

### **A Horse of Course**

Recently a long time client came in to the clinic to pick up some meds, a client i rarely see in person. He stopped and told me "Thank you for saving my horses life". I gave him a puzzled look and he explained that nine years ago he took his horse to MSU. They said the humane thing would be to euthanize her because of discomfort. He said he was not ready so he brought her home and called me at the clinic the next day. He said at that time I recommended he try Cetyl-M instead of pumping her full of Bute. I explained how I used it for my dog and had fantastic results and that it was worth a try. Nine years later she (Cassie) is still going strong and doing better than ever! He said Cetyl-M has been a miracle life saver for her! I wish you could have seen his face - tears in his eyes.

No one needs to convince me of the benefits of Cetyl-M, I give it to all three of my dogs, one of which is in a wheel chair. It was just so touching to have him come in and thank me. When actually Cetyl-M deserves the thanks! Great job guys! Great product! -Mindy M

### **Cetyl M WOW!**

I have a 16 year old quarter horse gelding, Poco, that I rescued 6 years ago. He was put on a joint supplement and prescribed orthopedic shoeing. Over the past year and a half he got progressively worse and worse. This last December he was on 4 supplements for his joint health, still wearing orthopedic shoes, and had been put out to pasture with the other older horses who were 5-10 years his senior. His muscles had withered away because he would avoid moving if he could. We moved him 2 hours north with us, where it is much colder in the winter. He was being buted more days a week than not. I was running out of options and fearing that it was only time before I would have to put my beast friend to sleep. However when the new farrier came to do his first trim on Poco, he suggested we try CetylM. We gave it a try and I am happy to say I have my best friend back. We loaded him for a month and he has been on normal dose for 6 more weeks and he is a different horse. He races around the pasture at full gallop with 5 horse 10 years his junior, and happily races laps with the barrel racing prospect he is pastured with. He hasn't had bute once since starting CetylM and he happily goes to work at all three gaits. We have started working towards showing in a couple shows this summer. Last week while lunging, I gave him the option to hop a low cavaletti and he cantered over it like it was no big deal and continued to do so till I stopped him. We have pulled his orthopedic shoes and slowly stopped his other supplements as they ran out and he still continues to get better and better. I now recommend CetylM to everyone I know and Poco has become the local poster child for CetylM's magic. I cannot thank you enough for this wonderful product. It is the best thing that has happened to us and hope anyone with a pet will find your product and let it bring back the joy of life for their pet like it has done for my boy.

I just wanted to update you on Poco. He has been on a daily dose of cetyl m for 6 months now and is better than ever! He is jumping cross rails, placing at shows and going out on long trail rides. People are guessing his age to be around ten years younger than before he started cetyl m and no one at shows believes me when I tell them how old he really is. He happily works an hour a day 6 days a week. He still hasn't had any bute and the farrier that recommended cetyl m is amazed at how much better he is doing at every visit. He now recommends it to all his other clients. - Emily M

### **Cetyl M® Health**

"I put all of my horses, from my seasoned pro rodeo horses to my younger colts on Re-Vitalize when I go on the road. Traveling for long or even short periods of time is stressful for horses, and being exposed to many different elements can easily put my horses at risk. Re-Vitalize helps support their immune systems and keep them happy and healthy when going all over the country, rodeo to rodeo. So far, Re-Vitalize has maintained my horses' health since adding it to their care regimen!

I trust it to take care of my best horses!" - Kelly Allen

### **Cetyl M® Success**

I've been using Response Products' Cetyl M on my horse for around 4 years. The mare I currently own has been on it since we brought her 3 years ago. She turned 20 this year, and she has never ran better! When we first brought her home, we knew that keeping her the healthiest she could possibly be was the most important thing for her health since we compete almost every weekend. We researched and scoured the internet for a supplement that could do it all. Once we found Cetyl M, we knew that was the only supplement we wanted her on!

