

Slime's Tubeless Premium Sealant

Protecting you from tears and slits, Slime's Tubeless Premium Sealant is everything a rider could want in a tubeless sealant. Uniquely engineered, the Tubeless Sealant's Web Tech heals real-world punctures and slashes encountered on the trail, while its Flow Motion technology ensures a long-lasting liquid lifespan. Slime's Tubeless Premium Sealant is CO₂ compatible and evenly disperses from bead to bead for consistent, wide coverage. Simply stated, the Slime engineering team has designed the Tubeless Premium Sealant to stay liquid longer, seal faster, extend the lifespan of your tires and carry you farther. Proudly blended and bottled in the USA.

#SwitchToSlime

Web Tech™ – Seal punctures and slashes encountered on the trail with Slime’s advanced Web Tech engineering. Slime’s fiberweb “gauze effect” dramatically increases the surface area of your hole by overlapping long, stiff fibers with shorter, flexible fibers to create both a chemical seal and a physical barrier that seals punctures faster than anything on the market.

Flow Motion™ – The unique chemistry of Slime’s synthetic latex-based Tubeless Premium Sealant ensures a long-lasting liquid lifespan, keeping you protected longer than the competition. Flow Motion technology ensures a low evaporation rate and an extended liquid state, so you can ride without the fear of your sealant clumping, boogering or drying up.

CO₂ Compatible – Slime’s Tubeless Premium Sealant is compatible with CO₂ tire inflators. The cold temperatures created when inflating with CO₂ can dry out or degrade other sealants, but Slime’s updated fully synthetic latex blend (with an ultra-low freezing point of -16°C/3°F) prevents your sealant from freezing or drying up when setting the bead with CO₂.

Wide Coverage – Chemically engineered for optimal dispersion from bead to bead, Slime’s Tubeless Premium Sealant offers wider coverage than ever before. Slime’s Tubeless Premium Sealant leverages thixotropic properties, which is a fancy way of saying that the sealant’s complex formula thins when the wheel is in motion, to space your sealant out evenly for maximum coverage.

.....

Trust in Slime: Slime has been a sealant leader in the performance cycling market segment for decades. Environmentally friendly, the unique chemistry and development of Slime’s Tubeless Premium Sealant formula ensures a product that can withstand a wide range of environmental conditions, from the coldest mountain to the hottest desert. Slime’s Tubeless Premium Sealant was built on the engineering elements that have encouraged leading automakers and many others to put their trust in Slime. www.slimecycling.com
