Connect and Power
To 12V Power Source

Camera Automatically Begins Recording

Button Functions (Recording Stopped):

- Access the dash cam’s Settings menu
- Takes a snapshot and stores it in the Photo Folder.
- Enters the playback menu to review previous recordings and photos.
- Begins loop recording.

Button Functions (While Recording):

- When pressed the camera saves the current clip from being overwritten.
- Takes a snapshot and stores it in the Photo Folder.
- Toggles the microphone on/off. Note that the icon on the button indicates the action that will be taken when the button is pushed, not the current setting. The current setting is shown on the status bar at the top of the screen.
- Stops loop recording. While in an Emergency Recording you will be asked to confirm.

Blue LED indicator lights when camera is powered up.
Red LED indicator blinks when camera is recording.
