- **Chromium**-An essential mineral that the body can not produce on its own and is lacking in many Americans. It works with insulin to improve the transportation of glucose out of the blood and into cells. The Chromium Polynicotinate (or niacin-bound chromium) found in this formula is the most bio-available form of chromium for ideal absorption by the body.*
- **L-carnitine Tartrate**-A natural substance that is required for the transport of fatty acids during the breakdown of fats for the generation of metabolic energy.*
- **Oregon Grape Root**-A natural source of berberine, an alkaloid compound shown to effectively control blood sugar and lipid metabolism.*

Usage: Adults take one (1) capsule three times daily with a meal as a dietary supplement or as directed by a health care professional.
