

ADDITIONAL SUPPORT

HCL+2 *Complete Digestive Discomfort Formula**

Low, not high levels of stomach acid (HCl) are often an underlying cause of heartburn, acid reflux and indigestion. Supplementing with HCl can help alleviate digestive discomfort, and HCL+2 also contains pepsin and ox bile for healthy digestion of protein, fat and acid-based minerals like calcium, magnesium and iron.*

Super-GI Cleanse *All-in-one Daily Cleanse**

Safe for everyday use, Super-GI Cleanse helps ensure daily elimination and regularity with a blend of cleansing herbs, fiber, enzymes and flora designed to ward off constipation, gas and bloating, act as a 'broom' to sweep waste from your GI tract, and relieve intestinal and digestive discomfort.*

GI Diagnostic Testing

Detect parasites and find possible causes of digestive problems, food sensitivities, IBS, chronic fatigue and constipation using stool and saliva samples collected in the privacy of your own home. After your samples are processed by our laboratory affiliate, you'll receive the results along with personalized recommendations from Ann Louise Gittleman, PhD, CNS.

For questions or concerns, please call us at (800) 888-4353 or visit us at unikeyhealth.com

PRACTICAL PREVENTION

1

Avoid the salad bar. Consuming improperly washed veggies may increase your chances of ingesting parasite eggs or larvae.

2

When eating out, select well-cooked foods—especially avoid raw, rare or under-cooked pork, meat or fish. No sushi!

3

After handling your pet, wash your hands.

4

Drink filtered water. We recommend an NSF certified ceramic filter to effectively remove bacteria, parasites and heavy metals.

5

Scrub under your fingernails where parasitic cysts can hide out.

6

When traveling or camping, use a portable water filter certified to protect against waterborne organisms.

SUCCESS STORIES

This combination is a must have...

"This is the second time I have used this cleanse and it works. I've lost 7 pounds and feel healthier. I am determined to fix my issues holistically and incorporate the tips given in my daily routine."

- Victoria C.

It has completely stopped all of my sugar cravings...

"It has completely stopped all of my sugar cravings so I can actually be successful in my weight loss journey. In the past I would start a diet, but then halfway through give up because I would fall off the wagon. Today I'm three weeks in and I have lost 7 pounds. I highly recommend this kit!"

- Mariam

No more of any of the symptoms I was experiencing...

"After receiving my results from the Expanded GI Panel from Uni Key, it was recommended that I take this kit to get rid of the parasites that were found. I was feeling overall fatigue, headaches, abdominal pain and bloating. After taking the products as recommended, I have felt like a new person! No more of any of the symptoms I was experiencing and my energy is now at a new level! I have shown my doctor and he agrees that the products contain the best ingredients to help get rid of the parasites - once and for all!"

- Bill F.

30-Day Parasite Cleanse

QUICK START GUIDE

30-Day Protocol • Diet Guidelines
Practical Prevention • Success Stories

RESET YOUR HEALTH IN 30 DAYS!

An astounding 8 out of 10 Americans may be harboring one or more parasites! From microscopic organisms to 15-foot tapeworms, these invaders can cause weight gain, damage organs, create toxicity, and infiltrate the bloodstream and brain.

Based on over 80 years of combined experience and research, These products represent the “gold standard” in natural parasite elimination. This kit targets accumulated waste, organisms, and toxins for increased energy, nutrient absorption and overall intestinal health. Going a step further, the probiotics help recolonize your gut with friendly flora, creating an inhospitable environment for all types of uninvited guests.*

OUR 3-PART SYSTEM FEATURES

Para-Key All-natural Protozoa Formula*

Key Ingredients:

- **Cranberry Concentrate** - Rich in organic acids that aid digestion*
- **Grapefruit Seed Extract** - A powerful antimicrobial structure*
- **Pomegranate** - Time-honored fruit to remove tapeworms*
- **Peppermint** - A well-respected herb that helps reduce flatulence, soothe digestion and eliminate protozoa*
- **Sweet Wormwood** - An internationally-recognized microorganism eliminator*

Recommended Dosage: Take two (2) capsules three times daily, 20-30 minutes before meals or as directed by a health care professional. For children 40-80 lbs, take half the adult dosage. Not recommended for children under 40 lbs. Store tightly closed in a cool, dry place. Do not use during pregnancy or while nursing.