-Haley Dick

### **Cetyl M® Provides Improvement for All**

"I just re-ordered more Cetyl M®. My 13 yr old yellow lab is still going. She seems stronger in the hind end, her hips still look pretty crooked, but I didn't expect that to change. She has a routine that we call 'her walk-about' and amazingly she is still at it. She does this morning and evening and goes out all around the 6 acres checking everything out. I will definitely keep her on it. However, the biggest difference I see is in my 22 yr old Arabian gelding with the ringbone. After he finished out the Farnam liquid product that I already had, I switched him over to your product. Which being a powder is so much nicer, and less mess. I saw much more improvement with your product over the other one. Because he had been on another brand, I started him at the regular single dose. Wow there are some days you have to look real hard to see if he gives at all on the foot. Which had gotten worse over the last year, but boy that really made a difference. I trail ride with a retired veterinarian friend and she rides him, and we take him to a local wilderness area that isn't very hilly, and we are in the saddle at least 5 hours when he goes. We use the Cetyl cream before we head out on the trails on those days, which adding the cream also made a difference.

So I am very pleased with the product and will definitely keep using it. My friend also has RA very bad, and she uses the cream on her hands and loves it.

Thank you"

- Robin King

### **Cetyl M® Success All-Around**

"I recently bought some Cetyl M® to try on my dogs, horses & myself. I saw your booth at Horse Expo at the Pomona fairgrounds & thought I'd give the stuff a try. I really don't understand how the stuff works exactly but it is amazing. In only these few days since I purchased Cetyl M® on Thursday, my neck feels wonderful. It doesn't crack every time I move it anymore and I keep thinking, how can this be? Additionally, my old foxtrotter is cracking less, and my old dogs are moving much much better. All this improvement and we have only been using your product since Thursday night, and it's only Monday morning. Wow!"

-Vicki Earl

### **Palomino Gelding Shows Big Change**

"I just had to tell you how pleased I am with your product! My 20-year-old Palomino gelding was really having some hip problems. The farrier even had trouble getting him to pick up his back feet because it was so painful. Poor Boomer would actually cry out in pain. After only eight weeks, he is running and playing like his old self again. Even the farrier noticed a big change ... no pain and Boomer just lifted his legs for him, which he hadn't done in quite a while. Thank you for developing Cetyl M®, and Boomer thanks you too!"

Sylvania, GA

### **My Best Friend is Back**

"I have a 16 year old gelding, Poco, that I rescued 6 years ago. 4 years ago he was diagnosed with degenerative joint disease in both front coffin joints. He already had arthritis in one of his hocks from an encounter with a barb-wire fence as a baby. The vet told us that exercise was good for him but that he would always have a limp and he couldn't run contesting events or jump anymore. He was put on a joint supplement and prescribed orthopedic shoeing. Over the past year and a half he got progressively worse and worse. This last December he was on 4 supplements for his joint disease, still wearing orthopedic shoes, and had been put out to pasture with the other older horses who were 5-10 years his senior. His muscles had withered away because he would avoid moving if he could. We moved him 2 hours north with us, where it is much colder in the winter. He got so bad that when turned out on hard ground he would inevitably come in lame but if left stalled he would stalk up. To counter act this we tried lunging him but he had to be buted every time and was still extremely lame. He was being buted more days a week than not. I was running out of options and fearing that it was only time before I would have to put my best friend to sleep because of his pain.

However when the new farrier came to do his first trim on Poco, he suggested we try Cetyl M®. We gave it a try and I am happy to say I have my best friend back. We loaded him for a month and he has been on normal dose for 6 more weeks and he is a different horse. He races around the pasture at full gallop with 5 horse 10 years his junior, and happily races laps with the barrel racing prospect he is pastured with. He hasn't had bute once since starting Cetyl M® and he happily goes to work at all three gaits. We have started working towards showing in a couple shows this summer (In his last show 3 years ago he was DQ in showmanship for lameness). Last week while lunging, I gave him the option to hop a low cavaletti and he cantered over it like it was no big deal and continued to do so till I stopped him. We have pulled his orthopedic shoes and slowly stopped his other supplements as they ran out and he still continues to get better and better.

