless Technology?**
  The industry standard range for Bluetooth wireless technology is 30 feet (10 meters). The radio will lose its pairing with the mobile phone if the mobile phone and the radio are separated farther than this. The radio will automatically reconnect with the mobile phone when the user comes back into range.

- **How many phones can the radio pair with?**
  The radio can only be paired to one mobile phone at a time. This is the standard operation for any Bluetooth headset or in-car Bluetooth system.

- **Do I need to have my mobile phone with me?**
  Yes, the phone call is actually completed through your mobile phone and your mobile phone operator/carrier. The mobile phone must be within the 30 feet (10 meters) range of the radio. The radio does not increase the offshore range of your mobile phone.

- **Can I use a standard Bluetooth® headset with this radio?**
  No, the radio is using the headset profile of the Bluetooth specification to pair with your mobile phone. It cannot pair to another Bluetooth headset.

- **Can I use this unit as a speakerphone or hands-free device?**
  Turning on VOX allows you to use the radio without pressing the PTT (Push to Talk) button. The radio will still need to be operated in a face held position with the microphone close to the mouth. This radio uses a noise canceling microphone, and it will not operate well from the belt clip or another hands-free position.

- **Please make sure to note your VOX setting.**
  If VOX is set to On, the receiving caller might hear conversation and noise in your background. This setting is retained in memory. If switched On, then it will be On the next time the radio is switched On and connected.

- **Can I use my mobile phone for emergency use?**
  No, Cobra does not endorse cellular telephones as a substitute for marine radios. They generally cannot communicate with rescue vessels and, if you make a distress call on your cellular telephone, only the party you call will be able to hear you.
  Additionally, cellular telephones may have limited coverage over water. If you do not know where you are, the Coast Guard will have difficulty finding you if you are using your cellular telephone. However, cellular telephones can have a place onboard where cellular coverage is available— to allow social conversations and keep the marine frequencies uncluttered and available for their intended use.
**Floating Feature**

**Burp Feature**

Cobra’s Burp feature allows the operator to expel water from inside the speaker grill. This is especially useful if the radio is dropped overboard or during extreme foul weather conditions. In these conditions, water can become trapped in the speaker grill and muffle the audio.

**To Activate Burp:**

1. Press and release the 16/9 and SCAN keys at the same time.
2. The Burp tone(s) at maximum level will sound from the internal speaker for eight seconds.
3. During this time, the matrix will display BURP.
4. Hold the radio with the speaker grill down to help the water drain out.
5. After an 8-second interval, the radio will return to standby.

**Floating Radio**

This radio is designed to float if dropped overboard. The orange center makes it visible and easy to retrieve. This rugged radio is also designed to meet JIS7 (IPX7) specifications. This means it’s designed to operate properly after being submerged in one meter deep water for 30 minutes.

**NOTE**

Do not leave the radio floating in water permanently. This could cause premature corrosion of the battery contacts and other damage.

The radio is only designed to float with its included Lithium-ion battery. Using other approved batteries might cause the radio to sink. This includes the optional AA battery tray, depending on the weight of the AA batteries used.

---

**Maintenance and Troubleshooting**

**Maintenance**

Very little maintenance is required to keep your Cobra Marine VHF radio in good operating condition:

- Keep the radio and charger clean by wiping with a soft cloth and mild detergent. Do not use solvents or harsh or abrasive cleaners, which could damage the case or scratch the LCD screen.
- If the radio is exposed to salt water, wipe with a soft, moist cloth at least once a day to prevent buildup of salt deposits, which could interfere with button operation.
- If the radio will be stored for a long period, such as over the winter, remove the batteries from the battery tray and store them in a separate package. This is especially important if you are using alkaline batteries.

**Troubleshooting**

<table>

VHF Marine Radio Procedures

Maintain Your Watch
Whenever your boat is underway, the radio must be turned On and be tuned to Channel 16 except when being used for messages.

Power
Try 1 watt first, if the station being called is within a few miles. If there is no answer, switch to 3 watts and call again. You have the ability to go up to 6 watts of output power to increase your calling distance. Remember, the lower wattage outputs will conserve your battery and minimize interference to other users.

Calling Coast Stations
Call a coast station on its assigned channel. You may use Channel 16 when you do not know the assigned channel.

