

BE COYOTE AWARE

THEIR LIVES AND YOUR SAFETY DEPEND ON YOU

Coyotes are common throughout North America, including in urban areas. You may see and hear them more during mating season (Dec-Feb) and when juveniles are dispersing from family groups (Sept-Nov). These facts and safety tips will help increase comfort and decrease conflicts when living or recreating near North America's native "Song Dog."

FACTS

- Coyotes are members of the dog family; they are curious, adaptable, and learn quickly.
- Coyotes often mate for life, are devoted parents, and are highly communicative (barks, yips, howls).
- Coyotes weigh 18-35 pounds in the West and 30-60 pounds in the East. They live alone, in pairs, or in small family groups.
- Coyotes eat large numbers of rodents, as well as fruit, vegetation, insects and carrion. They help keep ecosystems vital, healthy and clean.

SAFETY

- **DON'T FEED COYOTES.** Their life and your safety depend on coyotes remaining wild and naturally wary of people.
- Coyotes may be more protective of dens/territories during pup rearing (April-Aug). Walk dogs on leashes. Pick up your small dog if you see a coyote.
- If approached, don't run. Wave arms, make noise and walk toward the coyote until he retreats. Be "Big, Bad and Loud."
- Do not attract a coyote; pick up trash.
- Appreciate coyotes from a distance. Share this information with family and friends.

DO NOT FEED COYOTES. HELP KEEP THEM WILD AND WARY!
