

Probacstra consists of 1 highly effective, SuperStrain Probiotic microorganism that outperforms any probiotic product available.

BEGINS TO RESTORE
normal gut flora within hours.

Grown in a very specific, controlled environment, our Probiotic SuperStrain has a unique ability to form a spore (a hardened protein coat). In this spore form, it is alive and well protected from harsh environmental conditions like temperature, pH, humidity, and desiccation (excessive drying). When you use Probacstra, the spore enters in the harsh conditions of the human GI tract where it is exposed to low pH. As it passes through the stomach, entering into the small intestine, conditions are more suitable for its growth. The spore then quickly changes into a vegetable cell, constantly growing and dividing to populate your gut with beneficial bacteria while crowding out bad bacteria.

ALL PROBIOTICS
are not the same.

The vast majority of probiotic products on the market are unable to withstand harsh elements such as stomach acidity, light, heat, etc., making them virtually useless. Our product is truly unique in that it is a patented spore forming bacteria combined with *Electrolytes, Antioxidants, Vitamins and Energy components* making it a one of a kind product that is formulated to produce life changing results!

GUARANTEED
100
BILLION
LIVE & ACTIVE CULTURES PER DOSE

NO REFRIGERATION NEEDED
