The Readable Bible Announces Plans to Publish Unique 27-Book Set Readers Want Standalone Bible Books

Leawood, Kansas – September 1, 2017 – As part of its editing process, The Readable Bible team has supplied some of its volunteer proofreaders with copies of individual books of the Bible. Much to their surprise, several proofers have said how much they enjoyed reading a single book of the Bible. It seems that books of the Bible become more readable in the form and size of an everyday trade paperback.

Rodney S. Laughlin, founder of The Readable Bible, said, “We are pleased to respond to the input of our volunteer readers. Anything that makes the Bible more readable is worth doing.”

In response, Liddell Press is going to make The Readable Bible available as a 27-book set. While many books are simply too small for their own volume, at least 22 of the 66 books are large enough to be offered alone. In addition to a standard one-volume release of the entire Bible, the following books are planned for release in individual volumes:

• Genesis	• Ezra, Nehemiah, Esther	• Matthew
• Exodus	• Job	• Mark
• Leviticus	• Psalms	• Luke
• Numbers	• Proverbs, Ecclesiastes, Song of Songs	• John
• Deuteronomy	• Isaiah	• Acts
• Joshua, Judges, Ruth	• Jeremiah, Lamentations	• Romans
• Samuel	• Ezekiel	• I & II Corinthians
• Kings	• Daniel	• Other Epistles
• I & II Chronicles	• Minor Prophets	• Revelation

About The Readable Bible

The Readable Bible is Scripture in today’s formats, the way it would look if Moses, David, Paul and the other recorders of Scripture were sitting at a computer when God spoke to them. It is primarily a word-for-word translation with footnoted thought-for-thought translations when needed for easier readability. Unlike most Bibles that present text in difficult-to-read paragraph blocks, The Readable Bible presents the 27 types of information in Scripture in 17 modern formats, making the Bible as readable and approachable as any popular nonfiction book.
