Milo is Back!

Thank You so much for giving me a reason to smile. My 14 yr old pug-son, Milo has been on so many different pain pills, shots, and other supplements. Nothing seemed to give him much relief. Just getting him outside to go to the bathroom was almost impossible. I found your product on the internet and was lead to purchase the Cetyl M for dogs. Milo has been on it for 2 weeks, taking two a day.

THANK YOU FOR GIVING MILO BACK TO ME. He is doing GREAT. I am amazed at the difference in my dog. I am so grateful to you for helping me to help Milo. - Trudy Bock

We found Cetyl M!

We are fortunate to share life with Scout, a beautiful, 6-1/2 year, 90 lb., female, German Shepherd. Scout was depressed, definitely not herself. Thoughts of putting her down were heart breaking. Immediate internet research for her condition led us to Cetyl-M Joint Supplement Dog. Scout's condition was diagnosed on August 29, 2012, 6 weeks later, consistently giving her Cetyl-M at the recommended dosage ... she is 100% better. She actually runs, trots and moves with obvious ease. Our hearts are singing as Scout's improvement is not only amazing but continues each day! We are pleased beyond words rating Cetyl-M along with the "elixirs of the gods." We realize there are no magic cures but this appears to be close. Scout progress not only continues but she is returning to her happy self. Can't thank you enough for making this product available!!! Again our most grateful appreciation for your product!!! -Ruth Moyer, Scout and Family

MY DOG MAGGIE

If ever there were a dog evangelist for Cetyl M it is Maggie. She's 17. She hops into our ranch utility vehicle, chases a 7 year-old corgie, trails around our ranch and for all intents and purposes is a happy, active ranch dog. If Maggie were a chihuahua that might not be too surprising. But she's a large breed Australian Shepherd who is a few pounds over weight. But this hasn't always been the case for Maggie. About 5 years ago my husband and I both were concerned when we realized Maggie was having trouble getting up from her snoozes in the kitchen. At first we thought that perhaps she'd jumped out of the utility vehicle and landed badly. But it didn't get better. I can't even remember where I had heard about Cetyl M but we decided to give it a try. After 3 weeks we were amazed at how much better she seemed. Well that was 5 years ago and Maggie is stronger than ever. If Maggie understood how much Cetyl M has meant for her health and activity she would want to be to be a Cetyl M spokes dog. -Eric

Great Product

I came across Cetyl M a little over 3 years ago and decided to give it a try. Within a month, we started to see a huge difference. Bandit was 8 years old at the time, and I now recommend it to everyone with a dog and even to my horse friends. I can't thank you enough for such a wonderful product that really works. Bandit thanks you too! - Kelly

Cetyl M® Success All- Around

"I recently bought some Cetyl M® to try on my dogs, horses & myself. I saw your booth at Horse Expo at the Pomona fairgrounds & thought I'd give the stuff a try. I really don't understand how the stuff works exactly but it is amazing. In only these few days since I purchased Cetyl M® on Thursday, my neck feels wonderful. It doesn't crack every time I move it anymore and I keep thinking, how can this be? Additionally, my old foxtrotter is cracking less, and my old dogs are moving much much better. All this improvement and we have only been using your product since Thursday night, and it's only Monday morning. Wow!"

-Vicki Earl

Cetyl M® Provides Improvement for All

"I just re-ordered more Cetyl M®. My 13 yr old yellow lab is still going. She seems stronger in the hind end, her hips still look pretty crooked, but I didn't expect that to change. She has a routine that we call 'her walk-about' and amazingly she is still at it. She does this morning and evening and goes out all around the 6 acres checking everything out. I will definitely keep her on it.

However, the biggest difference I see is in my 22 yr old Arabian gelding with the ringbone. After he finished out the Farnam liquid product that I already had, I switched him over to your product. Which being a powder is so much nicer, and less mess. I saw much more improvement with your product over the other one. Because he had been on another brand, I started him at the regular single dose. Wow there are some days you have to look real hard to see if he gives at all on the foot. Which had gotten worse over the last year, but boy that really made a difference. I trail ride with a retired veterinarian friend and she rides him, and we take him to a local wilderness area that isn't very hilly, and we are in the saddle at least 5 hours when he goes. We use the Cetyl cream before we head out on the trails on those days, which adding the cream also made a difference.

So I am very pleased with the product and will definitely keep using it. My friend also has RA very bad, and she uses the cream on her hands and loves it.

Thank you"?

- Robin King

Great Product and Customer Service

"I'd like to tell you how much we appreciate Cetyl M® – our Golden Retriever, Hobbes, was diagnosed with severe arthritis at the age of 11. We started taking him for physiotherapy and were also using some holistic products and he was doing fine. The girls at The Canine Fitness Centre where we went for physio found your product and so we started Hobbes on it. It was amazing for him. He made it to 15 before having to go on Metacam for his arthritis. We lost him at 15 ½ but we know we wouldn't have had those extra years with him if it wasn't for the physio and your product.

We now have two Leonberger crosses and they are very active (we back onto a field where they run and chase gophers, always at full speed!) so when we were having issues with our male's wrist we decided to get him on Cetyl M® rather than just straight glucosamine and he is doing great. We have our female on it as well.

Thanks again for getting back to me (within an hour!) – it's nice to know your customer service is as good as your products!"

