the KittyPass™
USA Patented

INSTALLATION INSTRUCTIONS

1. Remove door pins from hinges (see sample pictures)

2. Next mark a centerline at the bottom of the door

3. Next, cut out paper template, place it on the centerline on the door and trace around the edge with a pencil

4. Next using a jig saw or similar cutting tool, saw along the pencil mark

5. Next install the Kitty Pass using the four screws provided. (the tail section will screw to the face, clamping the door in between them)

6. Tighten until the Kitty Pass is snug against the door It is best to use a NON powered screwdriver to avoid overtightening

INSTALLING OPT. KITTY PASS PRIVACY DOOR

Align The Kitty Pass with the bottom of door and mark where the hinge holes will be
Then pre drill holes with an1/8 inch drill bit (opt. step but would make install easier)
and secure using provided screws

mark   pre-drill   secure
