

**nox** | 2024 RACKETS  
PADEL OF THE FUTURE, **NOW**

[www.noxsport.es](http://www.noxsport.es)

## TESTEA QUALITY SEAL

All the rackets in the new collection have certified quality with the seal created by Testea Padel, the independent reference laboratory located at the Universitat Politècnica de València.

“Testea’s quality certificate consists of a series of laboratory tests designed based upon three objectives: firstly to ensure that all units of the same model behave in a similar way; secondly to verify the correct resistance to fatigue assuring that the racket does not rapidly lose performance with usage and, finally, to check the correct breakage resistance of both the frame and the face of the racket” explains Jordi Piedra, CEO and Co-Founder of Testea Padel.

In order to obtain the Testea Padel seal, padel rackets are subjected to very demanding breakage tests, both on the frame and faces, as well as durability tests. All of them carried out in a testing laboratory specifically designed for the purpose.

## PULSE SYSTEM

Reduction of the vibrations transmitted to the player's hand through the insertion of side rubbers that run from the base of the frame to the cap at the bottom of the racket.

## EOS FLAP

Improvement in the racket's aerodynamics and maneuverability with side perforations at the base of the frame. The combination of design and engineering is reflected in a better gaming experience for users, with a distribution of the racket's mass that results in increased striking speed and a heightened sense of control.

## NOX CUSTOM GRIP®

Patented technology by NOX and certified by Testea Padel, now included as a standard feature in all Luxury rackets from the 2023-24 collection. It increases grip by 52% and reduces the vibrations transmitted to your hand by 29%.

A fully customizable system ideal for players with perspiration issues or epicondylitis.

## NEW MOLDS, NEW TECHNOLOGIES, INCREASED COMFORT

The new Luxury Series 2024 is completely revamped. Our team of engineers has designed new molds and streamlined the edges on the frames to enhance maneuverability. We've also added extra grip length (10 millimeters) to improve hold and optimize weight distribution in the racket. These new molds, combined with the incorporated technologies, make the new Luxury Series 2024 a collection of padel rackets that are ahead of their time.

## SMARTSTRAP®

Would you like to be able to change the strap on your racket?

Nox Smartstrap® is the pioneering system of replaceable straps, now evolved into a compact piece for greater durability and safety. It's more hygienic, secure, and customizable.

The implementation of this system aims to offer padel players an option that completely suits their preferences, allowing them to apply a bracelet-style, braided, or sliding knot grip cord.

It allows for replacement due to breakage, wear, or washing.

## CARBON 18K Alum

Aluminized 18K carbon that provides a solid and comfortable feel and greater resistance to temperature changes.

## CARBON 18K

Maximum stiffness and strength while maintaining the racket's lightness thanks to the finest interlaced carbon microfilaments.

## CARBON 12K

Carbon achieved by interweaving horizontal and vertical carbon threads. By achieving more stiffness it's a thinner carbonz, and so, it weights around 25% less. We reduce the racket weight without losing stiffness nor durability.

## FIBER CARBON 3K

The 3K weave is achieved by interweaving the fiber threads to form small squares. In our case we use a 3K fiber with a higher grammage than normal carbon fiber to attain a more durable product.

## FIBER GLASS 3K

Fiber glass with a metallized finish in order to give the material a level of rigidity that is between carbon and fiber glass.

## FIBER GLASS Silver

Fiber glass face. Lots of flexibility and comfort when striking the ball.

## MBE Multilayered Black Eva

Core of the racket build based on several layers of different materials in contrast to the classic Eva Core or Foam used in traditional rackets.

## HR3 Core

High density HR3 rubber core, with the greatest memory effect thus attaining greater hitting power.

## HR3 Black EVA

HR3 high density EVA core with maximum memory effect. This results in greater power in your shots and ball output.

## HRS Core+

The core has rubber that is even denser than the HR3. It increases the speed with which the racket core recovers its state prior to striking the ball. This rubber attains maximum power.

## HR2 Core+

Low density HR2 rubber core. Thanks to its lightness it is always used on rackets where the aim is for the ball to enter the core a little more and for it to feel softer.

