1 BLADE
Includes 36-tooth carbide tip blade (Roberts 10-47-2)
Also Available: 20-tooth blade (Roberts 10-47-6)

The 10-46 Jamb Saw is a powerful and versatile tool, capable of meeting a wide variety of undercutting needs. With a big 6-3/16" carbide tipped blade, this saw easily cuts door jambs, baseboards, cabinet toe kicks, inside corners and most hanging doors. The blade height adjusts from flush to the floor to 1-1/16" to allow proper heights for all floor coverings, from sheet vinyl up to thick ceramic and wood. As an additional feature, the cutting depth guide is also adjustable to prevent cutting through plaster or wall board when trimming cove base.