I now recommend Cetyl M® to everyone I know and Poco has become the local poster child for Cetyl M®'s magic. I cannot thank you enough for this wonderful product. It is the best thing that has happened to us and hope anyone with a pet with joint pain will find your product and let it bring back the joy of life for their pet like it has done for my boy."

-Emily M.

### **Miracle Happening in the Barn**

"Dear sirs, A miracle is happening in my barn. I had my 16 year horse on Cetyl M®. Times what they are I took him off. He had injured himself slipping on wet grass in pasture. Within a week we were told to take him immediately to university of Florida hospital. After a few weeks the swelling had gone down. Vets there said it was the worst case of Sweeney they had ever operated on partially dislocated shoulder also. He has been home in a sling for 2 months at home and is back on Cetyl M®. I have 2 vets that take care of him here both have said they see muscle coming back and joint looks like its heading in right direction. I will never ever take him off this product the rest of his life. He will be in sling minimum 7 months to a year. But now I see less time. I just can't believe it. Thank you Barbara and UB."

—Barbara Grimes/Florida

### **Palomino Gelding Shows Big Change**

"I just had to tell you how pleased I am with your product! My 20-year-old Palomino gelding was really having some hip problems. The farrier even had trouble getting him to pick up his back feet because it was so painful. Poor Boomer would actually cry out in pain. After only eight weeks, he is running and playing like his old self again. Even the farrier noticed a big change ... no pain and Boomer just lifted his legs for him, which he hadn't done in quite a while. Thank you for developing Cetyl M®, and Boomer thanks you too!"

### **Cetyl M® Really Works**

"We have a 14-year-old AQHA foundation bred stallion that had extensive reining training as a four and five year old. That repetitive pattern work caused hock problems and first and second stage navicular problems. We were heading toward the world show in team roping and almost had our points when he came up very lame. We laid him off and retired him, using him for lessons and my wife's trail horse. He could not go down hills due to his hocks and could not stand on one back leg to be shod. After three weeks on Cetyl M® he will almost run down hills, stopping with his back under him as he should and not short stepping his back legs at all. I was skeptical of this product due to trying several things over the 35 years I've been involved with quarter horses, but Cetyl M® really works and I'll tell anyone who asks that it is definitely worth the money. Thanks for a great product."

—Stan Rogers

### **Mare No Longer Needs Injections**

"At first I thought I'd experiment with Advanced Cetyl M® on myself and my husband. We both have arthritis. I ordered a bottle and we each took two capsules the day it arrived. Lo and behold, the next morning we were both amazed. We had no arthritic symptoms at all! Originally, I was interested in this product for my horse that was to arrive in a couple of weeks. She's an 18-year-old mare with OCD and has developed arthritis in her hocks. She was on injections and I was told she would need them upon her arrival as she was already overdue. When she arrived, I had my supply of Advanced Cetyl M® with me. She was fed a bran mash with the loading dose of Cetyl M®. I was warned by her previous owner that she would be very stiff in the morning. Morning came and she was fine! Two days later she was out in the arena cantering and kicking up her heels. I've continued giving her Cetyl M® now for two months and she has never showed signs of arthritis. As a matter of fact, the vet said she doesn't need injections because the Cetyl M® is working. This is an amazing product. Absolutely amazing! Thank you!"

—Arlene Otto/Coram, NY

### **X-Rays of 20-Year-Old Rodeo Horse Show "Joints of a 2-Year-Old"**

"Our daughter Rosanna has a 20-year-old thoroughbred gelding she had been rodeoing with in high school competition doing barrels and pole bending. Captain Madison (we call him Capi) was under a lot of joint stress from the competition so we put him on Advanced Cetyl M® to prevent joint problems. The Advance Cetyl M® really improved his performance! Recent X-rays show his hocks and joints are those of a 2-year-old. One X-ray showed a bone chip in the left fetlock. But Capi shows no lameness. Surgery would normally be recommended but the vet says there's no need for it without lameness. Horses usually start slowing down at age 20, but Capi is doing wonderfully. In fact, his improved performance helped earn Rosanna a rodeo scholarship to Boise State University. Rosanna and Capi are now both going off to college rodeo. We attribute it all to Advanced Cetyl M®."