## CARBON Frame

Carbon frame. By using this material in the frames we provide the frame, and racket in general, with greater rigidity and durability.

## DCS Dynamic Composite Structure

By using a greater amount of material from the frame up to four centimeters inside the racket face we minimize the difference in toughness between the frame and the face. Thus, when the ball is hit with the outer areas of the racket we minimize the possible cutting of fibers that could occur when the rubber sinks in.

## ROUGH Surface

Rough surface on the top layer of the racket face. It can be created using pre-moulded plastic or with a bath in low-grammage silica sand. This roughness attains more effective shots.

## AVS Anti Vibration System

Rubber pieces embedded in the racket frame to absorb potential vibrations that occur when the ball is not hit in the center of the racket.

## OVERSIZE Grip

Smart Strap is the Nox ultimate technology added to the new racket collection that will allow you to easily replace the cord.

## EOS Flap

Side perforations designed to increase the maneuverability of the racket and distribute the weight so that you have a fast and lethal racket in your hands.

## PULSE System

Reduction of vibrations transmitted to the player's hand with the insertion of lateral rubber bands that go from the base of the frame to the bottom of the racket.

## CUSTOMGRIP

Technology patented by NOX and certified by Testa Padel. Increases grip by 52% and reduces vibrations that are transmitted to your hand by 29%. A fully customizable system optimal for players with sweating or epicondylitis problems.

## TEXTURE 3D

Rough finish applied to the outermost layer of the racket face to enhance the spin on shots without compromising the durability of the rough texture.

## SMARTSTRAP

The Nox Smart Strap is the latest technology implemented in the new racket collection, allowing you to change the grip cord quickly and easily.

## EXCLUSIVE Spin

Innovative technology that includes two types of rough finishes on the surface of the racket face: the 3D hexagonal finish located in the center of the racket and the sandy finish on the rest. With this dual roughness, we achieve greater control and the ability to impart more spin to the ball. Molded with a low-weight silica sand bath, this roughness results in shots with more spin.

# PADEL OF THE FUTURE, NOW

## PACK AT Genius Limited Edition

Discover the new AT2 Genius LTD Edition 2024 pack, the jewel of the crown in the 2024 NOX rackets collection. A unique and limited pack, available in only 5000 units. The pack includes:

### AT2 Genius LTD Edition 2024 Racket.

Incorporating the latest technologies and new molds, with the combination of 18K Carbon and multi-layered MLD Black EVA, we provide a solid and consistent touch, perfect for your performance on the court. Additionally, with the new EOS FLAP, Exclusive SPIN+ and Pulse System technology, we enhance the maneuverability and playability of the racket, making it **faster and more precise** than ever.

The racket's grip has also been improved. On one hand, the length has been extended by 1 cm to facilitate gripping with two-handed shots. And as if that weren't enough, our patented **NOX Custom Grip®** technology, certified by Testea Padel for increased grip and vibration reduction, comes standard with the racket. A system entirely customizable to the dimensions of your hand.

**Two elegant black NOX wristbands** with the logo in silver color.

**Two overgrips and two Smartstrap® safety straps** with exclusive designs, so you can customize your racket to your liking.

A **keychain replica of the AT2 Genius LTD Edition 2024 racket** exclusively designed for the LTD pack.

### Certified Quality

Testea Padel certifies the quality of this padel racket against breakage of the frame and the faces of the racket as well as the durability of the product against fatigue.

### CHARACTERISTICS:

|        |                  |
|--------|------------------|
| Weight | 360 - 375g       |
| Width  | 38 mm            |
| Frame  | Carbon           |
| Core   | MLD Black Eva    |
| Layers | Carbon Fiber 18K |
| Shape  | Teardrop         |

### SECURITY

With the new sequential security code we will know the source of the racket and the retailer who sold it in order to control the chain of distribution of the product.

## AT10 Luxury GENIUS 18K Alum by Agustín Tapia

The new padel racket of Agustín Tapia for the 2024 season is a total technological revolution. New mold, new materials and new technologies for you to feel today the padel of the future.

