Comment	Best in test	Relatively good control and comfort with high striking power. Maintained characteristics after endurance testing. Very durable racket face.	Relatively good control and comfort. Maintained striking characteristics after endurance testing.	Easy to control and relatively good comfort. Limited striking power.	More difficult to control due to smaller sweetspot. High striking power. Durable frame and face, but very large change in characteristics after endurance testing.	More difficult to control and less comfortable due to hardness and relatively small sweetspot. High striking power. Durable frame.	More difficult to control and less comfortable due to hardness and relatively small sweetspot. Large change in striking characteristics after endurance testing.
Detail	Easy to control and good comfort for the player. Softer racket with large sweetspot. Low ball rebound but relatively high striking power. Durable frame and maintained striking characteristics after endurance testing.	Medium hard racket with relatively large sweetspot. Relatively high striking power. Very durable racket face and maintained striking characteristics after endurance testing.	Soft to medium hard racket with larger sweetspot. Low ball rebound and low vibrations. Relatively high striking power. Somewhat less durable frame but maintained striking characteristics after endurance testing.	Medium hard racket with large sweetspot. Higher ball rebound and low vibrations. Limited striking power.	Medium hard racket with smaller sweetspot. Somewhat heavy to handle. Balance towards upper side of the racket. High striking power. Durable frame and face, but very different characteristics after endurance testing.	Harder racket with smaller sweetspot. Somewhat heavy to handle. Balance towards upper side of the racket. Durable frame.	Hard racket with smaller sweetspot. Higher ball rebound. Feels somewhat heavy to handle. Balance towards upper side of the racket. Somewhat less durable frame. Large change in striking characteristics after endurance testing.

*) The striking surface of the Bullpadel racket broke during the endurance test. A second sample passed the test without breakage.
