

Cover Plate & Protective Cap Utility Tool for Concealed Sprinklers

The cover plate installation tool allows the safe, quick installation and removal of cover plates for LFII and RFII concealed sprinklers. The integral threads in the top of the tool also allow for easy removal of sprinkler protective caps. This design features a thumb-tightened screw and can accommodate a threaded painter's pole or straight length of 1" CPVC, allowing the installer to install and remove caps and plates safely without the need for ladders. Can be used with all LFII and RFII concealed sprinklers.

Features & Benefits:

- Designed for versatility
- Can be mounted onto a painter's pole or straight section of 1" CPVC
- Thumb-tightened screw assures positive connection to CPVC
- One-piece molded design eliminates stress points
- Thicker foam protects cover plate finish
- Used with cover plates and protective caps for the following sprinklers: TY2524, TY3531, TY3532, TY3551, TY3596

- Designed for Additional Versatility
- Install and Remove Cover Plates for LFII and RFII Concealed Sprinklers
- Also Used for Removing Protective Caps

Used with the following
sprinkler SINS:

TY2524

TY3531

TY3532

TY3551

TY3596

Protective Cap
