

Naked Kitty Naturals Skincare Info + How to Use

**All Naked Kitty skincare products are vegan except for the Supernatural moisturizer, which contains honey.

Key:

Sensitive Skin

Acne-Prone Skin

All Skin Types. Normal and combination skin can use either option for skincare, combination skin should consider using serum for dry spots.

Tea Tree Oil Cleanser + Makeup Remover: This cleanser does not contain any solvents or soaps and is 100% natural. The oils in the oil cleanser are specifically chosen to keep pores unclogged, and will not strip oils from your face, keeping the pH of your skin balanced.

The cleanser also doubles as makeup remover in a pinch: pump a little onto a cotton pad to remove eye makeup, or rub into dry face over makeup, wipe it off, rinse and dry your face. This stuff cuts through waterproof makeup and dirt like nobody's business.

Pink Clay Facial Bar: This soap works wonders on the most sensitive skin, and will not strip oils from your face. The shea butter and pink clay base are gentle, while cleansing and detoxifying skin, removing dead skin cells and creating an overall refreshed appearance. We love using it the facial bars after washing our faces with the Oil Cleanser for a refreshing double cleanse. This bar is unscented.

Charcoal Facial Bar: This bar is great for busting acne, and will not strip natural oils from your face. Activated charcoal and a blend of African Black Soap (camwood bark, cocoa pod ash, plantain peel ash) bind to dirt and oil to give your skin a deep clean. This bar is unscented.

Happy Glow Toner: The Happy Glow Toner contains witch hazel, seaweed extract, tea tree and lavender essential oils. All of these ingredients are great oils for soothing skin and keeping acne in check.

After Midnight Serum (Great for dry / mature skin): 1-2 drops are all you need of this beautiful argan oil based serum. Frankincense and helichrysum essential oils tell wrinkles, scars and fine lines to beat it, chamomile soothes dry skin, and rosehip oil helps protect and hydrate. Use this between toning and moisturizing for a little skin boost.

Supernatural Moisturizer: This light moisturizer is packed with everything but the kitchen sink variety of plant and oil extracts that are great for your skin: aloe, argan oil, witch hazel, orange blossom and chamomile work wonders on all skin types. This moisturizer is non-comedogenic (will not clog pores). Want to maximize your container use? Check out the Happy Glow Toner!

Matcha Love Moisturizer: A vegan, matcha-infused moisturizer for sensitive, dry, or acne-prone skin: tea tree oil keeps bacteria at bay, while chamomile and a hint of glycerin soothe dry or irritated skin. Matcha provides an anti-inflammatory bonus. This moisturizer will not clog your pores, either!

Pinky Swear Scrub + Mask: This exfoliating scrub is great for sensitive skin! French Pink Clay renews cells and improves skin elasticity, seaweed powder draws out impurities in skin, sloughs off dead cells and balances your skin's moisture levels, while chamomile soothes inflamed skin.

Dark Matter Scrub + Mask: This activated charcoal scrub is great for acne-prone skin. Activated charcoal traps toxins in the skin and joins forces with bentonite clay to absorb toxins and balance skin. Calendula and lavender stimulate skin cells and work as antibacterial agents to soothe and heal.

How to Use Naked Kitty Skincare

(1) CLEANSE (We're big fans of the double cleanse!):

Note: As an alternative to the **Tea Tree Cleansing Oil**, you can use the **Pink Clay Facial Bar** or the **Charcoal Facial Bar** if you are not comfortable with Cleansing Oil.

1. Take 1-2 pumps of **Tea Tree Cleansing Oil** into the palm of your hand.
2. Gently massage into dry face (even over makeup!)
3. Wet face to emulsify the cleansing oil.
4. Rinse thoroughly with warm water, or use a warm wash cloth to remove the oil.
5. Wash face with **Pink Clay Facial Bar** or **Charcoal Facial Bar**.
6. Pat face dry.

(2) TONE:

Spray toner on face and use a cotton pad to remove excess cleanser, then spritz directly onto the face to help evenly distribute moisturizer. Think of toner as an external hydrator that'll help you get more out of your skincare regimen (and your moisturizer).

(3) MOISTURIZE:

Moisturize with **Supernatural Moisturizer** or **Matcha Love Moisturizer**. Simply dab the tip of your finger in the moisturizer and smooth onto your face. Add more moisturizer as necessary.

(4) APPLY SERUM (For dry or mature skin, or for prevention as a night treatment):

Take 1-2 drops of **After Midnight Serum** onto fingers and massage gently overtop of moisturizer. Tap gently into eye area and dryer patches.

(5) SCRUB / MASK (exfoliate):

Shake 1-2 teaspoons of powder into a small bowl or cup. Slowly add water, witch hazel, or hydrosol of your choosing (we recommend adding a teaspoon at a time) to the powder to create a paste of desired consistency. Apply with clean fingers to entire face after cleansing, or use as a spot treatment. Leave on for 5-15 minutes. Scrub gently while rinsing with warm water. Use 1-2 times per week; do not use over acne or aggressive breakouts. Overuse can cause skin to thin out, which can make your skin lose its mind on you (more breakouts, dryness, etc.)
