GENERAL REQUIREMENTS (All Laboratory Categories) ◆ The Laboratory Manager/Supervisor has a minimum of 3 years relevant										
experience in testing of construction materials. YES NO						NO 🗆				
♦ All Laboratory Technicians performing testing on Agency projects, unless working in an interim status under the direct supervision of a NETTCP certified technician, possess a valid NETTCP certification, or are qualified through another FHWA or FAA approved certification program, for the sampling and testing they perform.					YES	YES ⊠		NO 🗆		
♦ The laboratory facility adequately houses and allows proper operation of all			YES ⊠]	NO □				
required testing equipment in accordance with applicable test procedures. ◆ All laboratory test equipment has been calibrated, verified, or standardized at the frequencies specified by AASHTO or ASTM. Complete documentation of calibration for all laboratory test equipment is kept by the laboratory and available for review.				VE	YES ⊠		NO 🗆			
◆ All laboratory test equipment has been adequately maintained and was determined to be in proper working order.				YES	⊠ N		NO 🗆			
 The laboratory maintains the following current Reference Manuals: Current (within last year) AASHTO & ASTM standard testing procedures. NETTCP Technician course manual(s) covering all test methods performed by the laboratory. Transportation Agency/NETTCP policies for the handling, identification, conditioning, storage, and retention of test samples for all test methods performed by the laboratory. 				YES	S 🖂		NO □

	CATEGORY 1 & 2 L	ABORATORY REQUIREMENTS				
 ◆ The laboratory undergoes proficiency evaluation to verify continuing acceptable performance and maintains a record of all proficiency evaluation results, including any necessary follow-up actions taken. This is being accomplished through one of the following options: (1) AMRL/CCRL Proficiency Evaluation — The laboratory participates in all AMRL/CCRL proficiency testing programs relevant to the testing being performed by the laboratory. The laboratory has investigated to determine the cause(s) for any proficiency rating of "2" or less and has implemented indicated corrective action. Copies of all AMRL/CCRL reports, along with laboratory responses, are maintained at the laboratory. (2) NETTCP Proficiency Evaluation — The laboratory participates in a proficiency testing program established and operated by NETTCP (or a Transportation Agency) utilizing one or more AASHTO-accredited laboratories. The NETTCP proficiency program is similar in nature to the AMRL/CCRL proficiency testing program. Copies of all proficiency evaluation reports, along with laboratory responses, are maintained at the laboratory. (3) IA Evaluation — A Transportation Agency's Independent Assurance (IA) system is being used to evaluate the personnel and equipment of the laboratory. IA evaluation is being performed at a minimum frequency of once per year. Records of IA evaluation are being maintained at the laboratory. 				NO 🗆
