

'2006-2011 Honda Civic 4DR JDM LED light beam kit installation guide

Note: Light beam kit can be modify to fit on any bumper. Make sure the surface of the mounting location is not flat, because the light point in an angle..

1.- Remove bumper or do it on the car, draw a round circle on the location where you want to light to install. To cut out the circle you need to drill hole show on the picture..

2.- The hole is completely cut out.

3. – It is now to have a dramel smooth out the edge of the circle...

4.- After the hole has been complete test to see if the light go in smoothly.

5.- We will included a set of mounting bracket look similar to the picture. Screw the bracket on the back of the light. We also included a spacer you must insert the space between the light and the plastic housing. .If not the lens of the light might fall off.

6.- Finally you complete the beam light installation. You can follow the step 1-5 to do the same on the other side. We do supply wire harness for this beam light. Please contact us if you have any question. Thank you.
