

// It all starts and ends in the garage: that project you're planning, a day in the sun, or a weekend getaway.

For people who see their garage as a launchpad for adventure and as a place to get work done, Garage Smart is the home automation and organization solution that reduces clutter and produces easy access to tools, recreation equipment and sports gear while maximizing floor space. Powered by smartphone apps, Garage Smart lifting solutions and accessories add functionality, simplicity and satisfaction to any garage space.

At **Garage Smart** our founder, Jerome Miles, and team have designed products that will fundamentally change the way you experience and use your garage space through innovative solutions to overhead storage and everyday tooling needs.

Our **vision** of a smart and usable garage begins with our smart motorized overhead lifting solutions. We have developed lifting products for almost anything you can imagine from motorized smart lofts, bikes, paddle sport equipment, to kids' ride on toys, and so much more.

In continuing with the idea of a smart garage through the development of smart products that handle your everyday needs, we started developing a new line of smart garage products that turned into a full suite of overhead smart garage products. We've developed all these products to meet your everyday garage needs, and with your ease of use in mind. Our goal is to develop smart products that are easy to install and use, all while providing you with a functional, organized, and usable garage space. This led us to create the **Smart Track** mounting system. These products are designed to meet the majority of garage product and storage needs and are a must for anybody that aspires to have a smart garage.

We are constantly adding to our product lineup and improving our current products, and we will continue to develop easy to install systems. Our engineering team has created an exciting product roadmap, which will allow us to continue to release new smart products for the next several years. Stay tuned to see what we create next!

Q&A

What Is The MyLifter? //

The MyLifter is a smart winch used for overhead garage storage. It is the main component in all of our lifting kits. The winch is controlled with a smartphone or tablet.

How Much Weight Can The MyLifter Lift? //

The MyLifter is engineered to lift 50 lbs. by itself. When it is combined with the pulley accessory, the maximum lifting capacity increases to 100 lbs. Also, Lifters are designed to work together to lift heavier objects. Link up four Lifters to lift up to 400 lbs.

What Devices Is The MyLifter App Compatible With? //

The majority of iOS/Android Devices.

How Long Is The MyLifter's Cable? //

The Lifter cable length is approximately 24 feet. This allows you to hoist items on ceiling heights ranging from 8 to 16 ft. when using the included pulley or bracket.

How Does The MyLifter Compare To Other Overhead Garage Storage Systems? //

The MyLifter turns regular overhead garage storage into motorized overhead garage storage. Each system eliminates heavy lifting and allows you to store your belongings in the unused space in your garage.

Where Can Garage Smart Products Be Purchased? //

We sell and ship in the United States at GarageSmart.com

Basic Lifter //

The Basic Lifter is a motorized hoist designed for overhead garage storage. It is controlled with your smart device, allowing you to safely store your items off the garage floor and onto the ceiling, without lifting more than a finger. It is smart, easy to use, and most importantly it's safe.

Universal Lifter //

The Universal Lifter adapts to your garage storage needs. It is versatile, balanced, and safe. Store your cargo carrier, kids ride on toy, bike, paddle sports gear, and more.

Multi-Bike Lifter //

The Multi-Bike Lifter is your solution for garage bike storage. It keeps your bikes safe and secure, while allowing you to access them whenever you're ready to ride.

Platform Lifter //

The Platform Lifter is a motorized garage storage lift. It is your solution for keeping your items organized, elevated, and safe. Use it to store your equipment, outdoor gear, boxes, holiday decorations, outdoor gear, and more.

Hard Top Lifter //

The Hard Top Lifter is the best way to remove your Jeep® top. It is quick, easy, and safe. The internal lock won't slip or fall, keeping you, your family, and your vehicle protected. You'll be free to cruise in a matter of minutes. Enjoy your Jeep® more!
