Thank you for purchasing Cobra® Vedetta™ Series, Model SLR 650G Radar/Laser/Camera Detector. Please familiarize yourself with the capabilities your new detector can provide by reading this manual. Also, please be careful when using your new detector while driving.

Powering Unit On/Off & Mounting Unit
Plug in the detector using the included cigarette lighter power cord. Press the Power button momentarily to turn the unit On or Off.

Types of Screens
1. Menu/Settings Screen
   - User Settings: For customizing settings for IntelliMute, Auto Mute, Voice/Tone Alerts, Color Themes, Smart Power and Reset to Factory Default.
   - Alert Settings: For customizing settings to turn on/off certain individual radar bands and Low Car Battery Warning.
   - GPS Settings: For customizing settings for Speed Format, User-set Speed Alert, turn on/off certain individual Location-based Alerts, IntelliScope, AURA Database Info, and Delete User LBAs.

   Navigate through Settings using the Right & Left Scroll buttons. Press Select to confirm and Menu to save and exit.

2. Standby Screen
   - Compass Heading: Automatically displays GPS-based heading. If a GPS signal cannot be received, Parked will be displayed.
   - Vehicle Speed: Automatically displays your current vehicle speed using GPS. If a GPS signal cannot be received, 0mph will be displayed.
   - City/Highway Indicator: Shows current filtering mode.
   - Vehicle Battery Voltage: Displays your car battery voltage and automatically warns you if this drops below 11.9V.
   - IntelliMute Indicator: See reverse of this manual.

3. Radar/Laser Alert Screen
   - With Radar signals, the signal strength meter shows signal strength of the radar gun as well as relative proximity to the source. With Ka-band, you will also be notified of the actual Ka-band radar gun frequency being used.
   - Laser PPS currently in use are: 100, 125, 130, 200, 238 and 340.

Lift lever on suction cup base before attaching to the windshield. Once attached, push against windshield and lock the lever down. Use the full joint adjustment to make sure the detector unit is aligned level and printing straight ahead. The display can be in flip-up or flip-down position to suit preferred mounting location, and rotated to face directly toward you. Renew suction cup with a damp cloth or by rinsing under tap water.

With-Laser signals, you will always receive full alert and pulse rate (PPS) of the corresponding laser gun being used. Laser PPS currently in use are 100, 125, 130, 200, 238 and 340.
