

Output Dimmer Signal

Output Dimmer Signal

# User Manual

## DIM-S1L10V-0

Universal Constant Voltage  
Analog Dimmer-10AX1CH

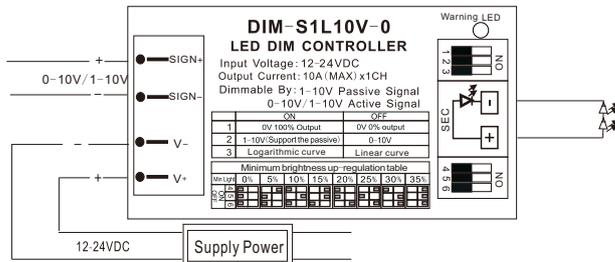

## Features :

1. Support a variety of analog dimming signal;
2. Support the short circuit, over-current protection and alarm function;
3. Support minimum brightness up-regulation function;
4. Support dimmer curve selection function;
5. More than kinds of functions can be selected by switch please take the switch function tables as reference.
6. Function default setting is: 0-10V, 0V 100% output Log Dimming Curve, Mini brightness no up-regulation

## Specifications :

Model	DIM-S1L10V-0
Supply voltage input range ( DC )	12-24V
Output current ( 1 channels )	10A/CH
Over current protection	When the overcurrent indicator lights up red
Short circuit protection	When short circuit indicator lights up red
Minimum brightness level	8 Level
Support dimmer curve	2 kinds
Support the dimming signal type	0-10V active light modulation signal 1-10V passive light modulation signal 1-10V active light modulation signal

## Appearance and Connection :

(Default Setting)

### Switch function selection table

1		2		3		1-10V		0-10V		0V		floating		dimmer curve