Calling Other Vessels
Call other vessels on Channel 16 or on Channel 9. (Channel 9 is preferred for recreational vessel use.) You may also call on ship-to-ship channels when you know that the vessel is listening on a ship-to-ship channel.

Initial Calling on Channel 16 or 9
The use of Channel 16 is permitted for making initial contact (hailing) another vessel. The limits on calling must be followed. Be reminded, Channel 16’s most important function is for Emergency Messages. If for some reason, Channel 16 is congested, the use of Channel 9, especially in U.S. waters, may be used as the initial contact (hailing) channel for non-emergency communication.

Limits on Calling
You must not call the same station for more than 30 seconds at a time.
If you do not get a reply, wait at least two (2) minutes before calling again.
After three (3) calling periods, wait at least 15 minutes before calling again.

Change Channels
After contacting another station on a calling channel, change immediately to a channel which is available for the type of message you want to send.

Station Identification
Identify, in English, your station by your FCC call sign (if available), vessel name and the state registration number, at both the beginning and at the end of the message.

Prohibited Communications
You MUST NOT transmit:
- False distress or emergency messages.
- Messages containing obscene, indecent or profane language.
- General calls, signals or messages (messages not addressed to a particular station) on Channel 16, except in an emergency or if you are testing your radio.
- When you are on land.
Voice Calling

You are required to listen to Channel 16 while standing by. Channel 16 is the distress and safety channel used for establishing initial contact with another station and for emergency communication. The Coast Guard also monitors Channel 16 for safety purposes for everyone on the water.

**NOTE**
Channel 9 may be used by recreational vessels for general-purpose calling. This frequency should be used whenever possible to help relieve congestion on Channel 16. The Coast Guard generally does not make urgent marine information broadcasts or weather warnings on Channel 9. Boaters are still asked to “keep watch” on Channel 16 whenever the radio is turned on and not in use with another station.

To call another vessel or shore installation (e.g. lock or bridge tender):

- Make sure the radio is On.
- Make sure you are in standby listening mode on Channel 16. Make sure Channel 16 is not in use.
- When the channel is open (quiet), press the Talk button and call a vessel. Hold the radio or microphone several inches from your face and speak clearly and distinctly in a normal voice tone. Say “name or station being called,” “THIS IS [your vessel name or call sign].”
- Once contact is made, you must leave Channel 16 and go to another working channel. See channel listing on page 60.

**For Example**

The vessel Corsair is calling the vessel Vagabond:

**Corsair:** “Vagabond, this is Corsair. Over.”

**Vagabond:** “Please switch and answer on Channel 68 (or any proper working channel), Over.”

**Corsair:** “Switching to Channel 68. Over.”

- If the other does not respond, wait two (2) minutes and repeat. You are permitted to attempt contact three (3) times, two (2) minutes apart. If you still have not made contact, wait 15 minutes before trying again.
- After communications are completed, each vessel must sign off with its call sign or vessel name and the word “out” and return to Channel 16.

**NOTE**
For best sound quality at the station you are calling, hold the microphone on the front of the radio at least 2 in. (51 mm) from your mouth and slightly off to one (1) side. Speak in a normal tone of voice.

**NOTE**
“Over and Out” The most commonly misused procedure words are “over and out” within the same transmission. “Over” means you expect a reply. “Out” means you are finished and do not expect a reply.
Radiotelephone Calls

Boaters may make and receive radiotelephone calls to and from any number on the telephone network by using the services of public coast stations. Calls can be made — for a fee — between your radio and telephones on land, sea and in the air. See the Appendix for the public correspondence (marine operator) channels.

If you plan to use these services, consider registering with the operator of the public coast station that you plan to work through. These services can provide you with detailed information and procedures to follow.

**NOTICE**
You may disclose privileged information during a radiotelephone call. Keep in mind that your transmission is NOT private, as it is on a regular telephone. Both sides of the conversation are being broadcast and can be heard by anyone who has a radio and tunes to the channel you are using.

Emergency Messages and Distress Procedure

The ability to summon assistance in an emergency is the primary reason to have a VHF marine radio. The marine environment can be unforgiving, and what may initially be a minor problem can rapidly develop into a situation beyond your control.

The Coast Guard monitors Channel 16, responds to all distress calls, and coordinates all search and rescue efforts. Depending on the availability of other capable vessels or commercial assistance operators in your vicinity, Coast Guard or Coast Guard Auxiliary craft may be dispatched.

