

STASHER'S LITTER-FREE LUNCH TIPS

The average U.S. family uses about 500 single-use sandwich bags per year — which adds up to 40B per year nationwide! That's enough to circle the earth 150x. Yowza!

Switching to a reusable lunchbox could save over 180 disposable brown lunch bags each school year. From K-12, that adds up to more than 2k per student.

Here in the U.S. we throw away more than 60M plastic water bottles each day. Each DAY! And — major bummer — most of them never get recycled.

The average American uses 1.6 straws per day. When you add them all up, it's enough to circle the equator $2\frac{1}{2}$ x every day!

Let's break down the stats on single-use utensils. They're the 7th most littered plastic in our natural environment — and take 1,000 years to break down.

Things like cardboard pizza boxes, veggie peels, fruit cores, egg shells, and grass cuttings add healthy moisture and nitrogen back to the soil.

Your lucky numbers are 1-7! Look for this label on things like newspapers, food cans, foil, glass, milk cartons, and plastic containers to be sure they're recyclable. Don't forget to clean them out first!

Only toss things that can't be recycled or composted. That includes frozen food boxes, chip bags, candy wrappers, and coated disposable cups.
