VICTROLA

by innovative technology.
In 1939, The World’s Fair in New York City introduced the idea of furnishing American’s homes with geometric shapes. Its use of clean lines, gentle organic curves, and mixed materials made it an instant hit.

Sixty years later, the Mid-Century Modern design trend is back and stronger than ever! Victrola’s collection of Mid-Century Modern Turntables & Nostalgic Electronics are the perfect complement to your décor and will fill your home with beautiful music.
