

METALCLAD PLUS SURFACE MOUNTED WIRING DEVICES

Honeywell

All MK products are made to stand up to the wear and tear of everyday use, but in some areas you need them to be even tougher. That's why the Metalclad Plus range of surface mounted accessories is ideal for factories, workshops, garages and sheds. Made from heavy gauge steel they're tough and impact resistant and they look good too. There is a wide selection of surface mounted products in the range including light switches with red rockers and RCD protected socket which is essential when operating power tools.

Tough and impact resistant

Metalclad Plus is ideal for factories, workshops, garages and sheds.

Comprehensive range

Suits all your needs where hard wearing performance is required.

Frontplates have smoothly chamfered edges

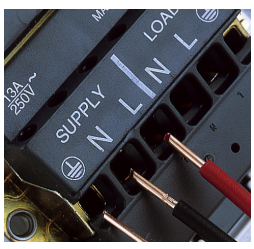

Fits flush with the backbox providing a neat finish.

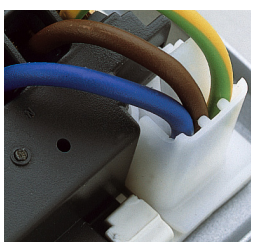

When servicing or repairing appliances fuse carriers on connection units can be padlocked for additional safety

Backboxes come with or without side knockouts. All boxes have a central knockout in the base for added on-site flexibility

In-line terminals means that cables can be cut to the same length. White printing gives instant terminal identification

A simple but effective cord grip securely holds the cable in connection units

A secret key-operated switch helps prevent unauthorised usage

An optional tamperproof screw on the fuse carrier is particularly useful for appliances in public areas
