PIN GENIE

Smart Security Reinvented
Convenience Redefined

PIN GENIE SMART LOCK FUNCTIONS & FEATURES

Smart Security Solutions

Bluetooth Connectivity
Lock/Unlock door through smartphone with 256-bit encrypted Bluetooth connection using the PIN Genie Smart Lock App. See PIN Genie Smart Lock App section for details of other smart security solutions related to this feature.

Peek-proof Digital Keypad
First in the world, real-time changing keypad. All numbers reshuffle after each use. Eliminates trace of fingerprints and establishing patterns that reveal door code.

FPC Fingerprint Sensor
Exceptional fingerprint identification which only accepts actual fingerprint input and prevents input of imitation fingerprint made of rubber, paper, film, silicon, etc.,

RFID Smartcard
Register and activate the smartcards included in the package/box. Manage or delete access of each registered cards.

Enhanced Security Features

Auto Lock/ Auto Relock
When door is closed, there is no need to lock the door manually; will be locked automatically. Time range can be from 5s-300s. When door is not opened after a valid door code, smartcard, fingerprint, Bluetooth connection is applied, it will relocked on its own after 10seconds.

At Home Safe Mode
When this double lock system is activated, the door cannot be opened from outside even with registered fingerprint, smartcard or Bluetooth. The digital keypad will be deactivated.

Built-in Intruder Alarm
When trespasser attempts to open the front door by force from the outside or by removing the deadbolt, sensor will be activated with a strong warning alarm.

Child-proof Reassurance Button
When this button is in use, parents are assured children or pets cannot unlock door from the inside. This also provides complete security from external hacking that may occur with the use of wire or string pull the inside knob/handle.

Limited Wrong Code Entry
After three attempts to enter wrong door codes, the lock automatically deactivates. It would require a master door code to reactivate the keypad.

Panic Release Handle
Facilitates quick escape when in danger or during an emergency by pressing the inside handle down.

Fire Resistant
The lock is protected with a special fire resistant coating and is compliant to BS EN1634-1 standard.

High Reliability
Designed and assembled with heavy-duty zinc alloy, stainless steel and high-impact materials for enhanced security, connectivity, ergonomics and aesthetics.

PIN GENIE SMART LOCK FUNCTIONS & FEATURES

Convenient Features

PIN Genie Button
Allows to immediately lock door with a quick press. Serves as switch mode button during set up and programming to functions such as keypad modes, door code verification and deletion, volume control, etc.,

Easy Installation
Install in minutes with a screw driver.

Free-Direction Lock
Product can be easily adjusted to left or right handed door.

Ergonomic Design
The keypad /touchscreen is angled at 11 degrees which makes it comfort for both eyes and hands to access.

Battery Level Indicator
Easy to check battery status by level indicator and battery replacement blinking and beeping sound.

Operates with 4xAA Batteries
Long lasting energy saving 4 x AA batteries that are conveniently available anywhere.

9Volt Battery Socket
Located on the front door panel of the lock which serves as back up power in cases the indoor battery gets fully drained.

Volume Control
Volume can be controlled in 3 levels- Low, Medium, High.

Mute Function
The door can be temporarily opened and quietly without any sound operation to avoid disturbing neighbors.

Ideal Solution for Rental Properties
Suitable for Airbnb hosting, VRBO, studios and properties. No more key duplications. Simply send and designated a 6-8 door code or eKey to your guests to access the door.

PIN Genie Smart Lock App

Offline Security eKey
Grant access to your door via offline temporary eKeys. Create temporary eKeys and remotely share eKeys via email or text when guests need to access door. eKeys expire on pre-set time duration. No need for Wifi access for host and guest thus eliminates the risk and potential online hacking.

Remote Code Management
Share eKeys to your guests over emails and text to enable them to enter your home using a smartphone to unlock your door.

Monitor Access History
Monitor the unlock history of your door on your phone. Receive push notifications on your smartphone when temporary guests codes are used to enter your home.

Master Code
Allows to create multiple user access code which can be controlled by one master code. Useful in office, Airbnb hosting, and rental properties.

Wireless Access
The APP operates without internet or mobile data. Download PIN Genie Smart Lock App on iOS or Android App Stores to connect.

Dedicated Servers
The App is maintained and managed by dedicated team of IT experts over secured dedicated servers which makes it less vulnerable to hacking. This also allows PIN Genie to customize the App as required by hotels, property developers, resorts, etc.,
