

Step 1

Choose the area where you would like to apply the sticker. Clean the surface with a warm damp cloth or sponge and allow this to completely dry. Drying time for fresh paint can take as long as 6 weeks. When applying to a painted wall, please make sure the wall has been primed beforehand and is completely dry. **DO NOT** apply to oil-based paints. Do not stick over flaky wall paint and avoid installing on humid or textured walls.

Step 4

Attach the trunk to the wall in 2-3 points, step back and make sure the position is correct before applying completely. At this point, you can hold the top section of the tree above the trunk to ensure you have the correct placement.

To remove:

Carefully lift a corner and whilst folding the sticker back on itself, slowly peel off. Our wall stickers shouldn't damage your wall, but it's important to be careful when removing it in case the wall has been poorly prepared before painting. If you are concerned, or if the wall offers resistance, heat with a hair dryer while removing.

Key Features:

100% PVC FREE, polyester fabric stickers, printed using Greenguard Gold Certified ink

Step 2

We recommend getting help from a friend when applying large stickers. Hold the whole sticker against the wall to find the placement you like. You can use painter's tape to temporarily attach the sticker to the wall so you can stand back and gauge the angle. Once you are happy with the placement, make a note of the tree trunk's position on the wall with pieces of painter's tape or light pencil marks.

Step 5

Once the trunk is in position, follow steps 2, 3 and 4 for the top section of the tree. Get a friend to hold the sticker up slightly away from the wall so that you can carefully line it up with the trunk. Once it is aligned, slowly smooth out the sticker with your hands in an upwards and outwards motion.

Step 3

Before removing the backing paper from the trunk section, lay it flat on a hard floor and push down on it to ensure it is firmly adhered to the release paper. Gently remove the backing paper whilst keeping the sticker on the release paper.

Step 6

To smooth out bubbles or creases, lift the sticker, gently stretch out the crease, then reapply. If the material sticks to itself, gently pull both sides apart.

Tip: Keep the backing paper for any future relocation.

Warning!

CHOKING HAZARD – *This product contains small parts and is therefore not suitable for children under 3 years old. Sian Zeng stickers are not toys and should only be used for decoration.*
