

2006-2011 Honda Civic 4DR Mugen RR Spoiler installation guide

Note: Mugen spoiler is only for wingless civic. Vehicle with factory spoiler require to fill up factory hole on the trunk lid for best quality.

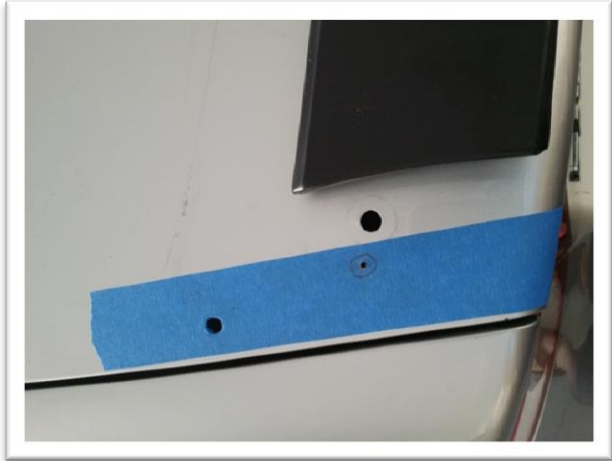

1.- remove stock original spoiler.

2.- put the center blade in the center of the trunk, secure with tapes.

3. – put tape on each end of the trunk and mark location of the holes on the tape or use the template..

4.- remove the plastic bumper on the bottom of the trunk. (Both side)

5.- Drill the hole inside the bumper stop for the second spoiler hole, do the same on the opposite side.

6.- After drilling the hole.

7. -Assemble the wing together with hardware. Make sure everything is line up.

8.- Hardware bracket install on side blade.

9.- Install the wing on the car now. Adjust the center piece left and right if needed.

10.-Finish Mugen RR Spoiler project
