

Eco Pour®

Just add water!

JUST4YOUONLINEUK

Eco Pour® H₂O is an environmentally friendly, non toxic, water activated casting powder. No harsh chemicals or solvents. Just add water and pour!

Create beautiful cement textured or smooth well known home decor trinkets such as coasters, bowls, vases, trays, soap dishes, jewellery, candles or more - the possibilities are endless!

Eco Pour® H₂O consists of ONE component: A powder, uniquely designed to ensure excellent strength once cured.

- Powder to water ratio = 100 : 30 E.g. 100g powder and 30g water. (This can be adjusted to suit your required viscosity or preference and is only a guide)
- Working time - 10-20 minutes at 23°C
- Touch dry / unmoulding 30-60 minutes
- 24 - 48 Hours for optimum cured strength
- Shelf life - unlimited when kept dry
- Store in a dry area away from moisture or damp ensuring opened containers are sealed.
- Extremely durable, resisting high impact
- Heat resistant and suitable for candles
- Can be easily sanded with wet/dry sandpaper
- Can be sealed to prevent staining and water penetration and for outdoor use.
- Easily coloured with any water based pigment, acrylic paint/ink or our mica powder range.

INSTRUCTIONS:

Measure the water required and add the powder gradually. If mixing a larger quantity, add small amounts of powder at first and mix as you go to help mix the powder without any lumps.

For example:

100g powder to 30g water

150g powder to 45g water

200g powder to 60g water

300g powder to 90g water

Mix by hand or use an electric mixer until smooth.

Add any water based pigments (Just4youonlineUK resin dyes, pigment powders, acrylic paints) at the mixing stage. Pour and allow to settle.

Powder to water ratio can be altered to achieve your desired consistency and to suit your application.

Don't worry if you notice a shallow layer of water during curing, this disappears as it cures. Changes to the water to powder ratio may alter the drying time.

Bubbles can be removed by gently tapping the mould. To ensure water resistance, seal with an acrylic sealer or varnish.

Eco Pour H₂O is a simple and fun way to create all kinds of projects by simply adding water!