In any event, communicate with the Coast Guard as soon as you experience difficulties and before your situation becomes an emergency. Use the emergency message procedures only after your situation has become grave or you are faced with a sudden danger threatening life or property and requiring immediate help. Use Channel 16 to communicate your emergency message. Make sure you transmit on high power. If you are merely out of gas, do not send an emergency message. Drop your anchor and call a friend or marina to bring the fuel you need or to give you a tow.
Marine Emergency Signals
The three (3) spoken international emergency signals are:

- **MAYDAY**
  The distress signal MAYDAY is used to indicate that a station is threatened by grave and imminent danger and requests immediate assistance.

- **PAN**
  The urgency signal PAN is used when the safety of the vessel or person is in jeopardy. (This signal is properly pronounced pahn.)

- **SECURITE**
  The safety signal SECURITE is used for messages about the safety of navigation or important weather warnings. (This signal is properly pronounced see-cure-ee-tay.)

When using an international emergency signal, the appropriate signal is to be spoken three (3) times prior to the message.

If you hear a distress call
You must give any message beginning with one (1) of these signals priority over any other messages. ALL stations MUST remain silent on Channel 16 for the duration of the emergency unless the message relates directly to the emergency. If you hear a distress message from a vessel, stand by your radio. If it is not answered, YOU should answer. If the distressed vessel is not nearby, wait a short time for others who may be closer to acknowledge. Even if you cannot render direct assistance, you may be in a position to relay the message.

Marine Distress Procedure
Speak slowly — clearly — calmly.

1. Make sure your radio is On.
2. Select Channel 16.
3. Press Talk button and say:
   “MAYDAY — MAYDAY — MAYDAY.”
   (Or “PAN — PAN — PAN,”
   or “SECURITE — SECURITE — SECURITE.”)
4. Say:
   “THIS IS [your vessel name or call sign],” repeated three (3) times.
5. Say:
   “MAYDAY (or “PAN” or “SECURITE”)”
   [your vessel name or call sign].
6. Tell where you are:
   (what navigational aids or landmarks are nearby).
7. State the nature of your distress.
8. State the kind of assistance needed.
9. Give number of persons aboard and conditions of any injured.
10. Estimate present seaworthiness of your vessel.
11. Briefly describe your vessel (length, type, color, hull).
12. Say:
    “I WILL BE LISTENING ON CHANNEL 16.”
13. End message by saying:
    “THIS IS [your vessel name or call sign]. OVER.”
14. Release Talk button and listen. Someone should answer. If not, repeat the call, beginning at step 3 above.

Keep the radio nearby. Even after your message has been received, the Coast Guard can find you more quickly if you can transmit a signal for a rescue boat to hone in on.
Emergency Messages and Distress Procedure

For Example

“Mayday — Mayday — Mayday”
“This is Corsair — Corsair — Corsair” [or “IL 1234 AB,” repeated three (3) times]
“Mayday Corsair (or IL 1234 AB)”
“Navy Pier bears 220 degrees magnetic — distance 5 miles”
“Struck submerged object and flooding — need pump and tow”
“Four (4) adults, three (3) children aboard — no one injured”
“Estimate we will remain afloat one-half hour”
“Corsair (or IL 1234 AB) is 26 ft sloop with blue hull and tan deck house”
“I will be listening on Channel 16”
“This is Corsair (or IL 1234 AB)”
“Over”

It is a good idea to write out a script of the message form and post it where you and others on your vessel can see it when an emergency message needs to be sent.

Warranty

Warranty Terms:
Cobra warrants your product against all defects in materials and workmanship for a period of three (3) years from the date of original purchase.
Cobra, at our sole discretion, will repair or replace your product (with the same or comparable product) free of charge.
Cobra will not pay shipping charges that you incur for sending your product to us. Products received COD will be refused.
To make a warranty claim, we will require proof of purchase in the form of an invoice or receipt. No proof of purchase is required for factory direct purchases.

Warranty Exclusions: Warranty does not apply to your product under any of the following conditions: 1. The serial number has been removed or modified. 2. Your product has been subjected to misuse or damage (including water damage, physical abuse, and/or improper installation). 3. Your product has been modified in any way. 4. Your receipt or proof-of-purchase is from a non-authorized dealer or internet auction site including E-bay, U-bid, or other non-authorized resellers.