### More balance, more speed

The edges of the profiles have been profiled to increase aerodynamics, the grip has been lengthened to facilitate grip, but what stands out most is the incorporation of EOS Flap technology, side perforations designed to increase the manageability of the racket and distribute the weight distribution so that you have a fast and lethal racket in your hands.

### Comfortable, solid and reliable

The new combination of materials, with the 18K aluminized 18K Alum carbon fiber in communion with the multilayer core MLD Black Eva gives it a very comfortable feel while preserving a solid feel and intermediate hardness.

In addition, the properties of the aluminized carbon fiber are more resistant to temperature changes, reducing changes in the feel of the racket caused by temperature changes.

### Less vibration, more grip

The handle of the racket is the point of union between your body and your racket and for this reason we have also paid special attention to this area of the racket. On the one hand we have incorporated the Pulse System technology, two rubber bands designed to absorb vibrations. In addition, now as standard the entire Luxury range incorporates the patented NOX Custom Grip technology® and certified by Testea Padel to increase grip and reduce vibrations.

It includes the pioneering system of replaceable safety laces. Smartstrap®, now evolved into a compact piece for increased strength and safety. More hygienic, safer and more customizable.

### Certified Quality

Testea Padel certifies the quality of this padel racket against breakage of the frame and the faces of the racket as well as the durability of the product against fatigue.

## AT10 Luxury GENIUS 12K by Agustín Tapia

Designed with Agustín Tapia for the 2024 season, it is a total technological revolution. New mold, new materials and new technologies for you to feel today the padel of the future.

### More balance, more speed

The edges of the profiles have been profiled to increase aerodynamics, the grip has been lengthened to facilitate grip, but what stands out most is the incorporation of EOS Flap technology, side perforations designed to increase the manageability of the racket and distribute the weight distribution so that you have a fast and lethal racket in your hands.

### Comfortable, solid and reliable

The new combination of materials, with the 12K carbon fiber in communion with the multilayer core MLD Black Eva gives it a very comfortable feel while preserving a solid feel and medium-high hardness.

### Less vibration, more grip

The handle of the racket is the link between your body and your racket, which is why we have also paid special attention to this area of the racket. On the one hand we have incorporated the Pulse System technology, two bands designed to absorb vibrations. In addition, now as standard the entire Luxury range incorporates the patented technology NOX Custom Grip® and certified by Testea Padel to increase grip and reduce vibrations. It includes the pioneering system of replaceable safety laces. Smartstrap®, now evolved into a compact piece for increased strength and safety. More hygienic, safer and more customizable.

### AT10 Luxury Genius 18K Alum or 12K?

Both rackets have been designed together with the Mozart of Catamarca, Agustín Tapia. Both the 18K Alum and the 12K share the same mold, core and technologies, the only difference between them being the face material. Which one to choose? Our recommendation: AT10 Luxury Genius 18K Alum if you are looking for an intermediate feel and AT 10 Luxury Genius 12K if you are looking for a stiffer feel.

### Certified Quality

Testea Padel certifies the quality of this padel racket against breakage of the frame and the faces of the racket as well as the durability of the product against fatigue.

## ML10 PRO CUP Luxury. Miguel Lamperti's racket

The revolution of a classic. Awarded in 2023 as Best Hybrid style racquet with predominance of control by Testea Padel, the ML10 Pro Cup Luxury 2024 by Miguel Lamperti incorporates modifications in the mold and new technologies to make it the classic of the future. But with the classic NOX HR3 rubber, the one preferred by the "Canoso" from Bahía Blanca.

### More balance, more speed

The edges of the profiles have been profiled to increase aerodynamics, the grip has been lengthened to facilitate grip, but what stands out most is the incorporation of EOS Flap technology, side perforations designed to increase the manageability of the racket and distribute the weight distribution so that you have a fast and lethal racket in your hands.

