THE ORIGINAL MASTER POWER

I nuovi prodotti sono esenti da PFOA e quindi ecocompatibili alle norme UE. **Master Power** è la **paraffina High Tech ad alto contenuto di fluoro (HF)** che garantisce elevate prestazioni in termini di scorrevolezza per tutte le discipline. Grazie al sistema di paraffinatura **Master Power** lo sci risulta subito più maneggevole e veloce, permettendo una sciata più fluida con minore dispendio di energie.

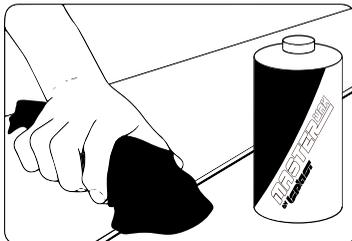

Il sistema **Master Power** è lo strumento ideale per agonisti, sci club o semplici appassionati nelle discipline della discesa, sci di fondo e snowboard. La sua facile applicazione a **FREDDO**, che ha anche la pregevole caratteristica di essere esente da fumi nocivi dannosi per l'ambiente, permette di ottenere eccellenti risultati e di scegliere la paraffinatura più adatta direttamente sul campo gara anche pochi minuti prima del via. Bastano infatti 4 minuti per preparare con cura un paio di sci.

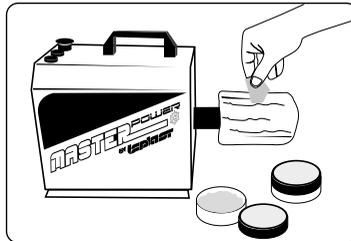

The new products are PFOA free and for this reason they are environmentally adapted to UE rules.

Master Power wax is an hightech waxes, applied in a cold way just with a rotor wool applicator (Master Power) that allows a rapid and complete application of wax choice from today type of snow. The ideal wax system for agonists, ski clubs and amateurs athletes, something to contribute for saving time and resources. Without smoke emission, easy to use, without being detrimental to the environment. The new chemical-mechanics apply system for waxing skis, is designed to give optimal glide. Durable and guaranteed for both short and long distance.

HOT APPLICATION

 I nuovi prodotti sono esenti da PFOA e quindi ecocompatibili alle norme UE.

Cera in polvere 100% fluorocarbon.

Consigliata per tutte le competizioni e discipline dello sci, dove è necessario ottenere il massimo risultato. Le cere in polvere hanno caratteristiche uniche di lunga durata, grande repellenza all'acqua e allo sporco ed eccezionali doti di scorrevolezza.

APPLICAZIONE: Distribuire in modo uniforme sullo sci già preparato con base fluorata e fondere con ferro sciolinatore a 160°. Frizionare con un rullo di sughero. Spazzolare con spazzola di crine e lucidare con panno in lana Masterpower.

The new products are PFOA free and for this reason they are environmentally adapted to UE rules.

Wax powder 100% fluorocarbon.

Recommended for all ski competitions and disciplines, where you need to get the best result. The powder waxes have unique characteristics of long duration, large water and dirt repellency and exceptional low friction characteristics.

APPLICATION: Distribute evenly on the ski base already prepared with fluorinated wax and melt with waxing iron at 160°. Rub with a roller cork. Brush with horsehair brush and polish with Masterpower woolen cloth.

Alexander Bolshunov - Author: FILA | from Comox, Canada

**ALEXANDER BOLSHUNOV,
AWARD-WINNING
RUSSIAN CROSS-COUNTRY SKIER.
TRAINS WITH 'ARIETE'**

Macchina multifunzione ad intensità variabile per l'allenamento del fondista.

Con le nuove guide lineari è posizionabile a diverse altezze per potenziare tutta la parte alta e bassa del corpo.

La confezione include: borsa per il trasporto, staffa di supporto, binari da muro, ganci e corde elastiche.

Come optional è prevista una pedana antiscivolo in alluminio con binari lunghi per ottimizzare il posizionamento dell'Ariete.

Multifunctional machine with variable intensity for cross-country skier training.

With new linear rails it can be positioned at different heights to enhance the upper and lower part of the body.

The package includes: carrying bag, support bracket, linear wall rails, hooks and elastic cords.

As optional is available an aluminum anti-slip platform with long rails to optimize the positioning of the Ariete machine.

MASTERWAX

UN'AUTENTICA EVOLUZIONE NEL CAMPO DELLE SCIOLINE

MASTERWAX nasce nel 2000, aprendo il nuovo secolo con una rivoluzionaria e innovativa idea: **un nuovo concetto di applicazione a freddo di scioline.**

Il concept nasce all'Università di Lione e viene in seguito sviluppato e commercializzato dalla famosa BRIKO.

I vantaggi eccezionali di questa nuova tecnologia sono molteplici: **velocità e facilità di applicazione, senza fumi e gas dannosi, pochissimo spreco e bassissimo impatto sulla natura.**

Grandi pregi per alte prestazioni!

Anche le squadre nazionali hanno sfruttato da subito i vantaggi di questa nuova concezione.

Ricordiamo che **siamo già presenti in coppa del mondo biathlon e cross country** dove numerose squadre utilizzano regolarmente i prodotti MASTERWAX.

MASTERWAX dal 2020 ha una nuova proprietà il cui obiettivo è rinnovare costantemente i prodotti per restare al passo con le nuove normative.

<https://www.youtube.com/watch?v=MEJW1lwteUM>

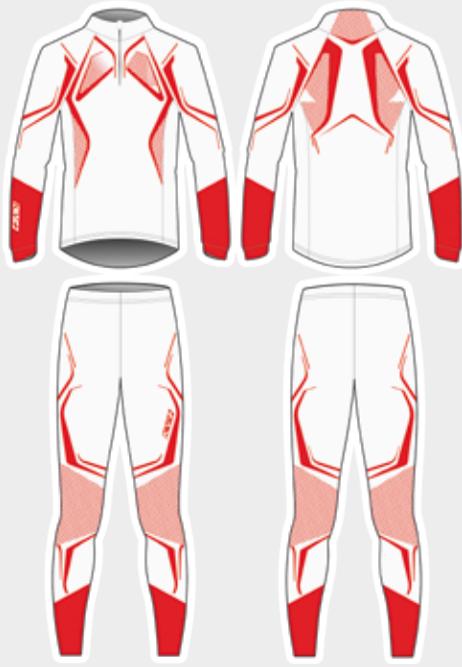

DIMOSTRAZIONE PRATICA PRESSO LA VOSTRA SEDE

SILVANO BARCO, fondista della squadra nazionale italiana di Coppa del Mondo e vincitore dell'edizione del 1995 dell'Engadina Ski Marathon, sarà a disposizione per una **dimostrazione pratica** dei prodotti e del corretto utilizzo presso la Vostra sede.
