

RACKETS 2024

BEACH TENNIS

Nico Gianotti
#1 ITF Ranking

TECHNOLOGIES

CARBON 18K

18K #

Maximum stiffness and strength while maintaining the racket's lightness thanks to the finest interlaced carbon microfilaments.

ALUMINIZED 18K CARBON

18K ALUM

Aluminized 18K carbon that provides a solid and comfortable feel and greater resistance to temperature changes.

CARBON 12K

12K #

Carbon achieved by interweaving horizontal and vertical carbon threads. By achieving more stiffness it's a thinner carbon, and so, it weights around 25% less. We reduce the racket weight without losing stiffness nor durability.

FIBER CARBON 3K

3K #

The 3K weave is achieved by interweaving the fibre threads to form small squares. In our case we use a 3K fibre with a higher grammage than normal carbon fibre to attain a more durable product.

FIBER GLASS 3K

FG 3K

Fiber glass face. Lots of flexibility and comfort when striking the ball.

FIBER GLASS Silver

FG SILVER

Fiber glass with a metallized finish in order to give the material a level of rigidity that is between carbon and fiber glass.

HR3 Soft Core

HR3 SOFT

Extra soft rubber to provide maximum confort and vibration absorption.

HR3 Black Eva

HR3 BLACK EVA

HR3 high density EVA core with maximum memory effect. This results in greater power in your shots and ball output.

CARBON Frame

CARBON FRAME

Fiber carbon applied to the frame provides with greater rigidity and durability to the racket.

DCS Dynamic Composite Structure

DCS

By using a greater amount of material from the frame up to four centimeters inside the racket face we minimize the difference in toughness between the frame and the face. Thus, when the ball is hit with the outer areas of the racket we minimize the possible cutting of fibres that could occur when the rubber sinks in.

ROUGH Surface

ROUGH SURFACE

Our special thickness silica sand helps you boost extra spin to your shots so that you can place the ball at the desired point on the court.

PACK NG17 BEACH TENNIS LTD 2024

Discover the new NG17 Beach Tennis LTD 2024 Pack, the must have for the biggest fans of Nico Gianotti and the brand. A unique pack for this new season of competition.

TECHNOLOGIES

NG17 BEACH TENNIS LTD 2024 RACKET

A racket up to the expectations of the world's number 1 beach tennis player, the Frenchman Nico Gianotti. Maximum maneuverability and power in every stroke, without leaving aside an outstanding control on the sand.

This limited edition shares the characteristics that have made its sister NG17 Luxury one of the reference padel rackets in this sport. We have incorporated 18K Aluminized Carbon in its faces to provide the right stiffness to make you feel like an elite player, aggressive in your game and safe in defense. In the core we find the HR3 Black Eva Hard.

The NG17 Beach Tennis LTD 2024 has a sleek esthetic that will make you shine in every match. Just like the faithful ally that has taken Nico to the top of the world ranking, it has a hole pattern specifically designed to maintain an intermediate racket balance that makes it easy to use for players of all levels.

CHARACTERISTICS

Weight	320g - 335g
Profile	20 mm

NG17 BEACH TENNIS LTD 2024 RACKET

Fast, versatile and powerful. The NG17 Luxury 2023 beach tennis racket shares all the characteristics that have brought Nico Gianotti to the elite of beach tennis.

The NG17 Luxury is built with the most noble and advanced materials at the service of the most demanding players. The 18K Aluminised Carbon is a high performance and particularly resistant material which provides a solid feel with great speed to the attacking game. In terms of the core, NG17 beach tennis racket features the HR3 Black Eva. A rigid and high density rubber that facilitates control when blocking high speed shots.

For Nico Gianotti's beach tennis racket we have taken care of every detail. Starting with an exclusive and innovative cosmetic to the hole pattern specifically designed to maintain the intermediate balance. All this results in a balanced and hybrid racquet easy to use for any player.