## LA10 Future by Leo Augsburger

LA10 Future 2024. Leo Augsburger's Racket

If something defines Leo Augsburger's playing style, it's aggressiveness. Leo doesn't speculate; he goes all out, and if the ball flies even an inch higher than it should, you're in trouble. If you identify with this direct, fast, and powerful playing style, then you'll find your ideal racket in the LA10 Future. It's a diamond-shaped padel with EV50 rubber enhanced by 12K Aluminized Carbon Fiber. Additionally, it incorporates the AVS lateral anti-vibration system and faces with a rough finish to facilitate spin shots.

All of this in a spectacular design that combines visible carbon, silver accents, and red details.

### Certified Quality

Testea Padel certifies the quality of this padel racket against breakage of the frame and the faces of the racket as well as the durability of the product against fatigue.

## TL10 Future by Tino Libaak

TL10 Future 2024 - Tino Libaak's Racket

Designed for one of the most promising young drive players, Tino Libaak. A teardrop-shaped racket that stands out for its adaptability to various match situations, allowing you to handle play from the baseline with a powerful ball exit thanks to the EV50 core. Simultaneously, it is quick and maneuverable at the net, where Tino unleashes his potential with lightning-fast backhand volleys, now enhanced by the 12K Aluminized Carbon Fiber.

### Certified Quality

Testea Padel certifies the quality of this padel racket against breakage of the frame and the faces of the racket as well as the durability of the product against fatigue.

## VK10 Future by Aranzazu Osoro

Introducing the new Nox VK10 FUTURE 2024 Racket, Aranzazu Osoro's Racket.

The new VK10 retains aspects of its predecessor, such as the round format and the high-reactivity EV50 rubber for controlling the game from the back of the court. However, it introduces a new feature with a finish in 12K Aluminized Carbon Fiber for a comfortable and solid feel.

The VK10 FUTURE includes the pioneering Smartstrap® replaceable safety cord system. It enhances the hygiene and safety of your racket by allowing you to easily replace the cord without voiding the warranty, as there is no need to manipulate the bottom cap. More customization options at your fingertips!

### Certified Quality

Testea Padel certifies the quality of this padel racket against breakage of the frame and the faces of the racket as well as the durability of the product against fatigue.

### CHARACTERISTICS:

|        |                 |
|--------|-----------------|
| Weight | 360 - 375g      |
| Width  | 38 mm           |
| Frame  | Carbon          |
| Core   | EV50            |
| Layers | Carbon Alum 12K |
| Shape  | Round           |

### SECURITY

With the new sequential security code we will know the source of the racket and the retailer who sold it in order to control the chain of distribution of the product.

## AT Pro Cup Genius

What if we were to combine the materials from Agustín Tapia's AT10 mold with the classic Miguel Lamperti ML10 Pro Cup? It would result in an absolutely insane racket. The AT Pro Cup brings together the standout features of both: it's as maneuverable and quick as the AT10, yet comfortable and solid like the ML10.

It includes the replaceable Smartstrap® safety cord system, now evolved into a more compact piece for increased strength and safety. It's more hygienic, more secure, and more customizable.

### Certified Quality

Testea Padel certifies the quality of this padel racket against breakage of the frame and the faces of the racket as well as the durability of the product against fatigue.

### CHARACTERISTICS:

## ML10 Pro Cup Rough Surface edition

The total racket. Once tested, nobody wants to quit using it: comfortable, solid, powerful and durable. It is identical in all aspects to its sister ML10 Pro Cup with the exception of the face finish as the ML10 Pro Cup Rough 2023 incorporates silica sand on the faces for greater spin on the shots.

This padel racket includes the pioneering Smartstrap® replaceable safety cord system, now evolved into a compact piece for greater security and durability. More hygienic, safer and customizable.

### Certified Quality

Testea Padel certifies the quality of this padel racket against breakage of the frame and the faces of the racket as well as the durability of the product against fatigue.

### CHARACTERISTICS:

|        |                       |

## ML10 Pro Cup Coop

The total racket. Once tested, nobody wants to quit using it: comfortable, solid, powerful and durable. The ML10 Pro Cup Classic 2023 is a padel racket suitable for any type of player. If you have doubts when buying a racket, the Pro Cup will never disappoint you. It is one of the best selling rackets in history and the first racket developed by Miguel Lamperti. A true classic.

