Visual Signals - Industrial & Marine

LIGHT EMITTING DIODE BEACONS

Industrial & Marine LED Beacons > LED701/700 Series

Product overview

The LED701/700 series is suitable for Industrial & Marine signalling applications where a more powerful visual signal is required. The unit incorporates 64 off extra bright, long life LED's and offers a high output low maintenance signalling solution.

These beacons have three pre-selectable stages of alarm. Flashing mode at either

60 or 120 FPM and a continuous (static) mode. These can be pre-set by a jumper link on the PCB. The design allows for a third wire control that can switch from continuous mode to pre-set flashing mode.

Termination is inside the enclosure via conduit knockouts on the sides of the unit and can incorporate M16 up to M32 cable glands.

Features

- Continuously rated
- · High light output
- · Suitable for surface or wall mounting
- 120° prime light output above the vertical axis
- · High ambient operating temperature
- · Dual Colour LED option
- Ambient Light Detection Option
 Longer Life
- · Dustproof and weatherproof
