

RACKETS 2022

BEACH TENNIS

TECHNOLOGIES

CARBON 18K

Maximum stiffness and strength while maintaining the racket's lightness thanks to the finest interlaced carbon microfilaments.

CARBON 12K

Maximum stiffness and strength while maintaining the racket's lightness thanks to the finest interlaced carbon microfilaments.

FIBER CARBON 3K

The 3K weave is achieved by interweaving the fibre threads to form small squares. In our case we use a 3K fibre with a higher grammage than normal carbon fibre to attain a more durable product.

FIBER GLASS 3K

The 3K Fiber Glass weave is achieved by interweaving the fibre threads to form small squares providing a higher grammage than regular fiber glass in order to make the racket more durable.

FIBER GLASS Silver

The Fibre Glass Silver gives the racket an intermediate hardness between the glass fibre and the carbon fibre.

HR3 Soft Core

Extra soft rubber to provide maximum comfort and vibration absorption.

HR3 Black Eva

HR3 high density EVA core with maximum memory effect.

CARBON Frame

Fiber carbon applied to the frame provides with greater rigidity and durability to the racket.

DCS Dynamic Composite Structure

By using a greater amount of material from the frame up to four centimeters inside the racket face we minimize the difference in toughness between the frame and the face. Thus, when the ball is hit with the outer areas of the racket we minimize the possible cutting of fibres that could occur when the rubber sinks in.

ROUGH Surface

Our special thickness silica sand helps you boost extra spin to your shots so that you can place the ball at the desired point on the court.

NG17 BEACH TENNIS RACKET

Fast, versatile and powerful. The NG17 Luxury 2023 beach tennis racket shares all the characteristics that have brought Nico Gianotti to the elite of beach tennis.

The NG17 Luxury is built with the most noble and advanced materials at the service of the most demanding players. The 18K Aluminised Carbon is a high performance and particularly resistant material which provides a solid feel with great speed to the attacking game. In terms of the core, NG17 beach tennis racket features the HR3 Black Eva. A rigid and high density rubber that facilitates control when blocking high speed shots.

For Nico Gianotti's beach tennis racket we have taken care of every detail. Starting with an exclusive and innovative cosmetic to the hole pattern specifically designed to maintain the intermediate balance. All this results in a balanced and hybrid racquet easy to use for any player.

CHARACTERISTICS

Weight	335g - 355g
Profile	20 mm
Frame	100% carbon
Eva	HR3 Black Eva
Face	Carbon alum 18K
