Denner Tenor Recorders

European cherrywood (*Prunus avium*) is a very attractive wood due to its warm colour and interesting grain. It has wonderful tonal properties and while playing, your fingers can literally feel the resonance of the instrument. Because it is very light in its naturally finished state, European cherrywood is particularly suitable for larger recorders

Purchased parts package

- Maintenance instructions

Mollenhauer Tenor Recorders fitted with foot-joint keys give the player two advantages: they are easier to play for people with smaller hands, and the longer bore and larger tone holes result in a fuller sound. The sounds produced gain in depth and stability and also benefit from a more balanced tuning.

5431 Denner Tenor with double key, cherrywood

5431C Denner Comfort Tenor with 4 keys, cherrywood

Cantá Knick Bass

In addition to the traditional way of playing a bass recorder with a crook, the basses of the Cantá series can be blown directly due to their ergonomically bent headjoint.

Denner Knick Comfort Tenor

Our most luxurious Comfort Tenor recorder :

- Tonal elegance in a baroque design, based on models from the Denner workshop in Nuremberg.
- The optimised knick and the four keys ensure the best possible playing posture and relaxed fingers.
- Beautifully grained European cherrywood is lighter than any other material and ensures an amazing depth of resonance.