LIMITATION OF WARRANTY: EXCEPT AS EXPRESSLY PROVIDED HEREIN, YOU ARE ACQUIRING THE PRODUCT “AS IS” AND “WHERE IS”, WITHOUT REPRESENTATION OR WARRANTY. COBRA SPECIFICALLY DISCLAIMS ANY REPRESENTATION OR WARRANTY INCLUDING, BUT NOT LIMITED TO THOSE CONCERNING THE MERCHANTABILITY AND SUITABILITY OF THE PRODUCT FOR A PARTICULAR PURPOSE. COBRA SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INCIDENTAL DAMAGES INCLUDING, WITHOUT LIMITATION, DAMAGES ARISING OUT OF THE USE, MISUSE OR MOUNTING OF THE PRODUCT.
The above limitations or exclusions shall be limited to the extent they violate the laws of any particular state. Cobra is not responsible for products lost in shipment between the owner and our service center.

General Warranty Information
Each product we manufacture is covered by our factory warranty. While each product may have unique components and policy, the general guideline below will apply to most Cobra products.
All Cobra products purchased factory-direct or from our Authorized Resellers will come with a full one to three (1-3) year warranty from the date of the original retail purchase (see policy statement above for full warranty details and exclusions).
Standard accessories packaged with each model will have a one-year factory warranty.
Accessory items have a one-year factory warranty.
Shipping to our facility is not covered in our warranty. Return shipping is included within the US.
This warranty is non-transferrable.
For the sake of clarity, ‘repair or replace the Product or its defective part’ does not include removal or installation work, costs or expenses which include but are not limited to labor costs or expenses.
Cobra will not be responsible for lost packages.
If you have any questions about operation or installing your new Cobra product, PLEASE CONTACT COBRA FIRST...do not return this product to any retail store. The contact information for Cobra will vary depending on the country in which you purchased and utilize the product. For the latest contact information, please go to www.cobra.com/support

For products purchased in the U.S.A. you may call 800-543-1608. For products purchased in the U.S.A., if your product should require factory service, please go to www.cobra.com/support and follow the instructions for returning your product to the Cobra Factory Service Department for service. Should there be any problems with this product or further information is needed on its features please visit www.cobra.com for support, frequently asked questions, Declarations of Conformity, and full manuals.

For Products Purchased Outside the U.S.A. or Canada
Please contact your local dealer for product service information.

For Products Used in Canada
Industry Canada Notice
This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:
(1) this device may not cause interference, and
(2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d’Industrie Canada applicables aux appareils radio exempts de licence. L’exploitation est autorisée aux deux conditions suivantes:
(1) l’appareil ne doit pas produire de brouillage, et
(2) l’utilisateur de l’appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.

Disposal of Old Electrical or Electronics Equipment
This product may contain hazardous substances that could impact health and the environment if not disposed of properly.

The crossed out wheeled bin symbol indicates that the product should not be disposed of along with household waste. It should be handed over to an applicable collection point for the recycling of electrical equipment. By ensuring that this product is disposed of correctly you will help/prevent potential negative impact on the environment.

If you need more information on the collection, reuse and recycling systems, please contact your local civic office or the shop where it was originally purchased.

VHF Marine Channel Assignments

Three (3) sets of VHF channels have been established for marine use in the U.S.A., Canada and the rest of the world (International). Most of the channels are the same for all three (3) maps, but there are definite differences (see table on the following pages). Your radio has all three (3) maps built into it and will operate correctly in whichever area you choose.

The following is a brief outline of the channel assignments in the U.S.A. Channel Map.

Distress, Safety, and Calling

Channel 16
Getting the attention of another station (calling) or in emergencies (distress and safety).

Calling

Channel 9
General-purpose (non-emergency) calling by non-commercial vessels. Recreational boaters are urged to use this channel to reduce congestion on Channel 16.

Intership Safety

Channel 6
Ship-to-ship safety messages and for search and rescue messages to Coast Guard ships and aircraft.

Coast Guard Liaison

Channel 22A
To talk to the Coast Guard, Canadian Coast Guard (non-emergency) after making contact on Channel 16.

Non-Commercial

Channels 67, 68, 69, 71, 72, 78A, 79A, 80A*
Working channels for small vessels. Messages must be about needs of the vessel, such as fishing reports, berthing and rendezvous. Use Channel 72 only for ship-to-ship messages.

