

Let Us Size You

1. Ensure your horse has had a correct barefoot trim - rolled toe, bevelled hoof wall, low heel and all flare removed
2. Take three photos of each hoof within two weeks of your barefoot trim as follows:

First Image

Measure from the center of the toe and down over the frog

Second image

Measure across the widest part of the hoof

Third image

Front of hoof

Important

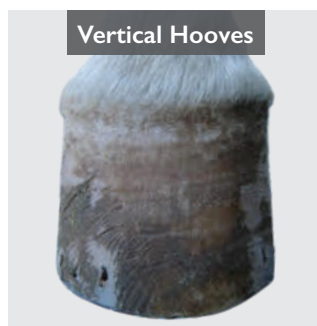

Do not measure to the back of the heels where they contact the skin

3. Send your pics by:
 - Uploading them at our **Sizing** page