Manufactured exclusively for Uni Key Health Systems, Inc.

Flora-Key Powerful Probiotic Nutrition*

Key Ingredients:

- **L. acidophilus** - Fights yeast, supports urinary health, lactose intolerance and aids in absorption of nutrients*
- **Bifidus (B. longum, B. bifidum)** - Relieves indigestion and allergies*
- **L. reuteri** - Helps combat diarrhea, skin issues, H. pylori, colic and oral health*
- **L. plantarum** - Inhibits bloating or gas, bowel distress, soy allergies and constipation*
- **Inulin (Prebiotic)** - Nurtures probiotics to transport good bacteria into your gut*

Recommended Dosage: Adults take one (1) teaspoon mixed in 6-8 ounces of water on an empty stomach two to three times per day or as directed by a health care professional. For children 12 and younger, take half the adult dosage.

Verma-Plus All-natural Vermifuge Tincture*

Key Ingredients:

- **Black Walnut Hulls** - Expels intestinal waste and unwanted organisms*
- **Wormwood** - Helps eliminate worms from the intestinal tract*
- **Butternut** - Eliminates common pinworms and microorganisms*
- **Male Fern** - Purges larger microorganisms*
- **Orange Peel** - Aids in digestion, circulation and promotes peristalsis*
- **Centuary** - Releases microorganisms from intestinal walls*

Recommended Dosage: Take 1/4 teaspoon in four ounces of water three times daily: twice between meals on an empty stomach and once at bedtime or as directed by a health care professional. For children 40-80 lbs, take half the adult dosage. Not recommended for children under 40 lbs. Do not use during pregnancy or while nursing.

30-DAY PROTOCOL

Weeks 1-2

Take Para-Key and Verma-Plus according to instructions on the label.

Rest 5 Days

Rest from taking products but continue with diet.

Weeks 3-4

Take Para-Key, Verma-Plus and Flora-Key according to instructions on the label.

If you still have gas or feel bloated after the initial 30 days, you may want to consider repeating for another 30 days.

Diet at a glance...

Emphasize:

- Lean protein
- Cooked veggies, bone broth, soups and stews
- Healthy oils and saturated fats
- Anti-parasitic foods, tea and spices

Avoid:

- Sugar and sweeteners
- Fruit and fruit juices for first 2 weeks
- Cold or raw foods and drinks
- Alcohol
- Gluten, milk and cheese

*These statements have not been evaluated by the FDA. These products are not intended to diagnose, treat, cure or prevent disease.

Foods to Emphasize

Lean protein

Organic, antibiotic-free lean protein rich in zinc and vitamin A such as beef, lamb, poultry, fish or free-range eggs (at least 3-4 oz twice daily).

Cooked vegetables, bone broth, homemade soups & stews

Healthy essential and saturated fats

2-3 tablespoons from: organic unrefined coconut oil, olive oil or macadamia oil, raw butter and cream, flaxseed oil, fish oil or black currant seed oil daily to lubricate the GI tract and serve as a carrier for fat-soluble vitamin A.

Vitamin A-rich foods

Fortify your adrenal glands with foods high in precursor beta carotene such as green vegetables, carrots, squash and sweet potatoes.

Anti-parasitic foods, tea and spices

- Pumpkin seeds as an anti-parasitic snack
- 1-2 daily cups of mugwort tea to help ward off worms
- Peppermint tea for flatulence and protozoa protection
- “Killer” spices like onions, garlic, cayenne, cloves, thyme and fennel

Foods to Avoid

Sugar and artificial sweeteners

This includes sucralose and sugar alcohols like xylitol, and even so called “natural” sweeteners like honey, maple syrup or agave. Only stevia and monkfruit are acceptable.

All fruit and fruit juices for first two weeks

After, you may add up to two servings of fruit daily—one serving is equivalent to ½ grapefruit, 1 apple, 2 plums, 10 cherries or 1 cup of berries.

Cold or raw foods and drinks (including salads)

Beans, nuts, seeds, peas and legumes

They can be harder to digest and create additional flatulence (only excludes pumpkin seeds).

All alcoholic beverages

All gluten and dairy

With the exception of whey, yogurt, kefir, butter and cream.

All antioxidants

Especially avoid glutathione, SOD, folic acid, iron and B-12. You may continue with up to 500 mg of vitamin C and 200 IU of Vitamin E daily.
