

UPDESK EasyUp Standing Desk Converter Workstation

The **UPDESK EasyUp** is the fastest way to turn any desktop surface into a **height adjustable standing desk**. Available in both black and white colors, the EasyUp arrives fully assembled and requires no tools. Simply unbox the EasyUp and it's ready to go!

With its gas-assist lift, you have an infinite number of sitting or standing positions at your fingertips. Unlike its competition, the EasyUp weighs only 40 lbs, so it's easily mobile and able to be set up by a single person. Its sleek design ensures that it can sit on any surface that's at least 24" deep and can accommodate up to two 24" monitors (or a 27" monitor and a laptop).

As an added bonus, the keyboard tray can tilt both negative and positive (up and down) to maximize its ergonomic comfort and comes with an integrated grommet hole in the rear-center of the unit for optimum cord management.

Available in both black and white:
