

Product Description

LF-GSD012PF is a 12W isolated constant current DALI DT6 dimmable LED driver. It has DALI dimming and push dimming functions. Its rated input voltage limit is 198-264Vac. The output current can be adjusted via the DIP switch from 150mA to 400mA, in steps of 50mA.

Features

- IP20
- Suitable for Class II light fixtures
- Constant current output. The output current can be adjusted via the DIP switch
- Built-in active PFC function
- Standby power consumption is less than 0.5W
- DALI dimming function. The logarithmic dimming curve or the linear dimming curve of DALI dimming can be selected via the software
- Push dimming function
- 5-year warranty (Please refer to the warranty condition.)

Applications

- Plant lighting
- Indoor office lighting
- Decorative lighting
- Commercial lighting
- Residential lighting

Remarks	<ol style="list-style-type: none"> 1. It is recommended that customer should install overvoltage and undervoltage protection devices and surge protection devices in the power supply circuits of the light fixtures to ensure safety before connecting to electricity. 2. As an accessory, the LED driver is not the only factor determining the EMC performance of the LED light fixture. The structure and the wiring of the light fixture are also relevant. Thus it's strongly recommended the LED light fixture manufacturer should re-confirm the EMC of the whole LED light fixture. 3. The test conditions of the circuit breaker configuration quantity are the same as those of the inrush current test. 4. Unless otherwise stated, the parameters above are test results under these conditions: ambient temperature 25℃, humidity 50%, DALI signal, 100% load, maximum output current and input voltage 230Vac.

■ Wiring Instruction of the Push Dimming

■ Operation Instructions of Push Dimming

Operation	Operation Time	Function
Instant Push	0.1 sec - 0.5 sec	Light on / off
Long Push	0.6 sec - 9 sec	Dim up / down
Reset Push	> 9 sec	Reset to the 50% brightness

- The push operation won't cause any variation if it's less than 0.1 sec.
- Connect the push dimmer in series to the AC-L and the DA1 terminals of LF-GSD012PF. Connect the AC-N and DA2 terminals in short circuit.
- The minimum dimming depth of push dimming is 1% (lout).
- The push dimming mode has memory function in case of power failure. When the power supply is restored, the light will return to the exact status before power failure.
- In the push dimming mode, every dimming direction (up or down) is opposite to the last one.
- The maximum wire length between the push switch and the farthest LED driver is 135m. Wire diameter: 16-22AWG.
- In the DALI dimming and push dimming modes, the maximum quantity of the LED drivers connected in parallel is 64 pieces.

■ **Operation Instructions of DALI Dimming**

- Factory default setting is of 100% brightness.
- Connect the DALI signal to the DA1 and DA2 terminals.
- DALI protocol includes 16 groups and 64 IP addresses.
- The minimum dimming depth of the DALI dimming is 1% (lout).

⚠ The DALI dimming function and the push dimming function cannot be used at the same time, otherwise the DALI dimming will be damaged.

Transportation & Storage

■ Transportation

- Suitable transportation means: vehicles, boats and aircraft.
- During transportation, there should be awnings for rain protection and sun protection. Civilized loading and unloading are required. There should be no severe vibration or impact.

■ Storage

- Storage in accordance with the provisions of Class I environment. For products which have been stored for more than six months, they mustn't be used until they pass the re-inspection.

Attention

- Please use this product according to its specifications otherwise there may be malfunction.
- Use light fixtures that have not been certified or are not compatible with the LED drivers may cause fire or other hazards.
- Man-made damage, any use beyond the specification and non-original-factory modification are not covered by warranty.