This padel racket includes the pioneering Smartstrap® replaceable safety cord system, now evolved into a compact piece for greater security and durability. More hygienic, safer and customizable.

### Certified Quality

Testea Padel certifies the quality of this padel racket against breakage of the frame and the faces of the racket as well as the durability of the product against fatigue.

## ML10 Pro Cup Silver

The total racket. Once tested, nobody wants to quit using it: comfortable, solid, powerful and durable. The ML10 Pro Cup Silver 2023 is a padel racket suitable for any type of player. If you have doubts when buying a racket, the Pro Cup Silver will never disappoint you. It is one of the best selling rackets in history and the first racket developed by Miguel Lamperti. A true classic.

100% identical to the ML10 Pro Cup, the ML10 Pro Cup Silver 2023 has a lower weight range to adapt to the strength of female players.

This padel racket includes the pioneering Smartstrap® replaceable safety cord system, now evolved into a compact piece for greater security and durability. More hygienic, safer and customizable.

### Certified Quality

Testea Padel certifies the quality of this padel racket against breakage of the frame and the faces of the racket as well as the durability of the product against fatigue.

## EQUATION Advanced

The best padel racket for intermediate-level players in 2022, according to the prestigious Swedish product evaluation firm Testfakta.

The EQUATION Advanced combines maneuverability, control, and precision with a great feel and an extensive sweet spot provided by the combination of rubber used in professional paddles. It features a medium balance, a carbon frame, and an anti-vibration system to protect players from injuries.

The rough texture of its faces, achieved through 3D transparent sheets, will help players impart greater spin to their shots.

It also includes the replaceable Smartstrap® safety cord system, now evolved into a more compact piece for increased strength and safety. It's more hygienic, more secure, and more customizable.

### Certified Quality

Testea Padel certifies the quality of this padel racket against breakage of the frame and the faces of the racket as well as the durability of the product against fatigue.

### CHARACTERISTICS:

|        |                |

## EQUATION Light Advanced

The best padel racket for intermediate-level players in 2022, according to the prestigious Swedish product evaluation firm Testfakta.

The EQUATION LADY Advanced combines maneuverability, control, and precision with a great feel and an extensive sweet spot provided by the rubber combination used in professional paddles.

The Equation Lady Advanced features a medium balance, a carbon frame, and an anti-vibration system to protect players from injuries. The "Lady" version is exactly the same as the Equation Advanced, with the only modifications being cosmetic and the available weight range (lower) for the racket.

The rough texture of its faces, achieved through 3D transparent sheets, will help players impart greater spin to their shots.

It also includes the replaceable Smartstrap® safety cord system, now evolved into a more compact piece for increased strength and safety. It's more hygienic, more secure, and more customizable.

### Certified Quality

Testea Padel certifies the quality of this padel racket against breakage of the frame and the faces of the racket as well as the durability of the product against fatigue.

## SILHOUETTE Casual

Racket specially designed for players who are starting out in padel or at an intermediate level. The SILHOUTTE 2023 is an oversized round padel racket that provides a larger sweet spot for greater control on slightly over-centered shots. Manufactured with a slightly lower weight range for greater maneuverability and a longer grip length to facilitate two-handed strokes.

### Certified Quality

Testea Padel certifies the quality of this padel racket against breakage of the frame and the faces of the racket as well as the durability of the product against fatigue.

### CHARACTERISTICS:

## AT10 Genius Ultralight

Introducing the new AT10 Genius Ultra Light 2023 the "younger sister" of Agustín Tapia's AT Genius arena.

The AT10 Genius Ultra Light 2023 is a racket especially suitable for:

Players who, due to physical conditions (epicondylitis, arm injuries, etc ...), want to play with a racket of reduced weight.

Junior players who wish to play with a racket of standard dimensions but with a handle adapted to their hand size.

Surprising power, agility, strength and ball output of this closed heart padel racket made with ultralight materials to reach weights between 300 and 325 gr.

### Certified Quality

Testea Padel certifies the quality of this padel racket against breakage of the frame and the faces of the racket as well as the durability of the product against fatigue.

### CHARACTERISTICS:

|        |                |
