HSD-SLIMCLIP SYSTEM

The HSD-SLIMCLIP SYSTEM features an Omnidirectional, Flexible Boom Microphone and an adjustable frame that wraps around the neck and over both ears for an ultra-low profile and comfortable use during broadcasts and performances.

The microphone has an omni-directional polar pattern which allows a full 360 degree pick up of sound, providing a natural blend of voice and ambiance. It is low in sensitivity to speech produced "popping sounds" and breath overloads during close-up situations, and is less susceptible to wind and clothing noise. It's distinguishing clarity in close talk operation and excellent gain before feedback make it suitable for mobile situations.

The HSD-SLIMCLIP SYSTEM has a detachable/interchangeable cable for universal purpose and it is terminated with a connector that allows quick connection to a compatible power module or a body pack wireless transmitter.

The HSD-SLIMCLIP SYSTEM is available in Tan or Black in 6 connector types to be compatible with most body packs.

Choir Series

AT-CHOIR EXTENDED

Pro Slim 85" Boom Microphone

Coming Spring 2020!

The perfect solution for your performance and an incredible value when looking for a mic that can handle those hard to reach places! The AT-CHOIR EXTENDED microphone is the right choice for an extended reach to choirs, ensembles, plays and productions.

Utilizing a lightweight Carbon fiber miniature boom that arrives with three separate microphone capsules. Choose from an omni-directional, cardioid, or hypercardioid capsule to suit your performance's application. The microphone capsule is attached to the tip of the boom, and will attach to any microphone stand.

This package defies the conventional price/performance barrier. Don't be fooled by the name "choir mic"... Because of the interchangeable mic elements, this mic is great for anything from acoustic instruments to ambient room miking for drums as well!
