

What are Practice Labs?

Whether it's Cisco, Microsoft, CompTIA or VMware, Practice Labs unifies access to all of these vendors through a web browser interface. Pre-configured hardware layouts with accompanying lab guides for fast, convenient access to gain hands on experience. With step-by-step instructions covering thousands of practical tasks across Cisco, Microsoft, VMware and CompTIA exam titles, Practice Labs makes studying for an exam or learning new technologies an engaging experience.

Why should you use a Practice Lab?

In today's world of complex IT systems and technologies it is essential that IT professionals and those new to IT are able to demonstrate how to use and understand vendor products and software.

Using our Practice Labs you can develop your practical IT skills in a safe working environment without the need to invest in your own hardware and software. With the ease and convenience of the Internet we provide you access to real equipment that brings theory to life and gives you a greater depth of technology understanding.

You are also provided with our integrated lab guides which walk you through a variety of topics. These guides will help in your understanding of specific exam objectives or provide guidance on how to carry out a real world scenarios.

With hundreds of topics to choose from we have a solution to meet your skills development objectives.
