Ranging from low minimum, in-stock programs to large, custom made developments. KenDor serves as a one stop sourcing destination.

This catalog focuses on a broad range of technical fabrics that boast various performance properties including waterproof, anti-microbial, UPF50, DWR (Durable Water Repellent), Chito, wicking, anti-static, and more.

These fabrics range from Nylon and Polyester, in both conventional & recycled options, to fabrics with Dintex® - a three-layer, windproof, waterproof membrane by Ding Zing.

Work With KenDor
To work with us, go to our website www.kendortextiles.com
KenDor Textiles is STANDARD 100 by OEKO-TEX® certified. The STANDARD 100 by OEKO-TEX® is a worldwide consistent, independent testing & certification system that tests for harmful substances used during all stages of production (raw materials, intermediate, and end product). This includes testing for illegal substances, legally regulated substances, known harmful (but not legally regulated) chemicals, and other parameters for health care. It provides manufacturers with a uniform benchmark when evaluating harmful substances potentially used in the production process. Extensive product checks and regular company audits also ensure that the industry has a globally sustainable awareness of the responsible use of chemicals.
OUTERWEAR

This grouping is a compilation of the fabrics recommended for inner & outer layers both for warmth and/or performance. The list that follows outlines the fabrics that can be sublimated as well as those that meet the stringent requirements of STANDARD 100 by OEKO-TEX® certification.

To see images of all fabrics and to place a swatch card order, please check out our website at www.kendorntextiles.com
