

### Plan

---

Choose the area where you would like to apply the stickers and plan how you're going to position each one.

### Prepare

---

Make sure the surface where you are going to apply the stickers is clean from dust, dirt and completely dry.

### Tip

---

Keep the backing paper for any future relocation.

---

### Small Stickers

---

Small stickers can simply be peeled off the backing paper and applied to the wall. Once they are firmly on the wall, peel off the release paper. If you are not happy with where it is, gently peel the sticker off and reposition it. You will be able to reposition it several times.

### Large Stickers

---

1. We recommend getting help from a friend when applying large stickers
2. Lay the sticker down flat on the floor first and rub against it to ensure it is firmly adhered to the yellow release paper before removing the backing paper.
3. Gently remove the backing paper whilst keeping the sticker on the release paper.
4. Attach the sticker to a wall only in 2-3 points, step back and make sure the position is correct before applying completely.
5. Apply the stickers from the top down (or side to side, if the design is landscape format).
6. To smooth out any bubbles or creases lift the sticker and re apply.
7. If the material sticks to itself, gently pull both sides apart.

---

### Warning!

*Not suitable for children under 36 months. Small parts.*

### Key Features

*100% woven polyester with recyclable backing paper.  
Eco friendly Ink.  
PVC free.  
Removable solvent based acrylic adhesive.  
Moveable.*
