 required testing equipment in accordance with applicable test procedures. All laboratory test equipment has been calibrated, verified, or standardized at the frequencies specified by AASHTO or ASTM. Complete documentation of calibration for all laboratory test equipment is kept by the laboratory and available for review. 							NO 🗆					
• All laboratory test equipment has been adequately maintained and was determined to be in proper working order.			YES 🛛			NO 🗆						
 The laboratory maintains the following current Reference Manuals: Current (within last year) AASHTO & ASTM standard testing procedures. NETTCP Technician course manual(s) covering all test methods performed by the laboratory. Transportation Agency/NETTCP policies for the handling, identification, conditioning, storage, and retention of test samples for all test methods performed by the laboratory. 					YES ⊠		NO 🗆					

GENERAL REQUIREMENTS (- Continued -)						
	All laboratory test results are recorded using the NETTCP standard Test Report prms (TRFs) or equivalent forms acceptable to the responsible Transportation					
CATEGORY 1 & 2 LABORATORY REQUIREMENTS						
• The laboratory maintains a Laboratory Quality Manual which conforms to the requirements of the "NETTCP Laboratory Quality Manual Guidelines" (See Appendix B) and which has been reviewed and accepted by the responsible Transportation Agency.				NO 🗆		
	CATEGORY 1 & 2 LABORATORY REQUIREMENTS					
 CATEGORY 1 & 2 LABORATORY REQUIREMENTS The laboratory undergoes proficiency evaluation to verify continuing acceptable performance and maintains a record of all proficiency evaluation results, including any necessary follow-up actions taken. This is being accomplished through <u>one</u> of the following options: AMRL/CCRL Proficiency Evaluation – The laboratory participates in all AMRL/CCRL proficiency testing programs relevant to the testing being performed by the laboratory. The laboratory has investigated to determine the cause(s) for any proficiency rating of "2" or less and has implemented indicated corrective action. Copies of all AMRL/CCRL reports, along with laboratory responses, are maintained at the laboratory. (2) NETTCP Proficiency Evaluation – The laboratory participates in a proficiency testing program established and operated by NETTCP (or a Transportation Agency) utilizing one or more AASHTO-accredited laboratories. The NETTCP proficiency responses, are maintained at the laboratory responses, are maintained at the laboratory program is similar in nature to the AMRL/CCRL proficiency testing program. Copies of all proficiency evaluation reports, along with laboratory responses, are maintained at the laboratory responses, are maintained at the laboratory. 				NO 🗆		
IA evaluation is being performed at a minimum frequency of once per year. Records of IA evaluation are being maintained at the laboratory.
