Fat begins to accumulate, waste products build up and get in your bloodstream, and a number of health concerns develop. Liver toxicity can cause weight gain, cardiovascular disease, chronic fatigue, headaches, liver disease and digestive problems.

How It Works!

Individually, the three key components of the formula— healing chlorophyll, artichoke and taurine—are excellent liver support supplements.

Together, they provide the **ideal cleansing boost** to keep the liver running smoothly and promote natural liver detox. Purifying chlorophyll and artichoke aid phase 1 and phase 2 detox pathways while taurine—the most deficient amino acid in the diet— helps bile to excrete chemicals detoxed by the liver.*
