

Wound Debridement Certificate

Course Objectives:

1. Upon completion of this course, the participant will be able to list three different types of wound debridement, two interventions to reduce procedural pain, and two contraindications to conservative sharp debridement.
2. Upon completion of this course, the participant will be able to demonstrate effective conservative sharp debridement on simulated models, including scoring, shaving, and excision of necrotic tissue.
3. Upon completion of this course, the participant will be able to create a Maggot Debridement Therapy system, on a simulated patient model, using maggots and accurate dosing.
4. Upon completion of this course, the participant will be able to choose appropriate debridement options based on wound characteristics.
