

SAVING TIRES. RESCUING DRIVERS.

27
MILLION
tires end up in landfills annually.

Fix-a-Flat helps drivers get out of emergency flat tire situations and quickly to a tire shop for a professional repair.

Fix-a-Flat is maximizing tire life and keeping scrap tires out of landfills.

SAFE FOR ALL

Fix-a-Flat is a safe product. It won't harm you, it won't harm the environment and it won't harm your tires.

NEW ECO FORMULA

Fix-a-Flat's new, improved formula has ultra-low global warming potential. By using an eco-friendly propellant, Fix-a-Flat reduces the equivalent of 1 million tons of CO₂ from its product annually.

WATER-BASED INGREDIENTS

Fix-a-Flat uses ingredients that are safe for the environment (water-based, rather than solvent-based). So when it is time to repair your tire, the sealant cleans up easily with water and a damp rag.

100% RECYCLABLE

When your can is empty, you can toss it in your street side recycle bin so it can be remade into something new.
