K4R Key-ring Floodlight (60lm) - POS12

K4R Key-ring Floodlight (60lm)

PRODUCT DESCRIPTION

High power in a small housing! The K4R is a key ring lamp raising performance, technology and design up to a new level. The small everyday helper in a high-quality and well-designed aluminium case reaches up to 60 lumens and provides wide area illumination. Being the first lamp in the K series, the K4R is rechargeable as well as equipped with an additional safety feature emitting an SOS (hold switch for 3 seconds) distress signal if necessary.

- Extremely compact in size yet very powerful with 60 lumens
- Rechargeable via supplied USB cable
- Wide area illumination of the surroundings
- Metal snap hook for easy attachment
- High-quality aluminium case

PRODUCT SERIES

The Ledlenser K-Series
The key to illumination.
The "K" in this series' name stands for "key". Because due to their compact sizes, people often keep these mini lights attached to their keychains in their pockets. But there's no reason to hide them - they have elegant designs, amazing power and are incredibly sturdy.

FOOTNOTES

The information pertaining to scope of delivery, appearance, performance, dimensions and weight corresponds to the information available at the time of publication. In the interest of product development, we reserve the right to change scope of delivery, appearance, design and color without prior notice. Product images may vary from the actual products and may show optional accessories which can be purchased separately. Errors and omissions excepted.

1) Measurements according to ANSI FL1 on the respective setting. Average values, in some cases, deviations by +/- 15 % may occur due to technical reasons. If no setting is explicitly indicated, the values refer to luminous flux (lumens/lm) and lighting range (meters/m) on the highest setting and to battery duration (hours/hrs/h) on the lowest setting. A boost function (if available) can be used several times, but only for short periods of time. If no setting is explicitly indicated, measurement is based on "energy saving mode."

2) Calculated capacity value in watt-hours (Wh). This applies to the delivery state of the battery/ies inside the respective item, or for lights with rechargeable battery/ies, to the rechargeable battery/ies inside the product when fully charged.

5) Charging time varies by hardware used.