Commercial

Channels 1A, 7A, 8, 9, 10, 11, 18A, 19A, 63A, 67, 72, 79A, 80A, 88A*
Working channels for working ships only. Messages must be about business or needs of the ship. Use Channels 8, 67, 72 and 88A only for ship-to-ship messages.
VHF Marine Channel Assignments

Public Correspondence (Marine Operator)
Channels 84, 85, 86, 87, 87A, 88*
For calls to marine operators at public coast stations. You can make and receive telephone calls through these stations.

Port Operations
Channels 1A*,5A*,12A*,20A,63A*,65A,66A,73,74,75,76,77*
Used for directing the movement of ships in or near ports, locks or waterways. Messages must be about operational handling, movement and safety of ships.

Navigational
Channels 13, 67
Channels are available to all vessels. Messages must be about navigation, including passing or meeting other vessels. These are also the main working channels for most locks and drawbridges. You must keep your messages short and power output at no more than 1 watt.

Maritime Control
Channel 17
For talking to vessels and coast stations operated by state or local governments. Messages must be about regulation and control, boating activities, or assistance.

Digital Selective Calling
Channel 70
This channel is set aside for distress, safety and general calling using only digital selective calling techniques. Voice communication is prohibited; your radio cannot transmit voice messages on this channel.

Weather
Channels Wx 1 Thru 10
Receive-only channels for NOAA and Canadian weather broadcasts. You cannot transmit on these channels.

NOTE
* These channels are restricted to the listed uses in certain parts of the country or for certain types of users only. Consult FCC rules or a knowledgeable radio operator before using them.

### VHF Marine Channel Assignments (English)

**NOTE**

Many of the plain-numbered channels, such as 01, 02 and 03, transmit and receive on different frequencies. This is termed duplex operation. The rest of the plain-numbered channels and all of the A channels, such as 01A, 03A and 04A, transmit and receive on a single frequency, which is termed simplex operation. Your radio automatically adjusts to these conditions. When in simplex operation, the A icon will appear on the LCD (see illustration on page A3).

**NOTE**

All channels are preprogrammed at the factory according to international regulations and those of the FCC (U.S.A.) and Industry Canada (Canada). They cannot be altered by the user nor can modes of operation be changed between simplex and duplex.

### Asignación de canales de VHF para radiocomunicación marítima (Español)

**NOTA**

Muchos de los canales de números simples, como 01, 02 y 03, transmiten y reciben en diferentes frecuencias. A esto se le llama operación dúplex. El resto de los canales de números simples y todos los canales A, como 01A, 03A y 04A, transmiten y reciben en una sola frecuencia, a la que se le llama operación simple (simplex). Su radio se ajusta automáticamente a estas condiciones. Cuando esté en operación simple, el icono A aparecerá en la pantalla de cristal líquido (vea la ilustración de la página A3).

**NOTA**

Todos los canales vienen programados previamente de fábrica conforme a los reglamentos internacionales y a los de la FCC (EE. UU) e Industry Canada (Canadá). No pueden ser alterados por el usuario, así como tampoco pueden cambiarse los modos de operación entre simple y dúplex.
You can find quality Cobra products and accessories at your local Cobra dealer, or in
the U.S.A., you can order directly from Cobra.
Please visit www.cobra.com
Web orders will normally ship the next business day if received by us before 2:00 PM
Eastern Time. Orders do not ship on weekends or holidays. All standard deliveries are
Monday-Friday only. Saturday delivery can be requested in certain areas of the country
for an additional shipping fee by calling Sales at 800-543-1608.
Certain orders may require additional days to process prior to shipping. Holidays may
also impact processing and shipping time frame. Occasionally, items may not ship due
to inventory depletion. If you need your item to be expedited, we recommend calling
Sales at 800-543-1608.
Order Acceptance
Once your order has been accepted and processed, you will receive an email that will
include the shipping carrier and tracking information.
Shipping and Delivery
Free ground shipping is included to 48 states. Hawaii, Alaska and Puerto Rico ship
based on assessed fee at checkout.
We require a physical address for shipping. Sorry, no P.O. Boxes or APO/FPO
addresses. Please select 2-day or next day air for shipments to Hawaii or Alaska.
Shipping charges are calculated on a per-product basis. Please make note of the
shipping charges associated with each item.
Note: For safety reasons, we cannot ship products containing lithium-ion batteries via
air delivery methods. These items are available to ship via ground service only.
Note: For your protection, some orders may require a signature for delivery.