—Vivian Anderson/Townsend, MT

### **Horse With Ringbone Shows Amazing Recovery**

"I was desperate to help my horse 'Doc' after he tore a ligament and developed severe ringbone in the coffin joint of his left hoof. Our vet said the problem would only get worse and that he would eventually have to be put down. We put him on Advanced Cetyl M® and after just two weeks, Doc was able to walk without limping. After the first month he was able to trot and canter without limping. My horse is now pain-free and happy thanks to this wonderful product. My vet calls Doc the miracle horse."

—Lori Pieprzyca/ New Braunfels, TX

### **Veterinarian Uses Advanced Cetyl M® With His Own Horses**

"I have been using Advanced Cetyl M® Joint Action Formula for Horses for two and a half years, mostly on my young barrel-racing horses whose joints come under a lot of stress. While Advanced Cetyl M® works fast to reduce inflamed and sore joints, I also use it as an effective preventative of joint problems. My horses that are on Advanced Cetyl M® perform better. And in performance horses, that's the bottom line. I recommend Advanced Cetyl M® to a lot of my clients."

—Sid Erickson, DVM/Helena, MT

### **Racehorse Trainer Recommends Advanced Cetyl M®**

"I had a 3-year-old Arabian filly who was having stifle problems. She had gone through a big growth spurt and wasn't breaking over in the rear, causing inflamed stifles. The track veterinarian here at Arapahoe Park Race Track recommended I put her on Advanced Cetyl M®. I did and the Advanced Cetyl M® worked great. No more inflammation and she is moving well. I'm going to keep her on it."

—Jeffrey Winterstein, Racehorse Trainer/Littleton, CO

### **Thoroughbred Shows Remarkable Improvement**

"Following a failed pre-purchase exam and against my vet's advice, I went ahead & purchased the 3-going-on-4-year old 16.1 hand thoroughbred in hope that he could be brought around to at least a 2nd Level dressage horse. After speaking to one of the vets at Texas A&M who recommended injecting the hocks and waiting for them to potentially fuse, I still sought relief for the day-to-day pain the horse exhibited following a workout. I do not want to keep horses on long-term Bute because of the potential for ulcer formation. I was told glucosamine & MSM by themselves would provide some help, along with some topical solutions (i.e., magnetic therapy, cold compresses & various solutions). However, in speaking to an active 3-day eventer, I learned of Advanced Cetyl M® Joint Action Formula, and decided to give it a try. After the initial loading dosage, I saw improvement. And after six months, I realized the full extent of the horse's REMARKABLE improvement. Now, I am happy to report, I can see this now 16.3H TB named Lancelot going much further than I ever anticipated. Thank you for making such a remarkable product available to the public."

—Sarea Moreland Knight/Shady Shores, TX

### **Improvement In My Barrel Runs**

"I have a 5 year old filly that had laminitis as a 3 year old from high fever. Every time we had her shod, she was lame for a week or longer. We barrel race and the sore feet was definitely holding us back. About 3 months ago, I decided to try her on Cetyl M. I knew that it worked wonderful on joints, but I didn't know how it would work on inflammation of the feet. Well, it works great!! Before Cetyl M, she wouldn't sit down on her rear end and turn a barrel. She would protect her feet as much as she could which was preventing her from performing like she was capable of performing. Prior to Cetyl M, she was consistently running 4D and sometimes 3D. Just recently, we went to the Holiday Classic in Jackson, MS. She ran in the top of the 2D. If you know anything about the Holiday Classic, it's a tough run. If you're having problems with feet issues, you need to try Cetyl M. I noticed a difference in the first month and I continue to see a difference every time I get on her back. She would never run and play in the pasture and now she runs all the time. I will never be without it. Thanks for your product."

—Kim Patterson/Mississippi
