

My Shed

by **KETER**

A tropical outdoor setting with palm trees, a white metal chair, and a building in the background. The scene is bright and sunny, with lush green grass and foliage. The text 'My Shed' is centered in a white box with a black border.

Making it yours

My Shed can be fully customized to suit your tastes, your purposes and your budget. Use this booklet to get inspired and pick up some tips, then let your imagination guide you.

Give the walls a splash of loud, wild color, or create a Zen getaway. Install mood lighting, or let the sun in.

You decide whether you want to be pumped up or chilled out, The options are all at your fingertips, and the guidance is here to push you in the right direction.

create, and enjoy

Forget about clearing out a room or building an addition. My Shed is a kit that provides you with everything you need to easily assemble a premium quality 11' x 7.5' shed that's weather-resistant and requires absolutely no maintenance.

It starts out with some great features like a heavy-duty floor, strong DuoTech™ walls, two windows and a skylight to enjoy the gentle sun, but it's designed to be dressed up and customized according to your vision.

Go!**

Paint: coloring your space

if you
CAN
dream it
YOU CAN
DO it

Paint: coloring your space

These walls were meant for painting. Easily give yours the look you love, inside and out.

DOS

Acrylic, water-based paint is recommended for both the exterior and interior walls.

Use a roller to apply paint on dry wall surfaces.

Over time, you may find that the look of your shed would benefit from repainting, so either touch it up or go fresh with a whole new color.

DON'TS

Surfaces including the windows, doors, door beams, roof and floor are not meant to be painted, so keep those untouched by your rollers.

Same goes for the beam-like crevices in the walls. The walls are paintable, but leave the crevices bare.

Handy hint

It's easiest to paint the walls when they're lying flat, before you've assembled the shed!

DREAM
CREATE
INSPIRE

Handy hint

Make the best use of your space with a mix of functional items like furniture and decorative touches like plants, photos and artwork!

Adding personal touches

do what you love

Furniture and décor the right vibe

Create the perfect space. Furnishings and other details will give you just the right vibe.

With a heavy-duty floor, reinforced walls and ceiling beams, My Shed is perfect for hanging statement pieces, mounted shelves, wall décor and even serious storage. From carpet or laminate flooring to comfy furniture, framed artwork and a decorative chandelier, outfit your space from floor to ceiling.

DOS

Create a homey feel by installing carpet or flooring, or by putting down an area rug.

Set up your space with all the right furniture. The heavy-duty floor will hold couches, office furniture, work benches, and even a refrigerator.

Use a power drill to drill holes in the wall for hanging items or mounting shelves.

Put screws into the ceiling beams for hanging your ceiling décor.

DON'TS

Don't forget to seal any holes you drill into the walls in order to keep moisture and other elements out.

Don't use screws anywhere in the ceiling other than the beams.

Handy hint

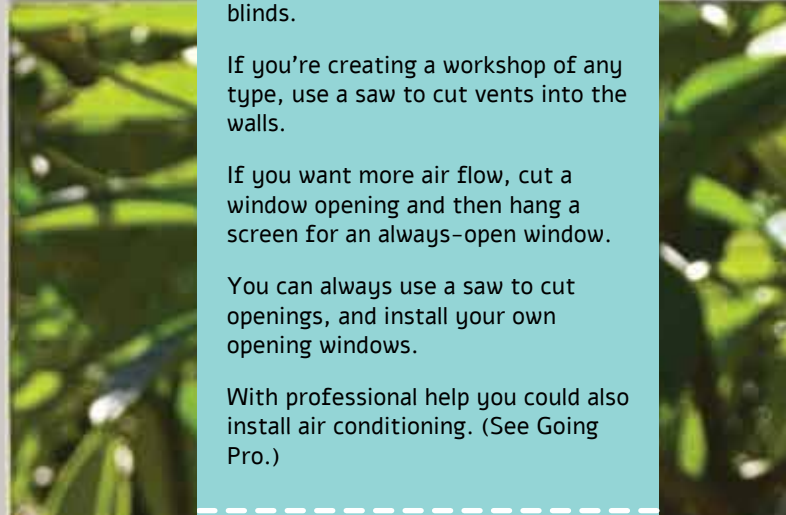

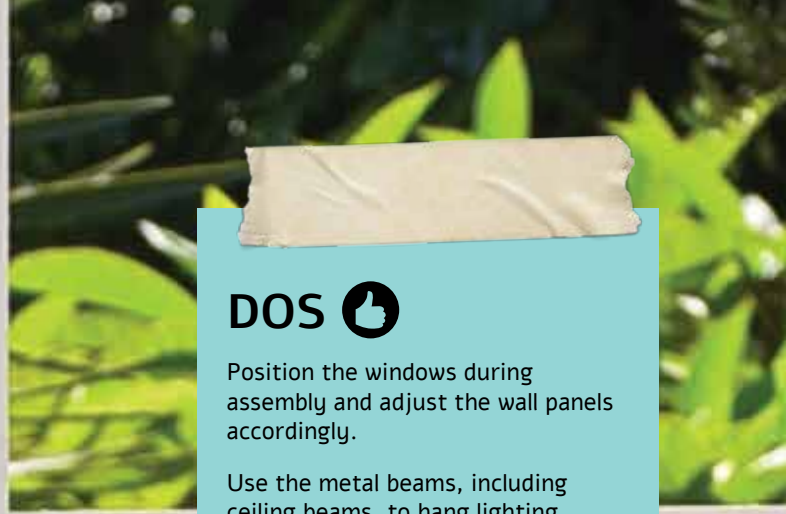

Prop the door open
to let the breeze
in!

Light and air: setting the mood

You decide how you're going to unwind. Sun-soaked with a gentle breeze or curtains closed?

My Shed comes equipped with a skylight and two generously-sized, non-opening windows that allow you to let lots of light in, and if you want to get a little industrious, you can add extra ventilation or easily open up with standard windows.

DOS

Position the windows during assembly and adjust the wall panels accordingly.

Use the metal beams, including ceiling beams, to hang lighting.

Control natural light with curtains or blinds.

If you're creating a workshop of any type, use a saw to cut vents into the walls.

If you want more air flow, cut a window opening and then hang a screen for an always-open window.

You can always use a saw to cut openings, and install your own opening windows.

With professional help you could also install air conditioning. (See Going Pro.)

DON'TS

To maintain the integrity of your shed, all windows, vents and other additions must be properly installed. Avoid making cuts in the walls unless you are confident in what you are doing.

Going pro: getting outside assistance

Go beyond your wildest dreams. With outside assistance, the sky is truly the limit.

My Shed can be wired for electricity, have plumbing installed and even be outfitted with heating and air conditioning. Make your space cozy and comfortable with all the conveniences of home so you can spend hour after hour in it.

DOS

Always use certified professionals for any heating, cooling, electrical or plumbing installations.

Have boxes and outlets installed on the walls.

Have wiring go through the walls only after drilling.

DON'TS

Avoid the temptation to cut corners by using non-certified help for these installations. Your safety depends on it.

Handy hint

Always ensure any holes made during these installations are adequately sealed so you can protect your My Shed as well as your installed services.
