Dear Head Teacher,

Request for Consent: Project Science Evaluation

Your science department is using resources from the Project Science programme. This aims to build students' scientific skills and give them the opportunity to carry out a genuine project – a scientific investigation or engineering challenge. The aim is to have a positive impact on students' interest in science or 'science identity' - factors that influence STEM career choices.

In return for access to free teaching, project resources and CPD, we're asking for your consent to carry out our straightforward evaluation?

This involves students doing a 10-minute questionnaire administered by the teachers, now, and again after students have finished their projects.

Attached is an information sheet with full details. The programme is designed by Mastery Science, in collaboration with the Open University, with support from the Royal Academy of Engineering.

All data will be anonymised - student names will be visible to no-one except the teacher.

To give consent, please sign the form below and email this document to tony@masteryscience.com. If you have questions about the project, please email me or call: 077 579 39007

Kind regards

Dr Tony Sherborne
