

Bucky Protector

The Bucky Protector is an affordable way to shield your bucky faceplate from the scratches, dings and inevitable punctures that occur in a busy medical imaging facility. Simple to attach, this lightweight polycarbonate design is easy to clean, easy to remove and replace, and has no significant scattering or absorption.

- *Extends the bucky faceplate life by reducing wear and tear*
- *Utilizes industrial velcro for easy removal, cleaning, and replacement*
- *High resistance polycarbonate won't shatter, even when exposed to violent impact*
- *Clear images with no significant scattering or absorption*

BUCKY PROTECTOR	
Item #	Description