- Kathy Armes

Muffin is Normal Again

"Just wanted to tell you my success story. My 11 year old Bichon-Poo named Muffin started limping on her left rear leg in approximately 12/2011. I had a strong feeling it was arthritis but hadn't purchased any products to try to help her. While at a NAVC convention in March of this year I came across a vendor who showed a video of a dog who was unable to walk on his back legs and after using Cetyl M® for two months, he was walking normal again. I

started Muffin out on two tablets each day, and after using up the two-month supply, I noticed a very minimal improvement on Muffin. I decided to purchase another bottle and continued treatment at two tablets a day. After two more months of treatment, Muffin was limping only after she would get up from a nap. Since she showed improvement, I went ahead and purchased another bottle and changed her dose to 1 tablet each day. I am half-way into the third bottle, and Muffin is no longer limping and she has more energy and appears to be cured from her pains. It was so sad to see her in pain, and now I am very happy to see her normal again. Thank you so much for making this product available to us." - Richard Di Fabio and Muffin

Cetyl M® Provided Improvement that Glucosamine Alone Could Not Provide

"I have to tell you what a wonderful product Cetyl M® for dogs is! Our Great Dane, Tina, suffered torn ligaments in both hind legs. We were able to afford the orthopedic surgery for one of her hind legs but just could not afford to repair the other leg. As a result she always favored that hind leg. She had notable joint limitations and her pain was noticeable when she had to get up or move in certain ways. We have always had her on a glucosamine supplement, but I decided to try Cetyl M®. Oh my, what a wonderful change in this dog! Tina is moving and romping like she never has before! The improvement was notable in 2 days after she started the Cetyl M®. I plan on keeping her on this for the rest of her life. It has been a miracle for her. Thanks for the great product."

No More Dinosaur Tracks

"Our 10-year-old German shepherd, Meggie, had been dragging her back legs. She was leaving 'dinosaur tracks' in our back yard, as my son called the drag marks she left from dragging her back legs. We tried several suggestions from our vet to no avail. Then one of our friends pointed us to your website. I purchased a bottle of Cetyl M®. We started to see results after the first 24 hours! After less than a week, Meggie is running and chasing our collie around the yard. Wow! Thanks Cetyl M®."

Bubba Plays Like a Puppy Again

"I have a 10-year-old half Chow male dog that was in very bad shape with hip problems. I saw Cetyl M® for dogs, bought some this month and he has really improved. He had to take shots for years due to his problem, but now he runs and plays like a puppy again. Thank you for making something that works for him. Bubba loves to take his pill every day; he knows it makes him feel better."

Vet Astonished By Results

"My vet told me to 'face the fact' that my 14-year-old dog Jesse was probably going to die. Jesse was falling down after just a few steps and could not get up by himself. He has suffered from arthritis in his back and hips for years. He began to really fail this winter, was vomiting a lot, falling down, seemed to be in pain and wasn't interested in anything — food, treats, playing, etc. He had lost a considerable amount of weight. We had to keep him in the house because he was so bad. We put him on Cetyl M® and within three days he was actually getting up by himself. After a week he was wagging his tail, something he had not done in about six months. It's been about two months now and he is almost back to normal. He has regained weight, can take daily walks outside, prances and wags his tail, plays with our other dog as much as he's able and is happy and interested in life again. Our vet was astonished when I told him how well he is doing. Every one that sees him can't believe he's doing so well. Cetyl M® is a MIRACLE! Thank You so much!"

Owner Has More Years with Golden Retriever

"I want to thank you for such a wonderful product. Over the past year and since our last vet visit last July, I noticed that our 7-year-old Golden Retriever, Flash, was getting slower to get up. He'd even sometimes look as if his back legs might go out on him if he had been lying down for a while. While we were away on vacation, our house sitters called to say that he couldn't get up the back seven steps to the upper part of our back yard. I was devastated to see him in such bad shape as it was all coming on quite quickly. I immediately put him on a high dosage of omega-3 oils and glucosamine/chondroitin for a few weeks. It made no noticeable change so I found your product. I put him on four Cetyl M® tablets a day for two weeks and found a remarkable change within this time period. I then dropped his dosage to two pills per day and have continued with the program for the past four months. I couldn't believe my eyes as I didn't believe in 'miracle products.' I do now! I truly believe Cetyl M® has given us more years with our dog. He is pain free as far as we can see and has incredible mobility. I wouldn't have believed it if I hadn't seen it with my own eyes. Thanks a million."

15-Year-Old German Shepherd Gets "Second Life"

"Advanced Cetyl M® has worked a miracle for our 15-year-old German shepherd Idgy. She was limping badly because of hip dysplasia. Her hips would just collapse sometimes. We tried giving her straight glucosamine, but it had no effect. We put her on Advanced Cetyl M® and it has given her a second life. It's an amazing product. And she really likes the flavor of the chewable tablets. Eats them right up, no problem. Thank you for having such a great product."

*-Kim Rose
Lakewood, CO*

Visible Results in Less Than a Week

"Advanced Cetyl M® has been very beneficial for my dog. Moe is ten years old and weighs 72 pounds. Moe had been limping from a spinal problem and his hips were tightening up. I put him on a course of Advanced Cetyl M® and started noticing changes in just under a week. I noticed definite improvement in three weeks. I'm really happy with Advanced Cetyl M® and recommend it to my friends and neighbors."

*-Georgene Burton
Vail, CO*

Not ready to retire

"My wife and I raise working stock Australian Shepherds. About a year ago, Ring, my wife's 13-year-old female Aussie, started getting very stiff and having a hard time getting around. We've had several litters out of Ring and resigned ourselves to the fact she would need to be retired. We saw your Advanced Cetyl M® commercial for dogs on RFD TV and decided to give it a try. After a month or so Ring was running with the pack and acting like she was a puppy again...After two more litters, Ring is in excellent health and we're considering breeding her again next spring."
